Notes, Definitions, and Abbreviations

There have been some significant changes in this edition. In the Government section the former Branches entry has been replaced by three entries—Executive branch, Legislative branch, and Judicial branch. The Leaders entry now has subentries for Chief of State, Head of Government, and their deputies. The Elections entry has been completely redone with information for each branch of the national government, including the date for the last election, the date for the next election, results (percent of vote by candidate or party), and current distribution of seats by party. In the Economy section there is a new entry on Illicit drugs.

Administrative divisions: The numbers, designatory terms, and first-order administrative divisions are generally those approved by the United States Board on Geographic Names (BGN) as of 5 April 1990. Changes that have been reported but not yet acted upon by BGN are noted.

Area: Total area is the sum of all land and water areas delimited by international boundaries and/or coastlines. Land area is the aggregate of all surfaces delimited by international boundaries and/or coastlines, excluding inland water bodies (lakes, reservoirs, rivers). Comparative areas are based on total area equivalents. Most entities are compared with the entire US or one of the 50 states. The smaller entities are compared with Washington, DC (178 km², 69 miles²) or The Mall in Washington, DC (0.59 km², 0.23 miles², 146 acres).

Birth rate: The average annual number of births during a year per 1,000 population at midyear. Also known as crude birth rate.

Notes, Definitions, and Abbreviations (*continued*)

Contributors: Information was provided by the Bureau of the Census (Department of Commerce), Central Intelligence Agency, Defense Intelligence Agency, Defense Nuclear Agency, Department of State, Foreign Broadcast Information Service, Navy Operational Intelligence Center and Maritime Administration (merchant marine data), Office of Territorial and International Affairs (Department of the Interior), United States Board on Geographic Names, United States Coast Guard, and others.

Dates of information: In general, information available as of 1 January 1990 was used in the preparation of this edition. Population figures are estimates for 1 July 1990, with population growth rates estimated for mid-1990 through mid-1991. Major political events have been updated through 30 March 1990. Military age figures are average annual estimates for 1990-94.

Death rate: The average annual number of deaths during a year per 1,000 population at midyear. Also known as crude death rate.

Diplomatic representation: The US Government has diplomatic relations with 162 nations. There are only 144 US embassies, since some nations have US ambassadors accredited to them, but no physical US mission exists. The US has diplomatic relations with 149 of the 159 UN members—the exceptions are Albania, Angola, Byelorussia (constituent republic of the Soviet Union), Cambodia, Cuba, Iran, Vietnam, People's Democratic Republic of Yemen [Yemen (Aden) or South Yemen], Ukraine (constituent republic of the Soviet Union), and, obviously, the US itself. In addition, the US has diplomatic relations with 13 nations that are not in the UN—Andorra, Federated States of Micronesia, Kiribati, Liechtenstein, Marshall Islands, Monaco, Nauru, San Marino, South Korea, Switzerland, Tonga, Tuvalu, and the Vatican City. North Korea is not in the UN and the US does not have diplomatic relations with that nation. The US has not recognized the incorporation of Estonia, Latvia, and Lithuania into the Soviet Union and continues to accredit the diplomatic representatives of their last free governments.

Disputes: This category includes a wide variety of situations that range from traditional bilateral boundary disputes to unilateral claims of one sort or another. Every international land boundary dispute in the "Guide to International Boundaries," a map published by the Department of State, is included. References to other situations may also be included that are border- or frontier-relevant, such as maritime disputes, geopolitical questions, or irredentist issues. However, inclusion does not necessarily constitute official acceptance or recognition by the US Government.

Entities: Some of the nations, dependent areas, areas of special sovereignty, and governments included in this publication are not independent, and others are not officially recognized by the US Government. Nation refers to a people politically organized into a sovereign state with a definite territory. Dependent area refers to a broad category of political entities that are associated in some way with a nation. Names used for page headings are usually the short-form names as approved by the US Board on Geographic Names. The long-form name is included in the Government section and an entry of "none" indicates a long-form name does not exist. In some instances, no short-form name exists—then the long-form name must serve for all usages.

There are 249 entities in the Factbook that may be categorized as follows:

Notes, Definitions, and Abbreviations (*continued*)

NATIONS

- 157 UN members (There are 159 members in the UN, but only 157 are included in *The World Factbook* because Byelorussia and Ukraine are constituent republics of the Soviet Union.)
- 15 nations that are not members of the UN—Andorra, Federated States of Micronesia, Kiribati, Liechtenstein, Marshall Islands, Monaco, Namibia, Nauru, North Korea, San Marino, South Korea, Switzerland, Tonga, Tuvalu, Vatican City

OTHER

- 1 Taiwan

DEPENDENT AREAS

- 6 Australia—Ashmore and Cartier Islands, Christmas Island, Cocos (Keeling) Islands, Coral Sea Islands, Heard Island and McDonald Islands, Norfolk Island
- 2 Denmark—Faroe Islands, Greenland
- 16 France—Bassas da India, Clipperton Island, Europa Island, French Guiana, French Polynesia, French Southern and Antarctic Lands, Glorioso Islands, Guadeloupe, Juan de Nova Island, Martinique, Mayotte, New Caledonia, Reunion, St. Pierre and Miquelon, Tromelin Island, Wallis and Futuna
- 2 Netherlands—Aruba, Netherlands Antilles
- 3 New Zealand—Cook Islands, Niue, Tokelau
- 3 Norway—Bouvet Island, Jan Mayen, Svalbard
- 1 Portugal—Macau
- 16 United Kingdom—Anguilla, Bermuda, British Indian Ocean Territory, British Virgin Islands, Cayman Islands, Falkland Islands, Gibraltar, Guernsey, Hong Kong, Isle of Man, Jersey, Montserrat, Pitcairn Islands, St. Helena, South Georgia and the South Sandwich Islands, Turks and Caicos Islands
- 15 United States—American Samoa, Baker Island, Guam, Howland Island, Jarvis Island, Johnston Atoll, Kingman Reef, Midway Islands, Navassa Island, Northern Mariana Islands, Palmyra Atoll, Puerto Rico, Trust Territory of the Pacific Islands (Palau), Virgin Islands, Wake Island

MISCELLANEOUS

- 7 Antarctica, Gaza Strip, Iraq-Saudi Arabia Neutral Zone, Paracel Islands, Spratly Islands, West Bank, Western Sahara

OTHER ENTITIES

- 4 oceans—Arctic Ocean, Atlantic Ocean, Indian Ocean, Pacific Ocean

Notes: The US Government has not recognized the incorporation of Estonia, Latvia, and Lithuania into the Soviet Union as constituent republics during World War II. Those Baltic states are not members of the UN and are not included in the list of nations. The US Government does not recognize the four so-called “independent” homelands of Bophuthatswana, Ciskei, Transkei, and Venda in South Africa.

Gross domestic product (GDP): The value of all goods and services produced domestically.

Gross national product (GNP): The value of all goods and services produced domestically, plus income earned abroad, minus income earned by foreigners from domestic production.

Notes, Definitions, and Abbreviations (*continued*)

GNP/GDP methodology: GNP/GDP dollar estimates for the OECD countries, the USSR, Eastern Europe, and a portion of the developing countries, are derived from *purchasing power parity (PPP)* calculations rather than from conversions at official currency exchange rates. The PPP methods involve the use of average price weights, which lie between the weights of the domestic and foreign price systems; using these weights US \$100 converted into German marks by a PPP method will buy an equal amount of goods and services in both the US and Germany. One caution: the proportion of, say, military expenditures as a percent of GNP/GDP in local currency accounts may differ substantially from the proportion when GNP/GDP is expressed in PPP dollar terms, as, for example, when an observer estimates the dollar level of Soviet or Japanese military expenditures. Similarly, dollar figures for exports and imports reflect the price patterns of international markets rather than PPP price patterns.

Growth rate (population): The annual percent change in the population, resulting from a surplus (or deficit) of births over deaths and the balance of migrants entering and leaving a country. The rate may be positive or negative.

Illicit drugs: There are five categories of illicit drugs—narcotics, stimulants, depressants (sedatives), hallucinogens, and cannabis. These categories include many drugs legally produced and prescribed by doctors as well as those illegally produced and sold outside medical channels.

Cannabis (*Cannabis sativa*) is the common hemp plant, provides hallucinogens with some sedative properties, and includes marijuana (pot, Acapulco gold, grass, reefer), tetrahydrocannabinol (THC, Marinol), hashish (hash), and hashish oil (hash oil).

Coca (*Erythroxylon coca*) is a bush and the leaves contain the stimulant cocaine. Coca is not to be confused with cocoa which comes from cacao seeds and is used in making chocolate, cocoa, and cocoa butter.

Cocaine is a stimulant derived from the leaves of the coca bush.

Depressants (sedatives) are drugs that reduce tension and anxiety and include chloral hydrate, barbiturates (Amytal, Nembutal, Seconal, phenobarbital), benzodiazepines (Librium, Valium), methaqualone (Quaalude), glutethimide (Doriden), and others (Equanil, Placidyl, Valmid).

Drugs are any chemical substances that effect a physical, mental, emotional, or behavioral change in an individual.

Drug abuse is the use of any licit or illicit chemical substance that results in physical, mental, emotional, or behavioral impairment in an individual.

Hallucinogens are drugs that affect sensation, thinking, self-awareness, and emotion. Hallucinogens include LSD (acid, microdot), mescaline and peyote (mexc, buttons, cactus), amphetamine variants (PMA, STP, DOB), phencyclidine (PCP, angel dust, hog), phencyclidine analogues (PCE, PCPy, TCP), and others (psilocybin, psilocyn).

Hashish is the resinous exudate of the cannabis or hemp plant (*Cannabis sativa*).

Heroin is a semisynthetic derivative of morphine.

Marijuana is the dried leaves of the cannabis or hemp plant (*Cannabis sativa*).

Narcotics are drugs that relieve pain, often induce sleep, and refer to opium, opium derivatives, and synthetic substitutes. Natural narcotics include opium (paregoric, parepectolin), morphine (MS-Contin, Roxanol), codeine (Tylenol w/codeine, Empirin w/codeine, Robitussin A-C), and thebaine. Semisynthetic narcotics include heroin (horse, smack) and hydromorphone (Dilaudid). Synthetic narcotics include meperidine or Pethidine (Demerol, Mepergan), methadone (Dolophine, Methadose), and others (Darvon, Lomotil).

Notes, Definitions, and Abbreviations (*continued*)

Opium is the milky exudate of the incised, unripe seedpod of the opium poppy.

Opium poppy (*Papaver somniferum*) is the source for many natural and semisynthetic narcotics.

Poppy straw concentrate is the alkaloid derived from the mature dried opium poppy.

Qat (kat, khat) is a stimulant from the buds or leaves of *Catha edulis* and is chewed or drunk as tea.

Stimulants are drugs that relieve mild depression, increase energy and activity, and include cocaine (coke, snow, crack), amphetamines (Desoxyn, Dexedrine), phenmetrazine (Preludin), methylphenidate (Ritalin), and others (Cylert, Sanorex, Tenuate).

Infant mortality rate: The number of deaths to infants under one year of age in a given year per 1,000 live births occurring in the same year.

Land use: Human use of the land surface is categorized as *arable land*—land cultivated for crops that are replanted after each harvest (wheat, maize, rice); *permanent crops*—land cultivated for crops that are not replanted after each harvest (citrus, coffee, rubber); *meadows and pastures*—land permanently used for herbaceous forage crops; *forest and woodland*—land under dense or open stands of trees; and *other*—any land type not specifically mentioned above (urban areas, roads, desert). The percentage figure for irrigated refers to the portion of the entire amount of land area that is artificially supplied with water.

Leaders: The chief of state is the titular leader of the country who represents the state at official and ceremonial functions but is not involved with the day-to-day activities of the government. The head of government is the administrative leader who manages the day-to-day activities of the government. In the UK, the monarch is the chief of state and the prime minister is the head of government. In the US, the President is both the chief of state and the head of government.

Life expectancy at birth: The average number of years to be lived by a group of people all born in the same year, if mortality at each age remains constant in the future.

Maritime claims: The proximity of neighboring states may prevent some national claims from being fully extended.

Merchant marine: All ships engaged in the carriage of goods. All commercial vessels (as opposed to all nonmilitary ships), which excludes tugs, fishing vessels, offshore oil rigs, etc. Also, a grouping of merchant ships by nationality or register.

Captive register—A register of ships maintained by a territory, possession, or colony primarily or exclusively for the use of ships owned in the parent country. Also referred to as an offshore register, the offshore equivalent of an internal register. Ships on a captive register will fly the same flag as the parent country, or a local variant of it, but will be subject to the maritime laws and taxation rules of the offshore territory. Although the nature of a captive register makes it especially desirable for ships owned in the parent country, just as in the internal register, the ships may also be owned abroad. The captive register then acts as a flag of convenience register, except that it is not the register of an independent state.

Flag of convenience register—A national register offering registration to a merchant ship not owned in the flag state. The major flags of convenience (FOC) attract ships to their register by virtue of low fees,

Notes, Definitions, and Abbreviations (*continued*)

low or nonexistent taxation of profits, and liberal manning requirements. True FOC registers are characterized by having relatively few of the ships registered actually owned in the flag state. Thus, while virtually any flag can be used for ships under a given set of circumstances, an FOC register is one where the majority of the merchant fleet is owned abroad. It is also referred to as an open register.

Flag state—The nation in which a ship is registered and which holds legal jurisdiction over operation of the ship, whether at home or abroad. Differences in flag state maritime legislation determine how a ship is manned and taxed and whether a foreign-owned ship may be placed on the register.

Internal register—A register of ships maintained as a subset of a national register. Ships on the internal register fly the national flag and have that nationality but are subject to a separate set of maritime rules from those on the main national register. These differences usually include lower taxation of profits, manning by foreign nationals, and, usually, ownership outside the flag state (when it functions as an FOC register). The Norwegian International Ship Register and Danish International Ship Register are the most notable examples of an internal register. Both have been instrumental in stemming flight from the national flag to flags of convenience and in attracting foreign-owned ships to the Norwegian and Danish flags.

Merchant ship—A vessel that carries goods against payment of freight. Commonly used to denote any nonmilitary ship but accurately restricted to commercial vessels only.

Register—The record of a ship's ownership and nationality as listed with the maritime authorities of a country. Also, the compendium of such individual ships' registrations. Registration of a ship provides it with a nationality and makes it subject to the laws of the country in which registered (the flag state) regardless of the nationality of the ship's ultimate owner.

Money figures: All are expressed in contemporaneous US dollars unless otherwise indicated.

Net migration rate: The balance between the number of persons entering and leaving a country during the year per 1,000 persons (based on midyear population). An excess of persons entering the country is referred to as net immigration (3.56 migrants/1,000 population); an excess of persons leaving the country as net emigration (−9.26 migrants/1,000 population).

Population: Figures are estimates from the Bureau of the Census based on statistics from population censuses, vital registration systems, or sample surveys pertaining to the recent past, and on assumptions about future trends.

Total fertility rate: The average number of children that would be born per woman if all women lived to the end of their childbearing years and bore children according to a given fertility rate at each age.

Years: All year references are for the calendar year (CY) unless indicated as fiscal year (FY).

Economy

Overview: Fundamentally, Afghanistan is an extremely poor, landlocked country, highly dependent on farming (wheat especially) and livestock raising (sheep and goats). Economic considerations, however, have played second fiddle to political and military upheavals, including the nine-year Soviet military occupation (ended 15 February 1989) and the continuing bloody civil war. Over the past decade, one-third of the population has fled the country, with Pakistan sheltering some 3 million refugees and Iran perhaps 2 million.

Afghanistan (continued)

Another 1 million have probably moved into and around urban areas within Afghanistan. Large numbers of bridges, buildings, and factories have been destroyed or damaged by military action or sabotage. Government claims to the contrary, gross domestic product almost certainly is lower than 10 years ago because of the loss of labor and capital and the disruption of trade and transport. Official claims indicate that agriculture grew by 0.7% and industry by 3.5% in 1988. GDP: \$3 billion, per capita \$200; real growth rate 0% (1989 est.)

Inflation rate (consumer prices): over 50% (1989 est.)

Unemployment rate: NA%

Budget: revenues NA; expenditures \$646.7 million, including capital expenditures of \$370.2 million (FY87 est.)

Exports: \$512 million (f.o.b., FY88); *commodities*—natural gas 55%, fruits and nuts 24%, handwoven carpets, wool, cotton, hides, and pelts; *partners*—mostly USSR and Eastern Europe

Imports: \$996 million (c.i.f., FY88); *commodities*—food and petroleum products; *partners*—mostly USSR and Eastern Europe

External debt: \$1.8 billion (December 1989 est.)

Industrial production: growth rate 6.2% (FY89 plan)

Electricity: 480,000 kW capacity; 1,470 million kWh produced, 100 kWh per capita (1989)

Industries: small-scale production of textiles, soap, furniture, shoes, fertilizer, and cement; handwoven carpets; natural gas, oil, coal, copper

Agriculture: largely subsistence farming and nomadic animal husbandry; cash products—wheat, fruits, nuts, karakul pelts, wool, mutton

Illicit drugs: an illicit producer of opium poppy and cannabis for the international drug trade; world's second largest opium producer (after Burma) and a major source of hashish

Aid: US commitments, including Ex-Im (FY70-88), \$265 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$419 million; OPEC bilateral aid (1979-89), \$57 million; Communist countries (1970-88), \$4.1 billion

Currency: afghani (plural—afghanis); 1 afghani (Af) = 100 puls

Exchange rates: afghanis (Af) per US\$1—50.6 (fixed rate since 1982)

Fiscal year: 21 March-20 March

Communications

Railroads: 9.6 km (single track) 1.524-meter gauge from Kushka (USSR) to

Towraghondt and 15.0 km from Termez (USSR) to Kheyrābād transshipment point on south bank of Amu Darya

Highways: 21,000 km total (1984); 2,800 km hard surface, 1,650 km bituminous-treated gravel and improved earth, 16,550 km unimproved earth and tracks

Inland waterways: total navigability 1,200 km; chiefly Amu Darya, which handles steamers up to about 500 metric tons

Pipelines: petroleum, oil, and lubricants pipelines—USSR to Bagrām and USSR to Shīndand; natural gas, 180 km

Economy

Overview: As the poorest country in Europe, Albania's development lags behind even the least favored areas of the Yugoslav economy. The Stalinist-type economy operates on the principles of central planning and state ownership of the means of production. In recent years Albania has implemented limited economic reforms to stimulate its lagging economy, although they do not go nearly so far as current reforms in the USSR and Eastern Europe. Attempts at self-reliance and a policy of not borrowing from international lenders—sometimes overlooked in recent years—have greatly hindered the development of a broad economic infrastructure. Albania, however, possesses considerable mineral resources and is largely self-sufficient in food. Numerical estimates of Albanian economic activity are subject to an especially wide margin of error because the government is isolated and closemouthed.
GNP: \$3.8 billion, per capita \$1,200; real growth rate NA% (1989 est.)

Economy

Overview: The exploitation of oil and natural gas products forms the backbone of the economy. Algeria depends on hydrocarbons for nearly all of its export receipts, about 30% of government revenues, and nearly 25% of GDP. In 1973-74 the sharp increase in oil prices led to a booming economy that helped to finance an ambitious program of industrialization. Plunging oil and gas prices, combined with the mismanagement of Algeria's highly centralized economy, have brought the nation to its most serious social and economic crisis since independence. The government has promised far-reaching

reforms, including giving public sector companies more autonomy, encouraging private-sector activity, boosting gas and nonhydrocarbon exports, and a major overhaul of the banking and financial systems. In 1988 the government started to implement a new economic policy to dismantle large state farms into privately operated units.

Economy

Overview: Economic development is strongly linked to the US, with which American Samoa does 90% of its foreign trade. Tuna fishing and tuna processing plants are the backbone of the private sector economy, with canned tuna the primary export. The tuna canneries are the second-largest employer, exceeded only by the government. Other economic activities include meat canning, handicrafts, dairy farming, and a slowly developing tourist industry. Tropical agricultural production provides little surplus for export.

Economy

Overview: The mainstay of Andorra's economy is tourism. An estimated 12 million tourists visit annually, attracted by Andorra's duty-free status and by its summer and winter resorts. Agricultural production is limited by a scarcity of arable land, and most food has to be imported. The principal livestock activity is sheep raising. Manufacturing consists mainly of cigarettes, cigars, and furniture. The rapid pace of European economic integration is a potential threat to Andorra's advantages from its duty-free status.

Economy

Overview: Subsistence agriculture provides the main livelihood for 80-90% of the population, but accounts for only 10-20% of GDP. Oil production is the most lucrative sector of the economy, contributing about 50% to GDP. In recent years, however, the impact of fighting an internal war has severely affected the economy and food has to be imported.

Economy

Overview: Anguilla has few natural resources, and the economy depends heavily on lobster fishing, offshore banking, tourism, and remittances from emigrants. In recent years the economy has benefited from a boom in tourism. Development is planned to improve the infrastructure, particularly transport and tourist facilities, and also light industry. Improvement in

the economy has reduced unemployment from 40% in 1984 to about 5% in 1988.

Antarctica

Geography

Total area: about 14,000,000 km²; land area: about 14,000,000 km²

Comparative area: slightly less than 1.5 times the size of the US; second-smallest continent (after Australia)

Land boundaries: see entry on **Disputes**

Coastline: 17,968 km

Maritime claims: see entry on **Disputes**

Disputes: Antarctic Treaty suspends all claims; sections (some overlapping) claimed by Argentina, Australia, Chile, France (Adélie Land), New Zealand (Ross Dependency), Norway (Queen Maud Land), and UK; Brazil claims a Zone of Interest; the US and USSR do not recognize the territorial claims of other nations and have made no claims themselves (but reserve the right to do so); no formal claims have been made in the sector between 90° west and 150° west

Climate: severe low temperatures vary with latitude, elevation, and distance from the ocean; East Antarctica colder than Antarctic Peninsula in the west; warmest temperatures occur in January along the coast and average slightly below freezing

Terrain: about 98% thick continental ice sheet, with average elevations between 2,000 and 4,000 meters; mountain ranges up to 5,000 meters high; ice-free coastal areas include parts of southern Victoria Land, Wilkes Land, and the scientific research areas of Graham Land and Ross Island on McMurdo Sound; glaciers form ice shelves along about half of coastline

Natural resources: coal and iron ore; chromium, copper, gold, nickel, platinum, and hydrocarbons have been found in small quantities along the coast; offshore deposits of oil and gas

Land use: 0% arable land; 0% permanent crops; 0% meadows and pastures; 0% forest and woodland; 100% other (98% ice, 2% barren rock)

Environment: mostly uninhabitable; katabatic (gravity) winds blow coastward from the high interior; frequent blizzards form near the foot of the plateau; cyclonic storms form over the ocean and move clockwise around the coast; during summer more solar radiation reaches the surface at the South Pole than is received at the Equator in an equivalent period; in October 1987 it was reported that the ozone shield, which protects the Earth's surface from harmful ultraviolet radiation, has dwindled to its lowest level ever over Antarctica; subject to active volcanism (Deception Island)

Type: The Antarctic Treaty, signed on 1 December 1959 and entered into force on 23 June 1961, established, for at least 30 years, a legal framework for peaceful use, scientific research, and suspension of territorial claims. Administration is carried out through consultative member meetings—the 14th and last meeting was held in Rio de Janeiro (Brazil) in October 1987.

Consultative (voting) members include claimant nations (they claim portions of Antarctica as national territory and some claims overlap) and nonclaimant nations (they have made no claims to Antarctic territory, although the US and USSR have reserved the right to do so and do

not recognize the claims of others); the year in parentheses indicates when an acceding nation was voted to full consultative (voting) status, while no date indicates an original 1959 treaty signatory. Claimant nations are—Argentina, Australia, Chile, France, New Zealand, Norway, and the UK. Nonclaimant nations are—Belgium, Brazil (1983), China (1985), FRG (1981), GDR (1987), India (1983), Italy (1987), Japan, Poland (1977), South Africa, Uruguay (1985), US, and the USSR.

Acceding (nonvoting) members, with year of accession in parenthesis, are—Austria (1987), Bulgaria (1978), Cuba (1984), Czechoslovakia (1962), Denmark (1965), Finland (1984), Greece (1987), Hungary (1984), Netherlands (1987), North Korea (1987), Papua New Guinea (1981), Peru (1981), Romania (1971), South Korea (1986), Spain (1982), and Sweden (1984). Antarctic Treaty Summary: Article 1—area to be used for peaceful purposes only and military activity, such as weapons testing, is prohibited, but military personnel and equipment may be used for scientific purposes; Article 2—freedom of scientific investigation and cooperation shall continue; Article 3—free exchange of information and personnel; Article 4—does not recognize, dispute, or establish territorial claims and no new claims shall be asserted while the treaty is in force; Article 5—prohibits nuclear explosions or disposal of radioactive wastes; Article 6—includes under the treaty all land and ice shelves south of 60° 00' south, but that the water areas be covered by international law; Article 7—treaty-state observers have free access, including aerial observation, to any area and may inspect all stations, installations, and equipment; advance notice of all activities and the introduction of military personnel must be given; Article 8—allows for jurisdiction over observers and scientists by their own states; Article 9—frequent consultative meetings take place among member nations and acceding nations given consultative status; Article 10—treaty states will discourage activities by any country in Antarctica that are contrary to the treaty; Article 11—disputes to be settled peacefully by the parties concerned or, ultimately, by the ICJ; Articles 12, 13, 14—deal with upholding, interpreting, and amending the treaty among involved nations.

Other agreements: Convention on the Conservation of Antarctic Marine Living Resources; Convention for the Conservation of Antarctic Seals; a mineral resources agreement is currently undergoing ratification by the Antarctic Treaty consultative parties

Economy

Overview: No economic activity at present except for fishing off the coast and small-scale tourism, both based abroad. Exploitation of mineral resources will be held back by technical difficulties, high costs, and objections by environmentalists.

Economy

Overview: The economy is primarily service oriented, with tourism the most important determinant of economic performance. During the period 1983-87, real GDP expanded at an annual average rate of 8%. Tourism's contribution to GDP, as measured by value added in hotels and restaurants, rose from about 14% in 1983 to 17% in 1987, and stimulated growth in other sectors—particularly in construction, communications, and public utilities. During the same period the combined share of agriculture and manufacturing declined from 12% to less than 10%. Antigua and Barbuda is one of the few areas in the Caribbean experiencing a labor shortage in some sectors of the economy.

GDP: \$353.5 million, per capita \$5,550; real growth rate 6.2% (1989 est.)

Inflation rate (consumer prices): 7.1% (1988 est.)

Unemployment rate: 5.0% (1988 est.)

Budget: revenues \$77 million; expenditures \$81 million, including capital expenditures of \$13 million (1988 est.)

Exports: \$30.4 million (f.o.b., 1988 est.); **commodities**—petroleum products 46%, manufactures 29%, food and live animals 14%, machinery and transport equipment 11%; **partners**—Trinidad and Tobago 40%, Barbados 8%, US 0.3%

Imports: \$302.1 million (c.i.f., 1988 est.); **commodities**—food and live animals, machinery and transport equipment, manufactures, chemicals, oil; **partners**—US 27%, UK 14%, CARICOM 7%, Canada 4%, other 48%

External debt: \$245.4 million (1987)

Industrial production: growth rate 10% (1987)

Electricity: 49,000 kW capacity; 90 million kWh produced, 1,410 kWh per capita (1989)

Industries: tourism, construction, light manufacturing (clothing, alcohol, household appliances)

Agriculture: accounts for 4% of GDP; expanding output of cotton, fruits, vegetables, and livestock sector; other crops—bananas, coconuts, cucumbers, mangoes; not self-sufficient in food

Aid: Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$40 million

Currency: East Caribbean dollar (plural—dollars); 1 EC dollar (EC\$) = 100 cents

Exchange rates: East Caribbean dollars (EC\$) per US\$1—2.70 (fixed rate since 1976)

Arctic Ocean

Geography

Total area: 14,056,000 km²; includes Baffin Bay, Barents Sea, Beaufort Sea, Chukchi Sea, East Siberian Sea, Greenland Sea, Hudson Bay, Hudson Strait, Kara Sea, Laptev Sea, and other tributary water bodies

Comparative area: slightly more than 1.5 times the size of the US; smallest of the world's four oceans (after Pacific Ocean, Atlantic Ocean, and Indian Ocean)

Coastline: 45,389 km

Climate: persistent cold and relatively narrow annual temperature ranges; winters characterized by continuous darkness, cold and stable weather conditions, and clear skies; summers characterized by continuous daylight, damp and foggy weather, and weak cyclones with rain or snow

Terrain: central surface covered by a perennial drifting polar icepack which averages about 3 meters in thickness, although pressure ridges may be three times that size; clockwise drift pattern in the Beaufort Gyral Stream, but nearly straight line movement from the New Siberian Islands (USSR) to Denmark Strait (between Greenland and Iceland); the ice pack is surrounded by open seas during the summer, but more than doubles in size during the winter and extends to the encircling land masses; the ocean floor is about 50% continental shelf (highest percentage of any ocean) with the remainder a central basin interrupted by three submarine ridges (Alpha Cordillera, Nansen Cordillera, and Lomonsov Ridge); maximum depth is 4,665 meters in the Fram Basin

Natural resources: sand and gravel aggregates, placer deposits, polymetallic nodules, oil and gas fields, fish, marine mammals (seals, whales)

Environment: endangered marine species include walrus and whales; ice islands occasionally break away from northern Ellesmere Island; icebergs calved from

Arctic Ocean (continued)

western Greenland and extreme northeastern Canada; maximum snow cover in March or April about 20 to 50 centimeters over the frozen ocean and lasts about 10 months; permafrost in islands; virtually icelocked from October to June; fragile ecosystem slow to change and slow to recover from disruptions or damage

Note: major chokepoint is the southern Chukchi Sea (northern access to the Pacific Ocean via the Bering Strait); ships subject to superstructure icing from October to May; strategic location between North America and the USSR; shortest marine link between the extremes of eastern and western USSR; floating research stations operated by the US and USSR

Economy

Overview: Economic activity is limited to the exploitation of natural resources, including crude oil, natural gas, fishing, and sealing.

Communications

Ports: Churchill (Canada), Murmansk (USSR), Prudhoe Bay (US)

Telecommunications: no submarine cables

Note: sparse network of air, ocean, river, and land routes; the Northwest Passage (North America) and Northern Sea Route (Asia) are important waterways

Argentina

Geography

Total area: 2,766,890 km²; land area: 2,736,690 km²

Comparative area: slightly more than four times the size of Texas

Land boundaries: 9,665 km total; Bolivia 832 km, Brazil 1,224 km, Chile 5,150 km, Paraguay 1,880 km, Uruguay 579 km
Coastline: 4,989 km

Maritime claims:

Continental shelf: 200 meters or to depth of exploitation

Territorial sea: 200 nm (overflight and navigation permitted beyond 12 nm)

Disputes: short section of the boundary with Uruguay is in dispute; short section of the boundary with Chile is indefinite; claims British-administered Falkland Islands (Islas Malvinas); claims British-administered South Georgia and the South Sandwich Islands; territorial claim in Antarctica

Climate: mostly temperate; arid in southeast; subantarctic in southwest

Terrain: rich plains of the Pampas in northern half, flat to rolling plateau of Patagonia in south, rugged Andes along western border

Natural resources: fertile plains of the pampas, lead, zinc, tin, copper, iron ore, manganese, crude oil, uranium

Land use: 9% arable land; 4% permanent crops; 52% meadows and pastures; 22% forest and woodland; 13% other; includes 1% irrigated

Environment: Tucumán and Mendoza areas in Andes subject to earthquakes; pamperos are violent windstorms that can strike Pampas and northeast; irrigated soil degradation; desertification; air and water pollution in Buenos Aires

Note: second-largest country in South America (after Brazil); strategic location relative to sea lanes between South Atlan-

tic and South Pacific Oceans (Strait of Magellan, Beagle Channel, Drake Passage)

Economy

Overview: Argentina is rich in natural resources, and has a highly literate population, an export-oriented agricultural sector, and a diversified industrial base. Nevertheless, the economy has encountered major problems in recent years, leading to a recession in 1988-89. Economic growth slowed to 2.0% in 1987 and to -1.8% in 1988; a sharp decline of -5.5% has been estimated for 1989. A widening public-sector deficit and a multi-digit inflation rate has dominated the economy over the past three years, reaching about 5,000% in 1989. Since 1978, Argentina's external debt has nearly doubled to \$60 billion, creating severe debt-servicing difficulties and hurting the country's creditworthiness with international lenders.

GNP: \$72.0 billion, per capita \$2,217; real growth rate -5.5% (1989 est.)

Inflation rate (consumer prices): 4,925% (1989)

Unemployment rate: 8.5% (1989 est.)

Budget: revenues \$11.5 billion; expenditures \$13.0 billion, including capital expenditures of \$0.93 billion (1988)

Exports: \$9.6 billion (f.o.b., 1989); *commodities*—meat, wheat, corn, oilseed, hides, wool; *partners*—US 14%, USSR, Italy, Brazil, Japan, Netherlands

Imports: \$4.3 billion (c.i.f., 1989); *commodities*—machinery and equipment, chemicals, metals, fuels and lubricants, agricultural products; *partners*—US 25%, Brazil, FRG, Bolivia, Japan, Italy, Netherlands

External debt: \$60 billion (December 1989)

Industrial production: growth rate -8% (1989)

Electricity: 16,449,000 kW capacity; 46,590 million kWh produced, 1,460 kWh per capita (1989)

Industries: food processing (especially meat packing), motor vehicles, consumer durables, textiles, chemicals and petrochemicals, printing, metallurgy, steel
Agriculture: accounts for 15% of GNP (including fishing); produces abundant food for both domestic consumption and exports; among world's top five exporters of grain and beef; principal crops—wheat, corn, sorghum, soybeans, sugar beets; 1987 fish catch estimated at 500,000 tons

Aid: US commitments, including Ex-Im (FY70-88), \$1.0 billion; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$3.6 billion; Communist countries (1970-88), \$718 million

Economy

Overview: Tourism is the mainstay of the economy. In 1985 the economy suffered a severe blow when Exxon closed its refinery, a major source of employment and foreign exchange earnings. Economic collapse was prevented by soft loans from the Dutch Government and by a booming tourist industry. Hotel capacity expanded by 20% between 1985 and 1987 and is projected to more than double by 1990. Unemployment has steadily declined from about 20% in 1986 to about 3% in 1988.
GDP: \$620 million, per capita \$10,000; real growth rate 16.7% (1988 est.)
Inflation rate (consumer prices): 4% (1988 est.)
Unemployment rate: 3% (1988 est.)
Budget: revenues \$145 million; expenditures \$185 million, including capital expenditures of \$42 million (1988)
Exports: \$47.5 million (f.o.b., 1988 est.); *commodities*—mostly petroleum products; *partners*—US 64%, EC
Imports: \$296.0 million (c.i.f., 1988 est.); *commodities*—food, consumer goods, manufactures; *partners*—US 8%, EC
External debt: \$81 million (1987)
Industrial production: growth rate -20% (1984)
Electricity: 310,000 kW capacity; 945 million kWh produced, 15,120 kWh per capita (1989)
Industries: tourism, transshipment facilities
Agriculture: poor quality soils and low rainfall limit agricultural activity to the cultivation of aloes

Geography

Total area: 82,217,000 km²; includes Baltic Sea, Black Sea, Caribbean Sea, Davis Strait, Denmark Strait, Drake Passage, Gulf of Mexico, Mediterranean Sea, North Sea, Norwegian Sea, Weddell Sea, and other tributary water bodies

Comparative area: slightly less than nine times the size of the US; second-largest of the world's four oceans (after the Pacific Ocean, but larger than Indian Ocean or Arctic Ocean)

Coastline: 111,866 km

Climate: tropical cyclones (hurricanes) develop off the coast of Africa near Cape Verde and move westward into the Caribbean Sea; hurricanes can occur from May to December, but are most frequent from August to November

Terrain: surface usually covered with sea ice in Labrador Sea, Denmark Strait, and Baltic Sea from October to June; clockwise warm water gyre (broad, circular system of currents) in the north Atlantic, counterclockwise warm water gyre in the south Atlantic; the ocean floor is dominated by the Mid-Atlantic Ridge, a rugged north-south centerline for the entire Atlantic basin; maximum depth is 8,605 meters in the Puerto Rico Trench

Natural resources: oil and gas fields, fish, marine mammals (seals and whales), sand and gravel aggregates, placer deposits, polymetallic nodules, precious stones

Environment: endangered marine species include the manatee, seals, sea lions, turtles, and whales; municipal sludge pollution off eastern US, southern Brazil, and eastern Argentina; oil pollution in Caribbean Sea, Gulf of Mexico, Lake Maracaibo, Mediterranean Sea, and North Sea; industrial waste and municipal sewage pollution in Baltic Sea, North Sea, and Mediterranean Sea; icebergs common in Davis Strait, Denmark Strait, and the northwestern Atlantic from February to

Atlantic Ocean (continued)

August and have been spotted as far south as Bermuda and the Madeira Islands; icebergs from Antarctica occur in the extreme southern Atlantic

Note: ships subject to superstructure icing in extreme north Atlantic from October to May and extreme south Atlantic from May to October; persistent fog can be a hazard to shipping from May to September; major choke points include the Dardanelles, Strait of Gibraltar, access to the Panama and Suez Canals; strategic straits include the Dover Strait, Straits of Florida, Mona Passage, The Sound (Øresund), and Windward Passage; north Atlantic shipping lanes subject to icebergs from February to August; the Equator divides the Atlantic Ocean into the North Atlantic Ocean and South Atlantic Ocean

Economy

Overview: Economic activity is limited to exploitation of natural resources, especially fish, dredging aragonite sands (The Bahamas), and crude oil and natural gas production (Caribbean Sea and North Sea).

Economy

Overview: Australia has a prosperous Western-style capitalist economy, with a per capita GNP comparable to levels in industrialized West European countries. Rich in natural resources, Australia is a major exporter of agricultural products, minerals, metals, and fossil fuels. Of the top 25 exports, 21 are primary products, so that, as happened during 1983-84, a downturn in world commodity prices can have a big impact on the economy. The government is pushing for increased exports of manufactured goods but competition in international markets will be severe.

GNP: \$240.8 billion, per capita \$14,300; real growth rate 4.1% (1989 est.)

Inflation rate (consumer prices): 8.0% (1989)

Unemployment rate: 6.0% (December 1989)

Budget: revenues \$76.3 billion; expenditures \$69.1 billion, including capital expenditures of NA (FY90 est.)

Exports: \$43.2 billion (f.o.b., FY89); **commodities**—wheat, barley, beef, lamb, dairy products, wool, coal, iron ore; **partners**—Japan 26%, US 11%, NZ 6%, South Korea 4%, Singapore 4%, USSR 3%

Imports: \$48.6 billion (c.i.f., FY89); **commodities**—manufactured raw materials, capital equipment, consumer goods; **partners**—US 22%, Japan 22%, UK 7%, FRG 6%, NZ 4% (1984)

External debt: \$111.6 billion (September 1989)

Industrial production: growth rate 5.6% (FY88)

Electricity: 38,000,000 kW capacity; 139,000 million kWh produced, 8,450 kWh per capita (1989)

Industries: mining, industrial and transportation equipment, food processing, chemicals, steel, motor vehicles

Agriculture: accounts for 5% of GNP and 37% of export revenues; world's largest exporter of beef and wool, second-largest for mutton, and among top wheat exporters; major crops—wheat, barley, sugarcane, fruit; livestock—cattle, sheep, poultry

Aid: donor—ODA and OOF commitments (1970-87), \$8.8 billion

Currency: Australian dollar (plural—dollars); 1 Australian dollar (\$) = 100 cents

Exchange rates: Australian dollars (\$) per US\$1—1.2784 (January 1990), 1.2618 (1989), 1.2752 (1988), 1.4267 (1987), 1.4905 (1986), 1.4269 (1985)

Economy

Overview: Austria boasts a prosperous and stable capitalist economy with a sizable proportion of nationalized industry and extensive welfare benefits. Thanks to an excellent raw material endowment, a technically skilled labor force, and strong links with West German industrial firms, Austria has successfully occupied specialized niches in European industry and services (tourism, banking) and produces almost enough food to feed itself with only 8% of the labor force in agriculture. Living standards are roughly comparable with the large industrial countries of Western Europe. Problems for the 1990s include an aging population and the struggle to keep welfare benefits within budget capabilities. **GDP:** \$103.2 billion, per capita \$13,600; real growth rate 4.2% (1989 est.)

Inflation rate (consumer prices): 2.7% (1989)

Unemployment: 4.8% (1989)

Economy

Overview: The Bahamas is a stable, middle-income developing nation whose economy is based primarily on tourism and offshore banking. Tourism alone provides about 50% of GDP and directly or indirectly employs about 50,000 people or 40% of the local work force. The economy has boomed in recent years, aided by a steady annual increase in the number of tourists. The per capita GDP of over \$9,800 is one of the highest in the region. **GDP:** \$2.4 billion, per capita \$9,875; real growth rate 2.0% (1988 est.)

Inflation rate (consumer prices): 4.1% (1988)

Unemployment: 12% (1986)

Economy

Overview: The oil price decline in recent years has had an adverse impact on the economy. Petroleum production and processing account for about 85% of export receipts, 60% of government revenues, and 20% of GDP. In 1986 soft oil-market conditions led to a 5% drop in GDP, in sharp contrast with the 5% average annual growth rate during the early 1980s. The slowdown in economic activity, however, has helped to check the inflation of the 1970s. The government's past economic diversification efforts have moderated the severity of the downturn but failed to offset oil and gas revenue losses.
GDP: \$3.5 billion, per capita \$7,550 (1987); real growth rate 0% (1988)
Inflation rate (consumer prices): 0.3% (1988)
Unemployment: 8-10% (1989)
Budget: revenues \$1,136 million; expenditures \$1,210 million, including capital expenditures of \$294 million (1987)
Exports: \$2.4 billion (f.o.b., 1988 est.); *commodities*—petroleum 80%, aluminum 7%, other 13%; *partners*—US, UAE, Japan, Singapore, Saudi Arabia
Imports: \$2.5 billion (f.o.b., 1988 est.); *commodities*—nonoil 59%, crude oil 41%; *partners*—UK, Saudi Arabia, US, Japan
External debt: \$1.1 billion (December 1989 est.)
Industrial production: growth rate -3.1% (1987)
Electricity: 1,652,000 kW capacity; 6,000 million kWh produced, 12,800 kWh per capita (1989)
Industries: petroleum processing and refining, aluminum smelting, offshore banking, ship repairing
Agriculture: including fishing, accounts for less than 2% of GDP; not self-sufficient in food production; heavily subsidized sector produces fruit, vegetables, poultry, dairy products, shrimp, and fish; fish catch 9,000 metric tons in 1987

population growth of 2.8% a year and a limited infrastructure, and it is highly vulnerable to natural disasters. Despite these constraints, real GDP averaged about 3.8% annually during 1985-88. One of the poorest nations in the world, alleviation of poverty remains the cornerstone of the government's development strategy. The agricultural sector contributes over 50% to GDP and 75% to exports, and employs over 74% of the labor force. Industry accounts for about 10% of GDP.

Economy

Overview: A per capita income of \$5,250 gives Barbados the highest standard of living of all the small island states of the eastern Caribbean. Historically, the economy was based on the cultivation of sugarcane and related activities. In recent years, however, the economy has diversified into manufacturing and tourism. The tourist industry is now a major employer of the labor force and a primary source of foreign exchange. A high unemployment rate of about 19% in 1988 remains one of the most serious economic problems facing the country.

Economy

Overview: This small private-enterprise economy has capitalized on its central geographic location, highly developed transport network, and diversified industrial and commercial base. Industry is concentrated mainly in the populous Flemish area in the north, although the government is encouraging reinvestment in the southern region of Walloon. With few natural resources Belgium must import essential raw materials, making its economy closely dependent on the state of world markets. In 1988 over 70% of trade was with other EC countries. During the period 1986-88 the economy profited from falling oil prices and a lower dollar, which helped to improve the terms of trade. Real GDP grew by an average of 3.5% in 1986-89, up from 1.5% in 1985. However, a large budget deficit and 10% unemployment cast a shadow on the economy. **GDP:** \$136.0 billion, per capita \$13,700; real growth rate 4.5% (1989 est.) **Inflation rate (consumer prices):** 3.6% (1989 est.)

Unemployment rate: 9.7% est. (1989 est.)

Budget: revenues \$45.0 billion; expenditures \$55.3 billion, including capital expenditures of NA (1989)

Exports: \$100.3 billion (f.o.b., 1989)

Belgium-Luxembourg Economic Union; *commodities*—iron and steel, transportation equipment, tractors, diamonds, petroleum products; *partners*—EC 74%, US 5%, Communist countries 2% (1988)

Imports: \$100.1 billion (c.i.f., 1989)

Belgium-Luxembourg Economic Union; *commodities*—fuels, grains, chemicals, foodstuffs; *partners*—EC 72%, US 5%, oil-exporting less developed countries 4%, Communist countries 3% (1988)

External debt: \$27.5 billion (1988)

Industrial production: growth rate 6.4% (1988)

Electricity: 17,325,000 kW capacity; 62,780 million kWh produced, 6,350 kWh per capita (1989)

Industries: engineering and metal products, processed food and beverages, chemicals, basic metals, textiles, glass, petroleum, coal

Agriculture: accounts for 2% of GDP; emphasis on livestock production—beef, veal, pork, milk; major crops are sugar beets, fresh vegetables, fruits, grain, and tobacco; net importer of farm products

Aid: donor—ODA and OOF commitments (1970-87), \$4.3 billion

Currency: Belgian franc (plural—francs); 1 Belgian franc (BF) = 100 centimes

Exchange rates: Belgian francs (BF) per US\$1—35.468 (January 1990), 39.404 (1989), 36.768 (1988), 37.334 (1987), 44.672 (1986), 59.378 (1985)

Economy

Overview: The economy is based primarily on agriculture and merchandising. Agriculture accounts for more than 30% of GDP and provides 75% of export earnings, while sugar, the chief crop, accounts for almost 40% of hard currency earnings. The US, Belize's main trading partner, is assisting in efforts to reduce dependency on sugar with an agricultural diversification program. In 1987 the drop in income from sugar sales to the US because of quota reductions was almost totally offset by higher world prices for sugar.

GDP: \$225.6 million, per capita \$1,285; real growth rate 6% (1989 est.)

Inflation rate (consumer prices): 1.5% (1988)

Unemployment rate: 14% (1988 est.)

Economy

Overview: Benin is one of the least developed countries in the world because of limited natural resources and a poorly developed infrastructure. Agriculture accounts for almost 45% of GDP, employs about 60% of the labor force, and generates a major share of foreign exchange earnings. The industrial sector contributes only about 15% to GDP and employs 2% of the work force. Persistently low prices in recent years have limited hard currency earnings from Benin's major exports of agricultural products and crude oil.

GDP: \$1.7 billion, per capita \$335; real growth rate 1.8% (1988)

Inflation rate (consumer prices): 4.3% (1988)

Unemployment: NA

Budget: revenues \$168 million; expenditures \$317 million, including capital expenditures of \$97 million (1989)

Imports: \$413 million (f.o.b., 1988); *commodities*—foodstuffs, beverages, tobacco, petroleum products, intermediate goods, capital goods, light consumer goods; *partners*—France 34%, Netherlands 10%, Japan 7%, Italy 6%, US 5%

External debt: \$1.0 billion (December 1989 est.)

Industrial production: growth rate -0.7% (1988)

Electricity: 28,000 kW capacity; 24 million kWh produced, 5 kWh per capita (1989)

Industries: palm oil and palm kernel oil processing, textiles, beverages, petroleum

Agriculture: small farms produce 90% of agricultural output; production is dominated by food crops—corn, sorghum, cassava, beans, and rice; cash crops include cotton, palm oil, and peanuts; poultry and livestock output has not kept up with consumption

Aid: US commitments, including Ex-Im (FY70-88), \$41 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$1.0 billion; OPEC bilateral aid (1979-89), \$19 million; Communist countries (1970-88), \$101 million

Economy

Overview: The Bolivian economy steadily deteriorated between 1980 and 1985 as La Paz financed growing budget deficits by expanding the money supply and inflation spiraled—peaking at 11,700%. An austere orthodox economic program adopted by newly elected President Paz Estenssoro in 1985, however, succeeded in reducing inflation to between 10% and 20% annually during 1987 and 1989, eventually restart-

ing economic growth. President Paz Zamora has pledged to retain the economic policies of the previous government in order to keep inflation down and continue the growth begun under his predecessor. Nevertheless, Bolivia continues to be one of the poorest countries in Latin America, and it remains vulnerable to price fluctuations for its limited exports—mainly minerals and natural gas. Moreover, for many farmers, who constitute half of the country's work force, the main cash crop is coca, which is sold for cocaine processing.

Economy

Overview: The economy has historically been based on cattle raising and crops. Agriculture today provides a livelihood for over 80% of the population, but produces only about 50% of food needs and contributes a small 5% to GDP. The driving force behind the rapid economic growth of the 1970s and 1980s has been the mining industry. This sector, mostly on the strength of diamonds, has gone from generating 25% of GDP in 1980 to over 50% in 1988. No other sector has experienced such growth, especially not that of the agricultural sector, which is plagued by erratic rainfall and poor soils. The unemployment rate remains a problem at 25%. A scarce resource base limits diversification into labor-intensive industries.

GDP: \$1.87 billion, per capita \$1,600; real growth rate 8.4% (FY88)

Inflation rate (consumer prices): 11.45% (1989)

Unemployment rate: 25% (1987)

Budget: revenues \$1,235 million; expenditures \$1,080 million, including capital expenditures of NA (FY90 est.)

Exports: \$1.3 billion (f.o.b., 1988); *commodities*—diamonds 88%, copper and nickel 5%, meat 4%, cattle, animal products; *partners*—Switzerland, US, UK, other EC-associated members of Southern African Customs Union

Imports: \$1.1 billion (c.i.f., 1988); *commodities*—foodstuffs, vehicles, textiles, petroleum products;

Botswana (continued)

partners—Switzerland, US, UK, other EC-associated members of Southern African Customs Union

External debt: \$700 million (December 1989 est.)

Industrial production: growth rate 16.8% (FY86)

Electricity: 217,000 kW capacity; 630 million kWh produced, 510 kWh per capita (1989)

Industries: livestock processing; mining of diamonds, copper, nickel, coal, salt, soda ash, potash; tourism

Agriculture: accounts for only 5% of GDP; subsistence farming predominates; cattle raising supports 50% of the population; must import large share of food needs

Aid: US commitments, including Ex-Im (FY70-88), \$242 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$1.6 billion; OPEC bilateral aid (1979-89), \$43 million; Communist countries (1970-88), \$24 million

Economy

Overview: The economy, a mixture of private enterprises of all sizes and extensive government intervention, experienced enormous difficulties in the late 1980s, notably declining real growth, runaway inflation, foreign debt obligations of more than \$100 billion, and uncertain economic policy. Government intervention includes trade and investment restrictions, wage/price controls, interest and exchange rate controls, and extensive tariff barriers. Ownership of major industrial facilities is divided among private interests, the government, and multinational companies. Ownership in agriculture likewise is varied, with the government intervening in the politically sensitive issues involving large landowners and the masses of poor peasants. In consultation with the IMF, the Brazilian Government has initiated several programs over the last few years to ameliorate the stagnation and foreign debt problems. None of these has given more than temporary relief. The strategy of the new Collor government is to increase the pace of privatization, encourage foreign trade and investment, and establish a more realistic exchange rate. One long-run strength is the existence of vast natural resources.
GDP: \$377 billion, per capita \$2,500; real growth rate 3% (1989 est.)

Economy

Overview: The economy is a mixture of foreign and domestic entrepreneurship, government regulation and welfare measures, and village tradition. It is almost totally supported by exports of crude oil and natural gas, with revenues from the petroleum sector accounting for more than 70% of GDP. Per capita GDP of \$9,600 is among the highest in the Third World, and substantial income from overseas investment supplements domestic production. The government provides for all medical services and subsidizes food and housing.

Economy

Overview: Growth in the sluggish Bulgarian economy fell to the 2% annual level in the 1980s, and by 1989 Sofia's foreign debt had skyrocketed to \$10 billion—giving a debt service ratio of more than 40% of hard currency earnings. The post-Zhivkov regime faces major problems of renovating an aging industrial plant, keeping abreast of rapidly unfolding technological developments, investing in additional energy capacity (the portion of electric power from nuclear energy reached 37% in 1988), and motivating workers, in part by giving them a share in the earnings of their enterprises. A major decree of January 1989 summarized and extended the government's economic restructuring efforts, which include a partial decentralization of controls over production decisions and foreign trade. The new regime promises more extensive reforms and eventually a market economy. But the ruling group cannot (so far) bring itself to give up ultimate control over economic affairs exercised through the vertical Party/ministerial command structure. Reforms have not led to improved economic performance, in particular the provision of more and better consumer goods. A further blow to the economy was the exodus of 310,000 ethnic Turks in mid-1989, which caused temporary shortages of skilled labor in glassware, aluminum, and other industrial plants and in tobacco fields. GNP: \$51.2 billion, per capita \$5,710; real growth rate -0.1% (1989 est.)

Inflation rate (consumer prices): 12% (1989)

Unemployment rate: NA%

Budget: revenues \$26 billion; expenditures \$28 billion, including capital expenditures of \$NA billion (1988)

Economy

Overview: Burma is one of the poorest countries in Asia, with a per capita GDP of about \$280. The government reports negligible growth for FY88. The nation has been unable to achieve any significant improvement in export earnings because of falling prices for many of its major commodity exports. For rice, traditionally the most important export, the drop in world prices has been accompanied by shrinking markets and a smaller volume of sales. In 1985 teak replaced rice as the largest export and continues to hold this position. The economy is heavily dependent on the agricultural sector, which generates about 40% of GDP and provides employment for more than 65% of the work force.

GDP: \$11.0 billion, per capita \$280; real growth rate 0.2% (FY88 est.)

Inflation rate (consumer prices): 22.6% (FY89 est.)

Unemployment rate: 10.4% in urban areas (FY87)

Burma (continued)

Budget: revenues \$4.9 billion; expenditures \$5.0 billion, including capital expenditures of \$0.7 billion (FY89 est.)

Exports: \$311 million (f.o.b., FY88 est.) *commodities*—teak, rice, oilseed, metals, rubber, gems; *partners*—Southeast Asia, India, China, EC, Africa

Imports: \$536 million (c.i.f., FY88 est.) *commodities*—machinery, transport equipment, chemicals, food products; *partners*—Japan, EC, CEMA, China, South-east Asia

External debt: \$5.6 billion (December 1989 est.)

Industrial production: growth rate -1.5% (FY88)

Electricity: 950,000 kW capacity; 2,900 million kWh produced, 70 kWh per capita (1989)

Industries: agricultural processing; textiles and footwear; wood and wood products; petroleum refining; mining of copper, tin, tungsten, iron; construction materials; pharmaceuticals; fertilizer

Agriculture: accounts for about 40% of GDP (including fish and forestry); self-sufficient in food; principal crops—paddy rice, corn, oilseed, sugarcane, pulses; world's largest stand of hardwood trees; rice and teak account for 55% of export revenues; 1985 fish catch of 644 million metric tons

Illicit drugs: world's largest illicit producer of opium poppy and minor producer of cannabis for the international drug trade; opium production is on the increase as growers respond to the collapse of Rangoon's antinarcotic programs

Aid: US commitments, including Ex-Im (FY70-88), \$158 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$3.8 billion; Communist countries (1970-88), \$424 million

Economy

Overview: A landlocked, resource-poor country in an early stage of economic development, Burundi is predominately agricultural with only a few basic industries. Its economic health is dependent on the coffee crop, which accounts for an average 90% of foreign exchange earnings each year. The ability to pay for imports therefore continues to rest largely on the vagaries of the climate and the international coffee market.

Economy

Overview: Cambodia is a desperately poor country whose economic development has been stymied by deadly political infighting. The economy is based on agriculture and related industries. Over the past decade Cambodia has been slowly recovering from its near destruction by war and political upheaval. It still remains, however, one of the world's poorest countries, with an estimated per capita GDP of about \$130. The food situation is precarious; during the 1980s famine has been averted only through international relief. In 1986 the production level of rice, the staple food crop, was able to meet only 80% of domestic needs. The biggest success of the nation's recovery program

has been in new rubber plantings and in fishing. Industry, other than rice processing, is almost nonexistent. Foreign trade is primarily with the USSR and Vietnam. Statistical data on the economy continues to be sparse and unreliable.

Economy

Overview: Over the past decade the economy has registered a remarkable performance because of the development of an offshore oil industry. Real GDP growth annually averaged 10% from 1978 to 1985. In 1986 Cameroon had one of the highest levels of income per capita in tropical Africa, with oil revenues picking up the slack as growth in other sectors softened. Because of the sharp drop in oil prices, however, the economy is now experiencing serious budgetary difficulties and balance-of-payments disequilibrium. Oil reserves currently being exploited will be depleted in the early 1990s, so ways must be found to boost agricultural and industrial exports in the medium term. The Sixth Cameroon Development Plan (1986-91) stresses balanced development and designates agriculture as the basis of the country's economic future.

Economy

Overview: As an affluent, high-tech industrial society, Canada today closely resembles the US in per capita output, market-oriented economic system, and pattern of production. Since World War II the impressive growth of the manufacturing, mining, and service sectors has transformed the nation from a largely rural economy into one primarily industrial and urban. In the 1980s Canada registered one of the highest rates of growth among the OECD nations, averaging about 4%. With its great natural resources, skilled labor force, and modern capital plant, Canada has excellent economic prospects.

GDP: \$513.6 billion, per capita \$19,600; real growth rate 2.9% (1989 est.)

Inflation rate (consumer prices): 5.0% (1989)

Unemployment rate: 7.5% (1989)

Budget: revenues \$79.2 billion; expenditures \$102.0 billion, including capital expenditures of \$1.8 billion (FY88 est.)

Exports: \$127.2 billion (f.o.b., 1989); *commodities*—newsprint, wood pulp, timber, grain, crude petroleum, natural gas, ferrous and nonferrous ores, motor vehicles; *partners*—US, Japan, UK, FRG, other EC, USSR

Imports: \$116.5 billion (c.i.f., 1989); *commodities*—processed foods, beverages, crude petroleum, chemicals, industrial machinery, motor vehicles, durable consumer goods, electronic computers; *partners*—US, Japan, UK, FRG, other EC, Taiwan, South Korea, Mexico

External debt: \$247 billion (1987)

Industrial production: growth rate 2.3% (1989)

Electricity: 103,746,000 kW capacity; 472,580 million kWh produced, 17,960 kWh per capita (1989)

Industries: processed and unprocessed minerals, food products, wood and paper products, transportation equipment, chemicals, fish products, petroleum and natural gas

Agriculture: accounts for 3% of GDP; one of the world's major producers and exporters of grain (wheat and barley); key source of US agricultural imports; large forest resources cover 35% of total land area; commercial fisheries provide annual catch of 1.5 million metric tons, of which 75% is exported

Illicit drugs: illicit producer of cannabis for the domestic drug market

Aid: donor—ODA and OOF commitments (1970-87), \$2.2 billion

Currency: Canadian dollar (plural—dollars); 1 Canadian dollar (Can\$) = 100 cents

Exchange rates: Canadian dollars (Can\$) per US\$1—1.1714 (January 1990), 1.1840 (1989), 1.2307 (1988), 1.3260 (1987), 1.3895 (1986), 1.3655 (1985)

Economy

Overview: Cape Verde's low per capita GDP reflects a poor natural resource base, a 17-year drought, and a high birth rate. The economy is service oriented, with commerce, transport, and public services accounting for 60% of GDP during the period 1984-86. Although nearly 70% of the population lives in rural areas, agriculture's share of GDP is only 16%; the fishing and manufacturing sectors are 4% each. About 90% of food must be imported. The fishing potential of the islands is not fully exploited (the fish catch—mostly lobster and tuna—came to only 10,000 tons in 1985). Cape Verde annually runs a high trade deficit, financed by remittances from emigrants, cash grants, food aid, and foreign loans. **GDP:** \$158 million, per capita \$494; real growth rate 6.1% (1987)

Inflation rate (consumer prices): 3.8% (1987)

Unemployment rate: 25% (1988)

Budget: revenues \$80 million; expenditures \$87 million, including capital expenditures of \$45 million (1988 est.)

Exports: \$8.9 million (f.o.b., 1987); *commodities*—fish, bananas, salt; *partners*—Portugal, Angola, Algeria, Belgium/Luxembourg, Italy

Imports: \$124 million (c.i.f., 1987); *commodities*—petroleum, foodstuffs, consumer goods, industrial products; *partners*—Portugal, Netherlands, Spain, France, US, FRG

External debt: \$140 million (December 1988)

Cape Verde (continued)

Industrial production: growth rate 0% (1986 est.)
Electricity: 14,000 kW capacity; 18 million kWh produced, 50 kWh per capita (1989)
Industry: fish processing, salt mining, clothing factories, ship repair
Agriculture: accounts for 16% of GDP; largely subsistence farming; bananas are the only export crop; other crops—corn, beans, sweet potatoes, coffee; growth potential of agricultural sector limited by poor soils and limited rainfall; annual food imports required; fish catch provides for both domestic consumption and small exports
Aid: US commitments, including Ex-Im (FY75-88), \$83 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$540 million; OPEC bilateral aid (1979-89), \$12 million; Communist countries (1970-88), \$36 million

Economy

Overview: The Central African Republic (CAR) is one of the poorest countries in Africa, with a per capita income of roughly \$450 in 1988. Subsistence agriculture, including forestry, is the backbone of the economy, with over 70% of the population living in the countryside. In 1988 the agricultural sector generated about 40% of GDP, mining and manufacturing 14%, utilities and construction 4%, and services 41%. Agricultural products accounted for about 60% of export earnings and the diamond industry for 30%. Important constraints to economic development include the CAR's landlocked position, a poor transportation infrastructure, and a weak human resource base. Multilateral and bilateral development assistance plays a major role in providing capital for new investment.

GDP: \$1.27 billion, per capita \$453; real growth rate 2.0% (1988 est.)

Inflation rate (consumer prices): -4.2% (1988 est.)

Unemployment rate: 30% in Bangui (1988 est.)

Budget: revenues \$132 million; current expenditures \$305 million, including capital expenditures of \$NA million (1989 est.)

Exports: \$138 million (f.o.b., 1988 est.); *commodities*—diamonds, cotton, coffee, timber, tobacco; *partners*—France, Belgium, Italy, Japan, US

Imports: \$285 million (c.i.f., 1988 est.); *commodities*—food, textiles, petroleum products, machinery, electrical equipment, motor vehicles, chemicals, pharmaceuticals, consumer goods, industrial products; *partners*—France, other EC, Japan, Algeria, Yugoslavia

External debt: \$660 million (December 1989)

Industrial production: 1.9% (1987 est.)

Electricity: 35,000 kW capacity; 84 million kWh produced, 30 kWh per capita (1989)

Industries: sawmills, breweries, diamond mining, textiles, footwear, assembly of bicycles and motorcycles

Agriculture: accounts for 40% of GDP; self-sufficient in food production except for grain; commercial crops—cotton, coffee, tobacco, timber; food crops—manioc, yams, millet, corn, bananas

Aid: US commitments, including Ex-Im (FY70-88), \$44 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$1.3 billion; OPEC bilateral aid (1979-89), \$6 million; Communist countries (1970-88), \$38 million

Economy

Overview: The climate, geographic location, and lack of infrastructure and natural resources potential make Chad one of the most underdeveloped countries in the world. Its economy is slowly recovering from the ravaging effects of prolonged civil war, conflict with Libya, drought, and food shortages. In 1986 real GDP returned to its 1977 level, with cotton, the major cash crop, accounting for 43% of exports. Over 80% of the work force is employed in subsistence farming and fishing. Industry is based almost entirely on the processing of agricultural products, including cotton, sugarcane, and cattle. Chad is still highly dependent on foreign aid, with its economy in trouble and many regions suffering from shortages.

Economy

Overview: In 1989 the economy grew at the rate of 9.9%, reflecting substantial growth in industry, agriculture, and construction. Copper accounts for nearly 50% of export revenues; Chile's economic well-being thus remains highly dependent on international copper prices. Unemployment and inflation rates have declined from their peaks in 1982 to 5.3% and 21.4%, respectively, in 1989. The major long-term economic problem is how to sustain growth in the face of political uncertainties.

GDP: \$25.3 billion, per capita \$1,970; real growth rate 9.9% (1989)

Inflation rate (consumer prices): 21.4% (1989)

Unemployment rate: 5.3% (1989)

Budget: revenues \$4.9 billion; expenditures \$5.1 billion, including capital expenditures of \$0.6 billion (1986)

Exports: \$7.0 billion (f.o.b., 1988); *commodities*—copper 48%, industrial products 33%, molybdenum, iron ore, wood pulp, fishmeal, fruits; *partners*—EC 34%, US 22%, Japan 10%, Brazil 7%

Imports: \$4.7 billion (f.o.b., 1988); *commodities*—petroleum, wheat, capital goods, spare parts, raw materials; *partners*—EC 23%, US 20%, Japan 10%, Brazil 9%

External debt: \$16.3 billion (December 1989)

Industrial production: growth rate 7.4% (1989)

Electricity: 4,044,000 kW capacity; 17,710 million kWh produced, 1,380 kWh per capita (1989)

Industries: copper, other minerals, food-stuffs, fish processing, iron and steel, wood and wood products

Agriculture: accounts for about 8% of GDP (including fishing and forestry); major exporter of fruit, fish, and timber products; major crops—wheat, corn, grapes, beans, sugar beets, potatoes, deciduous fruit; livestock products—beef, poultry, wool; self-sufficient in most foods; 1986 fish catch of 5.6 million metric tons net agricultural importer

Economy

Overview: Beginning in late 1978 the Chinese leadership has been trying to move the economy from the sluggish Soviet-style centrally planned economy to a more productive and flexible economy with market elements—but still within the framework of monolithic Communist control. To this end the authorities have switched to a system of household responsibility in agriculture in place of the old collectivization, increased the authority of local officials and plant managers in industry, permitted a wide variety of small-scale enterprise in services and light manufacturing, and opened the foreign economic sector to increased trade and joint ventures. The most gratifying result has been a strong spurt in production, particularly in agriculture in the early 1980s. Otherwise, the leadership has often experienced in its hybrid system the worst results of socialism (bureaucracy, lassitude, corruption) and of capitalism (windfall gains and stepped-up inflation). Beijing thus has periodically backtracked, retightening central controls at intervals and thereby undermining the credibility of the reform process. Open inflation and excess demand continue to plague the economy, and political repression, following the crackdown at Tiananmen in mid-1989, has curtailed tourism, foreign aid, and new investment by foreign firms. Popular resistance and changes in central policy have weakened China's population control program, which is essential to the nation's long-term economic viability.

Economy

Overview: Economic activity has slowed gradually since 1986, but growth rates remain high by Latin American standards. Conservative economic policies have encouraged investment and kept inflation and unemployment under 30% and 10%, respectively. The rapid development of oil, coal, and other nontraditional industries over the past four years has helped to offset the decline in coffee prices—Colombia's major export. The collapse of the International Coffee Agreement in the summer of 1989, a troublesome rural insurgency, and drug-related violence dampen prospects for future growth.

GDP: \$35.4 billion, per capita \$1,110; real growth rate 3.7% (1988)

Inflation rate (consumer prices): 27% (1989 est.)

Unemployment rate: 9.0% (1989 est.)

Budget: revenues \$4.39 billion; current expenditures \$3.93 billion, capital expenditures \$1.03 billion (1989 est.)

Exports: \$5.76 billion (f.o.b., 1989 est.);

commodities—coffee 30%, petroleum 24%, coal, bananas, fresh cut flowers; **partners**—US 36%, EC 21%, Japan 5%, Netherlands 4%, Sweden 3%

Imports: \$5.02 billion (c.i.f., 1989 est.);

commodities—industrial equipment, transportation equipment, foodstuffs, chemicals, paper products; **partners**—US 34%, EC 16%, Brazil 4%, Venezuela 3%, Japan 3%

External debt: \$17.5 billion (1989)

Industrial production: growth rate 2.0% (1989 est.)

Electricity: 9,250,000 kW capacity; 35,364 million kWh produced, 1,110 kWh per capita (1989)

Industries: textiles, food processing, oil, clothing and footwear, beverages, chemicals, metal products, cement; mining—gold, coal, emeralds, iron, nickel, silver, salt

Agriculture: accounts for 22% of GDP; crops make up two-thirds and livestock one-third of agricultural output; climate and soils permit a wide variety of crops, such as coffee, rice, tobacco, corn, sugarcane, cocoa beans, oilseeds, vegetables; forest products and shrimp farming are becoming more important

Illicit drugs: major illicit producer of cannabis and coca for the international drug trade; key supplier of marijuana and cocaine to the US and other international drug markets; drug production and trafficking accounts for an estimated 4% of GDP and 28% of foreign exchange earnings

Aid: US commitments, including Ex-Im (FY70-88), \$1.6 billion; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$2.9 billion; Communist countries (1970-88), \$399 million

Economy

Overview: One of the world's poorest countries, Comoros is made up of several islands that have poor transportation links, a young and rapidly increasing population, and few natural resources. The low educational level of the labor force contributes to a low level of economic activity, high unemployment, and a heavy dependence on foreign technical assistance. Agriculture, including fishing and forestry, is the leading sector of the economy. It contributes about 40% to GDP, employs 80% of the labor force, and provides most of the exports. The country is not self-sufficient in food production, and rice, the main staple, accounts for 90% of imports. During the period 1982-86 the industrial sector grew at an annual average rate of 5.3%, but its contribution to GDP was less than 4% in 1986. Despite major investment in the tourist industry, which accounts for about 25% of GDP, growth has stagnated since 1983.

GDP: \$207 million, per capita \$475; real growth rate 0.1% (1988 est.)

Inflation rate (consumer prices): 8.3% (1986)

Unemployment rate: over 16% (1988 est.)

Budget: revenues \$75.2 million; expenditures \$77.9 million, including capital expenditures of \$4.8 million (1988 est.)

Exports: \$12 million (f.o.b., 1987); *commodities*—vanilla, cloves, perfume oil, copra; *partners*—US 53%, France 41%, Africa 4%, FRG 2%

Imports: \$52 million (c.i.f., 1987); *commodities*—rice and other foodstuffs, cement, petroleum products, consumer goods; *partners*—Europe 62% (France 22%, other 40%), Africa 5%, Pakistan, China

External debt: \$238 million (December 1988)

Industrial production: growth rate 3.4% (1988 est.)

Electricity: 16,000 kW capacity; 24 million kWh produced, 55 kWh per capita (1989)

Industries: perfume distillation

Agriculture: accounts for 40% of GDP; most of population works in subsistence

Comoros (continued)

agriculture and fishing; plantations produce cash crops for export—vanilla, cloves, perfume essences, and copra; principal food crops—coconuts, bananas, cassava; world's leading producer of essence of ylang-ylang (for perfumes) and second-largest producer of vanilla; large net food importer

Aid: US commitments, including Ex-Im (FY80-88), \$9 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$371 million; OPEC bilateral aid (1979-89), \$22 million; Communist countries (1970-88), \$18 million

Economy

Overview: Oil has supplanted forestry as the mainstay of the economy, providing about two-thirds of government revenues and exports. In the early 1980s rapidly rising oil revenues enabled Congo to finance large-scale development projects with growth averaging 5% annually, one of the highest rates in Africa. The world decline in oil prices, however, has forced the government to launch an austerity program to cope with declining receipts and mounting foreign debts.

GDP: \$2.2 billion, per capita \$1,000; real growth rate -3% (1988 est.)

Inflation rate (consumer prices): 1.5% (1988)

Unemployment rate: NA%

Economy

Overview: Agriculture provides the economic base. The major export earners are fruit, copra, and clothing. Manufacturing activities are limited to a fruit-processing plant and several clothing factories. Economic development is hindered by the isolation of the islands from foreign markets and a lack of natural resources and good transportation links. A large trade deficit is annually made up for by remittances from emigrants and from foreign aid. Current economic development plans call for exploiting the tourism potential and expanding the fishing industry.

Economy

Overview: In 1988 the economy grew at a 3.8% rate, a drop from the 5.1% of the previous year. Gains in agricultural production (on the strength of good coffee and banana crops) and in construction, were partially offset by declines in the rates of growth for the industry and commerce sectors. In 1988 consumer prices rose by nearly 21% followed by a 10% rise in 1989. Unemployment is officially reported at about 6%, but much underemployment remains. External debt, on a per capita basis, is among the world's highest. **GDP:** \$4.7 billion, per capita \$1,630; real growth rate 3.8% (1988)
Inflation rate (consumer prices): 10% (1989)
Unemployment rate: 5.5% (March 1989)

Budget: revenues \$719 million; expenditures \$808 million, including capital expenditures of \$103 million (1988)
Exports: \$1.3 billion (f.o.b., 1988); *commodities*—coffee, bananas, textiles, sugar; *partners*—US 75%, FRG, Guatemala, Netherlands, UK, Japan
Imports: \$1.4 billion (c.i.f., 1988); *commodities*—petroleum, machinery, consumer durables, chemicals, fertilizer, foodstuffs; *partners*—US 35%, Japan, Guatemala, FRG
External debt: \$4.5 billion (1989)
Industrial production: growth rate 2.1% (1988)
Electricity: 909,000 kW capacity; 2,928 million kWh produced, 990 kWh per capita (1989)
Industries: food processing, textiles and clothing, construction materials, fertilizer
Agriculture: accounts for 20-25% of GDP and 70% of exports; cash commodities—coffee, beef, bananas, sugar; other food crops include corn, rice, beans, potatoes; normally self-sufficient in food except for grain; depletion of forest resources resulting in lower timber output
Illicit drugs: illicit production of cannabis on small scattered plots; transshipment country for cocaine from South America
Aid: US commitments, including Ex-Im (FY70-88), \$1.3 billion; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$706 million; Communist countries (1971-88), \$27 million
Currency: Costa Rican colón (plural—colones); 1 Costa Rican colón (C) = 100 céntimos
Exchange rates: Costa Rican colones (C) per US\$1—84.689 (January 1990), 81.504 (1989), 75.805 (1988), 62.776 (1987), 55.986 (1986), 50.453 (1985)

Economy

Overview: The Soviet-style economy, centrally planned and largely state owned, is highly dependent on the agricultural sector and foreign trade. Sugar provides about 75% of export revenues and is mostly exported to the USSR and other CEMA countries. The economy has stagnated since 1985 under a program that has deemphasized material incentives in the workplace, abolished farmers' informal produce markets, and raised prices of government-supplied goods and services. Castro has complained that the ongoing CEMA reform process has interfered with the regular flow of goods to Cuba. Recently the government has been trying to increase trade with Latin America and China. Cuba has had difficulty servicing its foreign debt since 1982. The government currently is encouraging foreign investment in tourist facilities. Other investment priorities include sugar, basic foods, and nickel. The annual \$4 billion Soviet subsidy, a main prop to Cuba's threadbare

economy, may be cut in view of the USSR's mounting economic problems.
GNP: \$20.9 billion, per capita \$2,000; real growth rate —1% (1989 est.)
Inflation rate (consumer prices): NA%
Unemployment: 6% overall, 10% for women (1989)

Economy

Overview: These data are for the area controlled by the Republic of Cyprus (information on the northern Turkish-Cypriot area is sparse). The economy is small, diversified, and prosperous. Industry contributes about 28% to GDP and employs 35% of the labor force, while the service sector contributes about 55% to GDP and employs 40% of the labor force. Rapid growth in exports of agricultural and manufactured products and in tourism have played important roles in the average 6% rise in GDP in recent years. While this growth put considerable pressure on prices and the balance of payments, the inflation rate has remained low and the balance-of-payments deficit manageable. **GDP:** \$4.2 billion, per capita \$6,100; real growth rate 6.9% (1988 est.)

Inflation rate (consumer prices): 3.9% (1989 est.)

Unemployment rate: 2.8% (1988)

Budget: revenues \$1.2 billion; expenditures \$1.4 billion, including capital expenditures of \$178 million (1989 est.)

Exports: \$767 million (f.o.b., 1988); *commodities*—citrus, potatoes, grapes, wine, cement, clothing and shoes; *partners*—Middle East and North Africa 37%, UK 27%, other EC 11%, US 2%

Imports: \$1.9 billion (c.i.f., 1988); *commodities*—consumer goods 23%, petroleum and lubricants 12%, food and feed grains, machinery; *partners*—EC 60%, Middle East and North Africa 7%, US 4%

External debt: \$2.8 billion (1988)

Industrial production: growth rate 6.5% (1988)

Electricity: 620,000 kW capacity; 1,770 million kWh produced, 2,530 kWh per capita (1989)

Industries: mining (iron pyrites, gypsum, asbestos); manufactured products—beverages, footwear, clothing, and cement—are principally for local consumption

Agriculture: accounts for 8% of GDP and employs 22% of labor force; major crops—potatoes, vegetables, barley, grapes, olives, and citrus fruits; vegetables and fruit provide 25% of export revenues

Aid: US commitments, including Ex-Im (FY70-88), \$272 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$223 million; OPEC bilateral aid (1979-89), \$62 million; Communist countries (1970-88), \$24 million

Currency: Cypriot pound (plural—pounds) and in Turkish area, Turkish lira (plural—liras); 1 Cypriot pound (£C) = 100 cents and 1 Turkish lira (TL) = 100 kuruş

Exchange rates: Cypriot pounds (£C) per US\$1—0.4854 (January 1990), 0.4933 (1989), 0.4663 (1988), 0.4807 (1987), 0.5167 (1986), 0.6095 (1985); in Turkish area, Turkish liras (TL) per US\$1—2,314.7 (November 1989), 1,422.3 (1988), 857.2 (1987), 674.5 (1986), 522.0 (1985)

Economy

Overview: Czechoslovakia is highly industrialized and has a well-educated and skilled labor force. Its industry, transport, energy sources, banking, and most other means of production are state owned. The country is deficient, however, in energy and many raw materials. Moreover, its aging capital plant lags well behind West European standards. Industry contributes over 50% to GNP and construction 10%. About 95% of agricultural land is in collectives or state farms. The centrally planned economy has been tightly linked

in trade (80%) to the USSR and Eastern Europe. Growth has been sluggish, averaging less than 2% in the period 1982-89. GNP per capita ranks next to the GDR as the highest in the Communist countries. As in the rest of Eastern Europe, the sweeping political changes of 1989 have been disrupting normal channels of supply and compounding the government's economic problems. Czechoslovakia is beginning the difficult transition from a command to a market economy.

GNP: \$123.2 billion, per capita \$7,878; real growth rate 1.0% (1989 est.)

Inflation rate (consumer prices): 1.5% (1989)

Economy

Overview: This modern economy features high-tech agriculture, up-to-date small-scale and corporate industry, extensive government welfare measures, comfortable living standards, and high dependence on foreign trade. Growth in output, however, has been sluggish in 1987-89, and unemployment in early 1989 stood at 9.6% of the labor force. The government is trying to revitalize growth in preparation for the economic integration of Europe in 1992. **GDP:** \$73.7 billion, per capita \$14,300; real growth rate 1.4% (1989 est.)

Economy

Overview: The economy is based on service activities connected with the country's strategic location and status as a free trade zone. Djibouti provides services as both a transit port for the region and an international transshipment and refueling center. It has few natural resources and little industry. The nation is, therefore, heavily dependent on foreign assistance to help support its balance of payments and to finance development projects. An unemployment rate of over 50% continues to be a major problem.

GNP: \$333 million, \$1,070 per capita; real growth rate -0.7% (1986)

Inflation rate (consumer prices): 8.0% (1987)

Unemployment rate: over 50% (1987)

Exports: \$128 million (f.o.b., 1986); *commodities*—hides and skins, coffee (in transit); *partners*—Middle East 50%, Africa 43%, Western Europe 7%

Imports: \$198 million (f.o.b., 1986); *commodities*—foods, beverages, transport equipment, chemicals, petroleum products; *partners*—EC 36%, Africa 21%, Bahrain 14%, Asia 12%, US 2%

External debt: \$250 million (December 1988)

Industrial production: growth rate -1.6% (1986)

Electricity: 110,000 kW capacity; 190 million kWh produced, 580 kWh per capita (1989)

Industries: limited to a few small-scale enterprises, such as dairy products and mineral-water bottling

Agriculture: accounts for 30% of GDP; scanty rainfall limits crop production to mostly fruit and vegetables; half of population pastoral nomads herding goats, sheep, and camels; imports bulk of food needs

Aid: US commitments, including Ex-Im (FY78-88), \$36 million; Western (non-US) countries, including ODA and OOF bilateral commitments (1970-87), \$962 million; OPEC bilateral aid (1979-89), \$149 million; Communist countries (1970-88), \$35 million

Economy

Overview: The economy is dependent on agriculture and thus is highly vulnerable to climatic conditions. Agriculture accounts for about 30% of GDP and employs 40% of the labor force. Principal products include bananas, coconuts, citrus, and root crops. In 1988 the economy achieved a 5.6% growth in real GDP on the strength of a boost in construction, higher agricultural production, and growth of the small manufacturing sector based on soap and garment industries. The tourist industry remains undeveloped because of a rugged coastline and the lack of an international-class airport.
GDP: \$137 million, per capita \$1,408; real growth rate 5.6% (1988 est.)
Inflation rate (consumer prices): 4.9% (1987)
Unemployment rate: 10% (1989 est.)
Budget: revenues \$60 million; expenditures \$52 million, including capital expenditures of \$18 million (FY88)
Exports: \$46 million (f.o.b., 1987); *commodities*—bananas, coconuts, grapefruit, soap, galvanized sheets; *partners*—UK 72%, Jamaica 10%, OECS 6%, US 3%, other 9%
Imports: \$66.0 million (c.i.f., 1987); *commodities*—food, oils and fats, chemicals, fuels and lubricants, manufactured goods, machinery and equipment; *partners*—US 23%, UK 18%, CARICOM 15%, OECS 15%, Japan 5%, Canada 3%, other 21%
External debt: \$63.6 million (December 1987)
Industrial production: growth rate 5.9% in manufacturing (1987)
Electricity: 7,000 kW capacity; 16 million kWh produced, 190 kWh per capita (1989)
Industries: agricultural processing, tourism, soap and other coconut-based products, cigars, pumice mining
Agriculture: accounts for 30% of GDP; principal crops—bananas, citrus fruit, coconuts, root crops; bananas provide the bulk of export earnings; forestry and fisheries potential not exploited

Economy

Overview: The economy is largely dependent on the agricultural sector, which employs 50% of the labor force and provides about half of export revenues. The principal commercial crop is sugarcane, followed by coffee, cocoa, and tobacco. Industry is based on the processing of agricultural products, durable consumer goods, minerals, and chemicals. Rapid growth of free trade zones has established a significant expansion of manufacturing for export, especially wearing apparel. Over the past decade tourism has also increased in importance and is a significant earner of foreign exchange and a source of new jobs. Unemployment is officially reported at about 25%, but underemployment may be much higher.

Ecuador (continued)

Flag: three horizontal bands of yellow (top, double width), blue, and red with the coat of arms superimposed at the center of the flag; similar to the flag of Colombia which is shorter and does not bear a coat of arms

Economy

Overview: Ecuador continues to recover from a 1986 drop in international oil prices and a major earthquake in 1987 that interrupted oil exports for six months and forced Ecuador to suspend foreign debt payments. In 1988-89 oil exports recovered—accounting for nearly half of Ecuador's total export revenues—and Quito resumed full interest payments on its official debt, and partial payments on its commercial debt. The Borja administration has pursued austere economic policies that have helped reduce inflation and restore international reserves. Ecuador was granted an IMF standby agreement worth \$135 million in 1989, and Quito will seek to reschedule its foreign commercial debt in 1990.

GDP: \$9.8 billion, per capita \$935; real growth rate 0.5% (1989)

Economy

Overview: Egypt has one of the largest public sectors of all the Third World economies, most industrial plants being owned by the government. Overregulation holds back technical modernization and foreign investment. Even so, the economy grew rapidly during the late 1970s and early 1980s, but in 1986 the collapse of world oil prices and an increasingly heavy burden of debt servicing led Egypt to begin negotiations with the IMF for balance-of-payments support. As part of the 1987 agreement with the IMF, the government agreed to institute a reform program to reduce inflation, promote economic growth, and improve its external position. The reforms have been slow in coming, however, and the economy has been largely stagnant for the past three years. With 1 million people being added every eight months to Egypt's population, urban growth exerts enormous pressure on the 5% of the total land area available for agriculture.
GDP: \$38.3 billion, per capita \$700; real growth rate 1.0% (1989 est.)
Inflation rate (consumer prices): 25% (1989 est.)
Unemployment rate: 15% (1989 est.)
Budget: revenues \$7 billion; expenditures \$11.5 billion, including capital expenditures of \$4 billion (FY89 est.)
Exports: \$2.55 billion (f.o.b., 1989); *commodities*—raw cotton, crude and refined petroleum, cotton yarn, textiles; *partners*—US, EC, Japan, Eastern Europe
Imports: \$10.1 billion (c.i.f., 1988); *commodities*—foods, machinery and equipment, fertilizers, wood products, durable consumer goods, capital goods; *partners*—US, EC, Japan, Eastern Europe
External debt: \$45 billion (December 1989)

Egypt (continued)

Economy

Overview: The economy experienced a modest recovery during the period 1983-86, after a sharp decline in the early 1980s. Real GDP grew by 1.5% a year on the strength of value added by the manufacturing and service sectors. In 1987 the economy expanded by 2.5% as agricultural output recovered from the 1986 drought. The agricultural sector accounts for 25% of GDP, employs about 40% of the labor force, and contributes about 66% to total exports. Coffee is the major commercial crop, contributing 60% to export earnings. The manufacturing sector, based largely on food and beverage processing, accounts for 17% of GDP and 16% of employment. Economic losses due to guerrilla sabotage total more than \$2.0

Total area: 1,221,900 km²; land area: 1,101,000 km²

Comparative area: slightly less than twice the size of Texas

Land boundaries: 5,141 km total; Djibouti 459 km, Kenya 861 km, Somalia 1,600 km, Sudan 2,221 km

Coastline: 1,094 km

Maritime claims:

Territorial sea: 12 nm

Disputes: southern half of the boundary with Somalia is a Provisional Administrative Line; possible claim by Somalia based on unification of ethnic Somalis; territorial dispute with Somalia over the Ogaden; separatist movement in Eritrea; antigovernment insurgencies in Tigray and other areas

Climate: tropical monsoon with wide topographic-induced variation; prone to extended droughts

Terrain: high plateau with central mountain range divided by Great Rift Valley

Natural resources: small reserves of gold, platinum, copper, potash

Land use: 12% arable land; 1% permanent crops; 41% meadows and pastures; 24% forest and woodland; 22% other; includes NEGL% irrigated

Environment: geologically active Great Rift Valley susceptible to earthquakes, volcanic eruptions; deforestation; overgrazing; soil erosion; desertification; frequent droughts; famine

Note: strategic geopolitical position along world's busiest shipping lanes and close to Arabian oilfields; major resettlement project ongoing in rural areas will significantly alter population distribution and settlement patterns over the next several decades

Flag: three equal horizontal bands of green (top), yellow, and red; Ethiopia is the oldest independent country in Africa and the colors of her flag were so often adopted by other African countries upon independence that they became known as the pan-African colors

Economy

Overview: Ethiopia is one of the poorest and least developed countries in Africa. Its economy is based on subsistence agriculture, which accounts for about 45% of GDP, 90% of exports, and 80% of total employment; coffee generates over 60% of export earnings. The manufacturing sector is heavily dependent on inputs from the agricultural sector. The economy is centrally planned, and over 90% of large-scale industry is state run. Favorable agricultural weather largely explains the 4.5% growth in output in FY89.

GDP: \$6.6 billion, per capita \$130, real growth rate 4.5% (FY89 est.)

Inflation rate (consumer prices): 9.6% (FY89)

Unemployment rate: NA; shortage of skilled manpower

Budget: revenues \$1.4 billion; expenditures \$1.9 billion, including capital expenditures of \$0.7 billion (FY87)

Exports: \$418 million (f.o.b., FY88); *commodities*—coffee 60%, hides; *partners*—US, FRG, Djibouti, Japan, PDRY, France, Italy

Imports: \$1.1 billion (c.i.f., FY88), *commodities*—food, fuels, capital goods; *partners*—USSR, Italy, FRG, Japan, UK, US, France

External debt: \$2.6 billion (1988)

Industrial production: growth rate -0.2% (FY88 est.)

Electricity: 330,000 kW capacity; 700 million kWh produced, 14 kWh per capita (1989)

Industries: cement, textiles, food processing, oil refinery

Agriculture: accounts for 45% of GDP and is the most important sector of the economy even though frequent droughts, poor cultivation practices, and state economic policies keep farm output low; famines not uncommon; export crops of coffee and oilseeds grown partly on state farms; estimated 50% of agricultural production at subsistence level; principal crops and livestock—cereals, pulses, coffee, oilseeds, potatoes, sugarcane, vegetables, hides and skins, cattle, sheep, goats

Aid: US commitments, including Ex-Im (FY70-88), \$471 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$2.6 billion;

OPEC bilateral aid (1979-89), \$8 million; Communist countries (1970-88), \$2.0 billion

Economy

Overview: The economy is based on sheep farming, which directly or indirectly employs most of the work force. A few dairy herds are kept to meet domestic consump-

tion of milk and milk products, and crops grown are primarily those for providing winter fodder. Major sources of income are from the export of high-grade wool to the UK and the sale of stamps and coins. Rich stocks of fish in the surrounding waters are not presently exploited by the islanders, but development plans called for the islands to have six trawlers by 1989. In 1987 the government began to sell fishing licenses to foreign trawlers operating within the Falklands exclusive fishing zone. These license fees amount to more than \$25 million per year. To encourage tourism, the Falkland Islands Development Corporation has built three lodges for visitors who are attracted by the abundant wildlife and trout fishing. Economy

Overview: The Faroese enjoy the high standard of living characteristic of the Danish and other Scandinavian economies. Fishing is the dominant economic activity. It employs over 25% of the labor force, accounts for about 25% of GDP, and contributes over 80% to export revenues. A handicraft industry employs about 20% of the labor force. Because of cool summers agricultural activities are limited to raising sheep and to potato and vegetable cultivation. There is a labor shortage, and immigrant workers accounted for 5% of the work force in 1989. Denmark annually subsidizes the economy, perhaps on the order of 15% of GDP.

GDP: \$662 million, per capita \$14,000; real growth rate 3% (1989 est.)

Economy

Overview: Fiji's economy is primarily agricultural, with a large subsistence sector. Sugar exports are a major source of foreign exchange and sugar processing accounts for one-third of industrial output. Industry, including sugar milling, contributes 10% to GDP. Fiji traditionally earned considerable sums of hard currency from the 250,000 tourists who visited each year. In 1987, however, after two military coups, the economy went into decline. GDP dropped by 7.8% in 1987 and by another 2.5% in 1988; political uncertainty created a drop in tourism, and the worst drought of the century caused sugar production to fall sharply. In contrast, sugar and tourism turned in strong performances in 1989, and the economy rebounded vigorously.

GDP: \$1.32 billion, per capita \$1,750; real growth rate 12.5% (1989 est.)

Economy

Overview: Finland has a highly industrialized, largely free market economy, with per capita output nearly three-fourths the US figure. Its main economic force is the manufacturing sector—principally the wood, metals, and engineering industries. Trade is important, with the export of goods representing about 25% of GNP. Except for timber and several minerals, Finland depends on imported raw materials, energy, and some components of manufactured goods. Because of the climate, agricultural development is limited to maintaining self-sufficiency in basic commodities. Economic prospects are generally bright, the main shadow being the increasing pressures on wages and prices.
GDP: \$74.4 billion, per capita \$15,000; real growth rate 4.6% (1989 est.)
Inflation rate (consumer prices): 6.5% (1989)
Unemployment rate: 3.4% (1989)
Budget: revenues \$28.3 billion; expenditures \$28.1 billion, including capital expenditures of \$NA billion (1988 est.)
Exports: \$22.2 billion (f.o.b., 1988); *commodities*—timber, paper and pulp, ships, machinery, clothing and footwear; *partners*—EC 44.2% (UK 13.0%, FRG 10.8%), USSR 14.9%, Sweden 14.1%, US 5.8%
Imports: \$22.0 billion (c.i.f., 1988); *commodities*—foodstuffs, petroleum and petroleum products, chemicals, transport equipment, iron and steel, machinery, textile yarn and fabrics, fodder grains; *partners*—EC 43.5% (FRG 16.9%, UK 6.8%), Sweden 13.3%, USSR 12.1%, US 6.3%
External debt: \$5.3 billion (1989)
Industrial production: growth rate 4.3% (1989)
Electricity: 13,324,000 kW capacity; 49,330 million kWh produced, 9,940 kWh per capita (1989)
Industries: metal manufacturing and shipbuilding, forestry and wood processing (pulp, paper), copper refining, foodstuffs, textiles, clothing
Agriculture: accounts for 8% of GNP (including forestry); livestock production, especially dairy cattle, predominates; forestry is an important export earner and a secondary occupation for the rural population; main crops—cereals, sugar beets, potatoes; 85% self-sufficient, but short of food and fodder grains; annual fish catch about 160,000 metric tons
Aid: donor—ODA and OOF commitments (1970-87), \$1.7 billion
Currency: markka (plural—markkaa); 1 markka (FMk) or Finmark = 100 penniä
Exchange rates: markkaa (FMk) per US\$1—4.0022 (January 1990), 4.2912

Economy

Overview: One of the world's most developed economies, France has substantial agricultural resources and a highly diversified modern industrial sector. Large tracts of fertile land, the application of modern technology, and subsidies have combined to make it the leading agricultural producer in Western Europe. France is largely self-sufficient in agricultural products and is a major exporter of wheat and dairy products. The industrial sector generates about one-third of GDP and employs about one-third of the work force. During the period 1982-86 economic growth was sluggish, averaging only 1.4% annually. This trend was reversed by late 1987, however, with a strong expansion of consumer demand, followed by a surge in investment. The economy has had difficulty generating enough jobs for new entrants into the labor force, resulting in a high unemployment rate, but the upward trend in growth recently pushed the jobless rate below 10%. The steadily advancing economic integration within the Euro-

pean Community is a major force affecting the fortunes of the various economic sectors.

GDP: \$819.6 billion, per capita \$14,600; real growth rate 3.4% (1989 est.)

Inflation rate (consumer prices): 3.5% (1989 est.)

Unemployment rate: 9.7% (1989 est.)

Budget: revenues \$197.0 billion; expenditures \$213.4 billion, including capital expenditures of \$NA (1989 est.)

Exports: \$183.1 billion (f.o.b., 1989 est.); *commodities*—machinery and transportation equipment, chemicals, foodstuffs, agricultural products, iron and steel products, textiles and clothing; *partners*—FRG 15.8%, Italy 12.2%, UK 9.8%, Belgium-Luxembourg 8.9%, Netherlands 8.7%, US 6.7%, Spain 5.6%, Japan 1.8%, USSR 1.3% (1989 est.)

Imports: \$194.5 billion (c.i.f., 1989 est.); *commodities*—crude oil, machinery and equipment, agricultural products, chemicals, iron and steel products; *partners*—FRG 19.4%, Italy 11.5%, Belgium-Luxembourg 9.2%, US 7.7%, UK 7.2%, Netherlands 5.2%, Spain 4.4%, Japan 4.1%, USSR 2.1% (1989 est.)

External debt: \$59.3 billion (December 1987)

Industrial production: growth rate 4.4% (1989 est.)

Economy

Overview: The economy is tied closely to that of France through subsidies and imports. Besides the French space center at Kourou, fishing and forestry are the most important economic activities, with exports of fish and fish products (mostly shrimp) accounting for about two-thirds of total revenue in 1985. The large reserves of tropical hardwoods, not fully exploited, support an expanding sawmill industry that provides sawn logs for export. Cultivation of crops—rice, cassava, bananas, and sugarcane—are limited to the coastal area, where the population is largely concentrated. French Guiana is heavily dependent on imports of food and energy. Unemployment is a serious problem, particularly among younger workers, with an unemployment rate of 15%.

GDP: \$210 million, per capita \$3,230; real growth rate NA% (1982)

Inflation rate (consumer prices): 4.1% (1987)

Economy

Overview: The economy, dependent on timber and manganese until the early 1970s, is now dominated by the oil sector. During the period 1981-85 oil accounted for about 46% of GDP, 83% of export earnings, and 65% of government revenues on average. The high oil prices of the early 1980s contributed to a substantial increase in per capita income, stimulated domestic demand, reinforced migration from rural to urban areas, and raised the level of real wages to among the highest in Sub-Saharan Africa. The three-year slide of Gabon's economy, which began with falling oil prices in 1985, stabilized in 1989 because of a near doubling of oil prices over their 1988 lows. The agricultural and industrial sectors are relatively underdeveloped, accounting for only 8% and 10%, respectively, of GDP in 1986. **GDP:** \$3.2 billion, per capita \$3,200; real growth rate 0% (1989)

Inflation rate (consumer prices): 3% (1989)

Unemployment rate: NA%

Budget: revenues \$927 million; expenditures \$1.2 billion, including capital expenditures of \$33 million (1988)

Exports: \$1.14 billion (f.o.b., 1989 est.); *commodities*—crude oil 70%, manganese 11%, wood 12%, uranium 6%; *partners*—France 53%, US 22%, FRG, Japan

Imports: \$0.76 billion (c.i.f., 1989); *commodities*—foodstuffs, chemical products, petroleum products, construction materials, manufactures, machinery; *partners*—France 48%, US 2.6%, FRG, Japan, UK
External debt: \$2.0 billion (October 1989)
Industrial production: growth rate 1.7% (1986)

Electricity: 310,000 kW capacity; 980 million kWh produced, 920 kWh per capita (1989)

Industries: sawmills, petroleum, food and beverages; mining of increasing importance (especially manganese and uranium)
Agriculture: accounts for 8% of GDP (including fishing and forestry); cash crops—cocoa, coffee, palm oil; livestock not developed; importer of food; small fishing operations provide a catch of about 20,000 metric tons; okoume (a tropical softwood) is the most important timber product

Aid: US commitments, including Ex-Im (FY70-88), \$64 million; Western (non-US) countries, ODA and OOF bilateral com-

mitments (1970-87), \$1.7 billion; Communist countries (1970-88), \$27 million

Economy

Overview: The Gambia has no important mineral or other natural resources and has a limited agricultural base. It is one of the world's poorest countries with a per capita income of about \$250. About 75% of the population is engaged in crop production and livestock raising, which contributes about 30% to GDP. Small-scale manufacturing activity—processing peanuts, fish, and hides—accounts for less than 10% of GDP. Tourism is a growing industry. The Gambia imports about 33% of its food, all fuel, and most manufactured goods. Exports are concentrated on peanut products (over 75% of total value).

GDP: \$195 million, per capita \$250; real growth rate 4.6% (FY89 est.)

Inflation rate (consumer prices): 8.0% (FY89 est.)

Unemployment rate: NA%

Budget: revenues \$75 million; expenditures \$67 million, including capital expenditures of \$21 million (FY89)

Exports: \$133 million (f.o.b., FY89); *commodities*—peanuts and peanut products, fish, cotton lint, palm kernels; *partners*—Ghana 49%, Europe 27%, Japan 12%, US 1% (1986)

Imports: \$105 million (c.i.f., FY89); *commodities*—foodstuffs, manufactures, raw materials, fuel, machinery and transport equipment; *partners*—Europe 55% (EC 39%, other 16%), Asia 20%, US 11%, Senegal 4% (1986)

External debt: \$330 million (December 1989 est.)

Industrial production: growth rate 7.3% (FY88)

Electricity: 29,000 kW capacity; 64 million kWh produced, 80 kWh per capita (1989)

Industries: peanut processing, tourism, beverages, agricultural machinery assembly, woodworking, metalworking, clothing
Agriculture: accounts for 30% of GDP and employs about 75% of the population; imports one-third of food requirements; major export crop is peanuts; the principal crops—millet, sorghum, rice, corn, cassava, palm kernels; livestock—cattle, sheep, and goats; forestry and fishing resources not fully exploited

Gaza Strip

Note: The war between Israel and the Arab states in June 1967 ended with Israel in control of the West Bank and the Gaza Strip, the Sinai, and the Golan Heights. As stated in the 1978 Camp David Accords and reaffirmed by President Reagan's 1 September 1982 peace initiative, the final status of the West Bank and the Gaza Strip, their relationship with their neighbors, and a peace treaty between Israel and Jordan are to be negotiated among the concerned parties. Camp David further specifies that these negotiations will resolve the respective boundaries. Pending the completion of this process, it is US policy that the final status of the West Bank and the Gaza Strip has yet to be determined. In the view of the US, the term West Bank describes all of the area west of the Jordan under Jordanian administration before the 1967 Arab-Israeli war. With respect to negotiations envisaged in the framework agreement, however, it is US policy that a distinction must be made between Jerusalem and the rest of the West Bank because of the city's special status and circumstances. Therefore, a negotiated solution for the final status of Jerusalem could be different in character from that of the rest of the West Bank.

Note: The Gaza Strip is currently governed by Israeli military authorities and Israeli civil administration. It is US policy that the final status of the Gaza Strip will be determined by negotiations among the concerned parties. These negotiations will determine how this area is to be governed.

Economy

Overview: Nearly half of the labor force of the Gaza Strip is employed across the border by Israeli industrial, construction, and agricultural enterprises, with worker transfer funds accounting for 40% of GNP in 1989. The once dominant agricultural sector now contributes only 13% to GNP, about the same as that of the construction sector, and industry accounts for 7%. Gaza depends upon Israel for 90% of its imports and as a market for 80% of its

similar to the flag of the FRG which does not have a coat of arms

Economy

Overview: The GDR is moving rapidly away from its centrally planned economy. As the 1990s begin, economic integration with West Germany appears inevitable, beginning with the establishment of a common currency. The opening of the border with the FRG in late 1989 and the continuing emigration of hundreds of thousands of skilled workers had brought growth to a standstill by yearend 1989. Features of the old economic regime that will quickly change: (a) the collectivization of 95% of East German farms; (b) state ownership of nearly all transportation facilities, industrial plants, foreign trade organizations, and financial institutions; (c) the 65% share in trade of the USSR and other CEMA countries; and (d) the detailed control over economic details exercised by Party and state. Once integrated into the thriving West German economy, the area will have to stem the outflow of workers and renovate the obsolescent industrial base. After an initial readjustment period, living standards and quality of output will steadily rise toward West German levels.

Economy

Overview: West Germany, a major economic power and a leading exporter, has a highly urbanized and skilled population that enjoys excellent living standards and comprehensive social welfare benefits. The FRG is poor in natural resources, coal being the most important mineral. The FRG's comparative advantage lies in the technologically advanced production stages. Thus manufacturing and services dominate economic activity, and raw materials and semimanufactures constitute a large proportion of imports. In 1988 manufacturing accounted for 35% of GDP,

Germany, Federal Republic of (West Germany) *(continued)*

with other sectors contributing lesser amounts. The major economic problem in 1989 is persistent unemployment of over 8%. The FRG is well poised to take advantage of the increasing economic integration of the European Community. The dramatic opening of the boundary with East Germany in late 1989 poses new economic challenges that could tax even this powerful economy.

Economy

Overview: Supported by substantial international assistance, Ghana has been implementing a steady economic rebuilding program since 1983. Good harvests in 1988 featured the 6% growth in GNP. Moves toward privatization and relaxation of government controls continued in 1988-89, although at a slower-than-expected pace. In 1988 service on the \$2.8 billion debt was equivalent to 75% of export earnings. As Ghana obtains concessional loans and pays off high-interest debt, however, debt service is expected to fall below 30% of export earnings in the early 1990s. The economic rebuilding program has both helped and harmed the manufacturing sector, for example, by improving the supply of raw materials and by increasing competition from imports. The long-term outlook is favorable provided that the political structure can endure the slow pace at which living standards are improving and can manage the problems stemming from excessive population growth. GNP: \$5.2 billion, per capita \$400; real growth rate 6% (1988)

Inflation rate (consumer prices): 32.7% (1988)

Unemployment rate: 26% (April 1987)

Budget: revenues \$769 million; expenditures \$749 million, including capital expenditures of \$179 million (1988 est.)

Exports: \$977 million (f.o.b., 1987); *commodities*—cocoa 60%, timber, gold, tuna, bauxite, and aluminum; *partners*—US 23%, UK, other EC

Imports: \$988 million (c.i.f., 1987); *commodities*—petroleum 16%, consumer goods, foods, intermediate goods, capital equipment; *partners*—US 10%, UK, FRG, France, Japan, South Korea, GDR

External debt: \$3.0 billion (December 1989 est.)

Industrial production: growth rate 0.5% in manufacturing (1987)

Electricity: 1,172,000 kW capacity; 4,110 million kWh produced, 280 kWh per capita (1989)

Ghana (continued)

Industries: mining, lumbering, light manufacturing, fishing, aluminum, food processing

Agriculture: accounts for more than 50% of GDP (including fishing and forestry); the major cash crop is cocoa; other principal crops—rice, coffee, cassava, peanuts, corn, shea nuts, timber; normally self-sufficient in food

Illicit drugs: illicit producer of cannabis for the international drug trade

Economy

Overview: Greece has a mixed capitalistic economy with the basic entrepreneurial system overlaid in 1981-89 by a socialist-left-government that enlarged the public sector and became the nation's largest employer. Like many other Western economies, Greece suffered severely from the global oil price hikes of the 1970s, annual GDP growth plunging from 8% to 2% in

the 1980s, and inflation, unemployment, and budget deficits rising sharply. The fall of the socialist government in 1989 and the inability of the conservative opposition to muster a clear majority have led to business uncertainty and the continued prospects for lackluster economic performance. Once the political situation is sorted out, Greece will have to face the challenges posed by the steadily increasing integration of the European Community, including the progressive lowering of tariff barriers. Tourism continues as a major industry, providing a vital offset to the sizable commodity trade deficit.

Economy

Overview: Over the past 25 years, the economy has changed from one based on subsistence whaling, hunting, and fishing to one dependent on foreign trade. Fishing is still the most important industry, accounting for over two-thirds of exports and about 25% of the population's income. Exploitation of mineral resources is limited to lead and zinc. Maintenance of a social welfare system similar to Denmark's has given the public sector a dominant role in the economy. Greenland is heavily dependent on an annual subsidy of about \$400 million from the Danish Government.

Economy

Overview: The economy is essentially agricultural and centers on the traditional production of spices and tropical plants. Agriculture accounts for about 20% of GDP and 90% of exports and employs 24% of the labor force. Tourism is the leading foreign exchange earner, followed by agricultural exports. Manufacturing remains relatively undeveloped, but with a more favorable private investment climate since 1983, it is expected to grow. Despite an impressive average annual growth rate for the economy of 5.5% during the period 1984-88, unemployment remains high at about 26%.

Economy

Overview: The economy depends on agriculture, tourism, light industry, and services. It is also dependent upon France for large subsidies and income and social transfers. Tourism is a key industry, with most tourists from the US. In addition, an increasingly large number of cruise ships visit the islands. The traditionally important sugarcane crop is slowly being replaced by other crops, such as bananas (which now supply about 50% of export earnings), eggplant, and flowers. Other vegetables and root crops are cultivated for local consumption, although Guadeloupe is still dependent on imported food, which comes mainly from France. Light industry consists mostly of sugar and rum production. Most manufactured goods and fuel are imported. Unemployment is especially high among the young.

Economy

Overview: The economy is based on US military spending and on revenues from tourism. Over the past 20 years the tourist industry has grown rapidly, creating a construction boom for new hotels and the expansion of older ones. Visitors numbered about 800,000 in 1989. The small manufacturing sector includes textile and clothing, beverage, food, and watch production. About 58% of the labor force works for the private sector and the rest for government. Most food and industrial goods are imported, with about 75% from the US. In 1989 the unemployment rate was about 3%, down from 10% in 1983.

Economy

Overview: Guinea-Bissau ranks among the poorest countries in the world, with a per capita GDP below \$200. Agriculture and fishing are the main economic activities, with cashew nuts, peanuts, and palm kernels the primary exports. Exploitation of known mineral deposits is unlikely at present because of a weak infrastructure and the high cost of development. The government's four-year plan (1988-91) has targeted agricultural development as the top priority.

GDP: \$152 million, per capita \$160 (1988); real growth rate 5.6% (1987)

Economy

Overview: After growing on average at less than 1% a year in 1984-87, GDP dropped by 3% in 1988, the result of bad weather, labor trouble in the canefields, and flooding and equipment problems in the bauxite industry. Consumer prices rose about 35%, and the current account deficit widened substantially as sugar and bauxite exports fell. Moreover, electric power is in short supply and constitutes a major barrier to future gains in national output. The government, in association with inter-

Guyana (continued)

national financial agencies, seeks to reduce its payment arrears and to raise new funds. The government's stabilization program—aimed at establishing realistic exchange rates, reasonable price stability, and a resumption of growth—requires considerable public administrative abilities and continued patience by consumers during a long incubation period.

Economy

Overview: Honduras is one of the poorest countries in the Western Hemisphere. Agriculture is the most important sector of the economy, accounting for nearly 30% of GDP, employing 62% of the labor force, and producing two-thirds of exports. Productivity remains low, however, leaving considerable room for improvement. Although industry is still in its early stages, it employs nearly 15% of the labor force, accounts for 23% of GDP, and generates 20% of exports. The service sectors, including public administration, account for 48% of GDP and employ nearly 20% of the labor force. Basic problems facing the economy include a high population growth rate, a high unemployment rate, a lack of basic services, a large and inefficient public sector, and an export sector dependent mostly on coffee and bananas, which are subject to sharp price fluctuations. **GDP:** \$4.4 billion, per capita \$890; real growth rate 4.0% (1988)

Inflation rate (consumer prices): 11% (1989)

Unemployment rate: 12% unemployed, 30-40% underemployed (1988)

Budget: revenues \$1,053 million; expenditures \$949 million, including capital expenditures of \$159 million (1989)

Exports: \$1.0 billion (f.o.b., 1988); *commodities*—bananas, coffee, shrimp, lobster, minerals, lumber; *partners*—US 52%, FRG 11%, Japan, Italy, Belgium

Imports: \$1.4 billion (c.i.f. 1988); *commodities*—machinery and transport equipment, chemical products, manufactured goods, fuel and oil, foodstuffs; *partners*—US 39%, Japan 9%, CACM, Venezuela, Mexico

External debt: \$3.2 billion (December 1989)

Industrial production: growth rate 5% (1988)

Electricity: 655,000 kW capacity; 1,980 million kWh produced, 390 kWh per capita (1989)

Industries: agricultural processing (sugar and coffee), textiles, clothing, wood products

Agriculture: most important sector, accounting for nearly 30% of GDP, over 60% of the labor force, and two-thirds of exports; principal products include ba-

nanas, coffee, timber, beef, citrus fruit, shrimp; importer of wheat

Illicit drugs: illicit producer of cannabis, cultivated on small plots and used principally for local consumption; transshipment point for cocaine

Aid: US commitments, including Ex-Im (FY70-88), \$1.3 billion; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$776 million

Currency: lempira (plural—lempiras); 1 lempira (L) = 100 centavos

Exchange rates: lempiras (L) per US\$1—2.00 (fixed rate); 3.50 parallel exchange and black-market rate (October 1989)

Fiscal year: calendar year

Economy

Overview: Hong Kong has a free-market economy and is autonomous in financial affairs. Natural resources are limited and food and raw materials must be imported. Manufacturing is the backbone of the economy, accounting for more than 20% of GDP, employing 36% of the labor force, and exporting about 90% of output. Real GDP growth averaged a remarkable 8% in 1987-88, then slowed to a respectable 3% in 1989. Unemployment, which has been declining since the mid-1980s, is now less than 2%. A shortage of labor continues to put upward pressure on prices and the cost of living. Short-term prospects remain solid so long as major trading partners continue to be prosperous. The crackdown in China in 1989 casts a long shadow over the longer term economic outlook.

GDP: \$57 billion, per capita \$10,000; real growth rate 3% (1989)

Inflation rate (consumer prices): 9.5% (1989)

Unemployment rate: 1.6% (1988)

Budget: \$6.9 billion (FY89)

Exports: \$63.2 billion (f.o.b., 1988), including reexports of \$22.9 billion; *commodities*—clothing, textile yarn and fabric, footwear, electrical appliances, watches and clocks, toys; *partners*—US 31%, China 14%, FRG 8%, UK 6%, Japan 5%

Imports: \$63.9 billion (c.i.f., 1988); *commodities*—foodstuffs, transport equipment, raw materials, semimanufactures, petroleum; *partners*—China 31%, Japan 20%, Taiwan 9%, US 8%

External debt: \$9.6 billion (December 1988)

Industrial production: growth rate 7.0% (1988)

Electricity: 7,800,000 kW capacity; 23,000 million kWh produced, 4,030 kWh per capita (1989)

Industries: textiles, clothing, tourism, electronics, plastics, toys, watches, clocks

Agriculture: minor role in the economy; rice, vegetables, dairy products; less than 20% self-sufficient; shortages of rice, wheat, water

Aid: US commitments, including Ex-Im (FY70-87), \$141.2 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$899.8 million
Currency: Hong Kong dollar (plural—dollars); 1 Hong Kong dollar (HK\$) = 100 cents

Exchange rates: Hong Kong dollars (HK\$) per US\$—7.800 (March 1989), 7.810 (1988), 7.760 (1987), 7.795 (1986), 7.811 (1985); note—linked to the US dollar at the rate of about 7.8 HK\$ per 1 US\$ since 1985

Economy

Overview: Hungary's postwar Communist government spurred the movement from a predominantly agricultural to an industrialized economy. The share of the labor force in agriculture dropped from over 50% in 1950 to under 20% in 1989. Agriculture nevertheless remains an important sector, providing sizable export earnings and meeting domestic food needs. Industry accounts for about 40% of GNP and 30% of employment. Nearly three-fourths of foreign trade is with the USSR and Eastern Europe. Low rates of growth reflect the inability of the Soviet-style economy to modernize capital plant and motivate workers. GNP grew about 1% in 1988 and declined by 1% in 1989. Since 1985 external debt has more than doubled, to nearly \$20 billion. In recent years Hungary has moved further than any other East European country in experimenting with decentralized and market-

Hungary (continued)

oriented enterprises. These experiments have failed to jump-start the economy because of: limitations on funds for privatization; continued subsidization of insolvent state enterprises; and the leadership's reluctance to implement sweeping market reforms that would cause additional social dislocations in the short term.

GNP: \$64.6 billion, per capita \$6,108; real growth rate -1.3% (1989 est.)

Economy

Overview: Iceland's prosperous Scandinavian-type economy is basically capitalistic, but with extensive welfare measures, low unemployment, and comparatively even distribution of income. The economy is heavily dependent on the fishing industry, which provides nearly

75% of export earnings. In the absence of other natural resources, Iceland's economy is vulnerable to changing world fish prices. National output declined for the second consecutive year in 1989, and two of the largest fish farms filed for bankruptcy. Other economic activities include livestock raising and aluminum smelting. A fall in the fish catch is expected for 1990, resulting in a continuation of the recession.
GDP: \$4.0 billion, per capita \$16,200; real growth rate —1.8% (1989 est.)
Inflation rate (consumer prices): 17.4% (1989 est.)
Unemployment rate: 1.3% (1989 est.)
Budget: revenues \$1.5 billion; expenditures \$1.7 billion, including capital expenditures of \$NA million (1988)
Exports: \$1.4 billion (f.o.b., 1988); *commodities*—fish and fish products, animal products, aluminum, diatomite; *partners*—EC 58.9% (UK 23.3%, FRG 10.3%), US 13.6%, USSR 3.6%
Imports: \$1.6 billion (c.i.f., 1988); *commodities*—machinery and transportation equipment, petroleum, foodstuffs, textiles; *partners*—EC 58% (FRG 16%, Denmark 10.4%, UK 9.2%), US 8.5%, USSR 3.9%
External debt: \$1.8 billion (1988)
Industrial production: growth rate 4.7% (1987 est.)
Electricity: 1,063,000 kW capacity; 5,165 million kWh produced, 20,780 kWh per capita (1989)
Industries: fish processing, aluminum smelting, ferro-silicon production, hydro-power
Agriculture: accounts for about 25% of GDP (including fishing); fishing is most important economic activity, contributing nearly 75% to export earnings; principal crops—potatoes and turnips; livestock—cattle, sheep; self-sufficient in crops; fish catch of about 1.6 million metric tons in 1987
Aid: US commitments, including Ex-Im (FY70-81), \$19.1 million
Currency: króna (plural—krónur); 1 Icelandic króna (IKr) = 100 aurar
Exchange rates: Icelandic krónur (IKr) per US\$—60.751 (January 1990), 57.042 (1989), 43.014 (1988), 38.677 (1987), 41.104 (1986), 41.508 (1985)

Economy

Overview: India's Malthusian economy is a mixture of traditional village farming and handicrafts, modern agriculture, old and new branches of industry, and a multitude of support services. It presents both the entrepreneurial skills and drives of the capitalist system and widespread government intervention of the socialist mold. Growth of 4% to 5% annually in the 1980s has softened the impact of population growth on unemployment, social tranquility, and the environment. Agricultural output has continued to expand, reflecting the greater use of modern farming techniques and improved seed that have helped to make India self-sufficient in food grains and a net agricultural exporter. However, tens of millions of villagers, particularly in the south, have not benefited from the green revolution and live in abject poverty. Industry has benefited from a liberalization of controls. The growth rate of the service sector has also been strong. **GNP:** \$333 billion, per capita \$400; real growth rate 5.0% (1989 est.)

Inflation rate (consumer prices): 9.5% (1989 est.)

Unemployment rate: 20% (1989 est.)

Budget: revenues \$48 billion; expenditures \$53 billion, including capital expenditures of \$13.6 billion (1989)

Exports: \$17.2 billion (f.o.b., 1989); *commodities*—tea, coffee, iron ore, fish prod-

ucts, manufactures; *partners*—EC 25%, USSR and Eastern Europe 17%, US 19%, Japan 10%

Imports: \$24.7 billion (c.i.f., 1989); *commodities*—petroleum, edible oils, textiles, clothing, capital goods; *partners*—EC 33%, Middle East 19%, Japan 10%, US 9%, USSR and Eastern Europe 8%

External debt: \$48.7 billion (1989)

Industrial production: growth rate 8.8% (1989)

Electricity: 59,000,000 kW capacity; 215,000 million kWh produced, 260 kWh per capita (1989)

Industries: textiles, food processing, steel, machinery, transportation equipment, cement, jute manufactures, mining, petroleum, power, chemicals, pharmaceuticals, electronics

Agriculture: accounts for about 33% of GNP and employs 67% of labor force; self-sufficient in food grains; principal crops—rice, wheat, oilseeds, cotton, jute, tea, sugarcane, potatoes; livestock—cattle, buffaloes, sheep, goats and poultry; fish catch of about 3 million metric tons ranks India in the world's top 10 fishing nations
Illicit drugs: licit producer of opium poppy for the pharmaceutical trade, but some opium is diverted to international drug markets; major transit country for illicit narcotics produced in neighboring countries

Aid: US commitments, including Ex-Im (FY70-88), \$4.2 billion; Western (non-US) countries, ODA and OOF bilateral commitments (1980-87), \$18.6 billion; OPEC bilateral aid (1979-89), \$315 million; USSR (1970-88), \$10.0 billion; Eastern Europe (1970-88), \$105 million

Currency: Indian rupee (plural—rupees); 1 Indian rupee (Re) = 100 paise

Exchange rates: Indian rupees (Rs) per US\$1—16.965 (January 1990), 16.226 (1989), 13.917 (1988), 12.962 (1987), 12.611 (1986), 12.369 (1985)

Ports: Bombay, Calcutta, Cochin, Kandla, Madras, New Mangalore, Port Blair (Andaman Islands)

Merchant marine: 296 ships (1,000 GRT or over) totaling 5,855,842 GRT/9,790,260 DWT; includes 1 short-sea passenger, 8 passenger-cargo, 95 cargo, 1 roll-on/roll-off cargo, 8 container, 53 petroleum, oils, and lubricants (POL) tanker, 10 chemical tanker, 9 combination ore/oil, 109 bulk, 2 combination bulk

Civil air: 93 major transport aircraft

Airports: 345 total, 292 usable; 202 with permanent-surface runways; 2 with runways over 3,659 m; 57 with runways 2,440-3,659 m; 91 with runways 1,220-2,439 m

Telecommunications: poor domestic telephone service, international radio communications adequate; 3,200,000 telephones; stations—170 AM, no FM, 14 TV (government controlled); domestic satellite system for communications and TV; 3 Indian Ocean INTELSAT earth stations; submarine cables to Sri Lanka, Malaysia, and Pakistan

Defense Forces

Branches: Army, Navy, Air Force, Border Security Forces, Coast Guard, Paramilitary Forces

Military manpower: males 15-49, 227,436,282; 134,169,114 fit for military service; about 9,403,063 reach military age (17) annually

Defense expenditures: 2.6% of GNP, or \$8.7 billion (FY90 est.)

Indian Ocean

Geography

Total area: 73,600,000 km²; Arabian Sea, Bass Strait, Bay of Bengal, Java Sea, Persian Gulf, Red Sea, Strait of Malacca, Timor Sea, and other tributary water bodies

Comparative area: slightly less than eight times the size of the US; third-largest ocean (after the Pacific Ocean and Atlantic Ocean, but larger than the Arctic Ocean)

Coastline: 66,526 km

Climate: northeast monsoon (December to April), southwest monsoon (June to October); tropical cyclones occur during May/June and October/November in the north Indian Ocean and January/February in the south Indian Ocean

Terrain: surface dominated by counter-clockwise gyre (broad, circular system of currents) in the south Indian Ocean; unique reversal of surface currents in the north Indian Ocean—low pressure over southwest Asia from hot, rising, summer air results in the southwest monsoon and southwest-to-northeast winds and currents, while high pressure over northern Asia from cold, falling, winter air results in the northeast monsoon and northeast-to-southwest winds and currents; ocean floor is dominated by the Mid-Indian Ocean Ridge and subdivided by the Southeast Indian Ocean Ridge, Southwest Indian Ocean Ridge, and Ninety East Ridge; maximum depth is 7,258 meters in the Java Trench

Natural resources: oil and gas fields, fish, shrimp, sand and gravel aggregates, placer deposits, polymetallic nodules

Environment: endangered marine species include the dugong, seals, turtles, and whales; oil pollution in the Arabian Sea, Persian Gulf, and Red Sea

Note: major choke points include Bab el Mandeb, Strait of Hormuz, Strait of Malacca, southern access to the Suez Canal,

and the Lombok Strait; ships subject to superstructure icing in extreme south near Antarctica from May to October

Economy

Overview: The Indian Ocean provides a major transportation highway for the movement of petroleum products from the Middle East to Europe and North and South American countries. Fish from the ocean are of growing economic importance to many of the bordering countries as a source of both food and exports. Fishing fleets from the USSR, Japan, Korea, and Taiwan also exploit the Indian Ocean for mostly shrimp and tuna. Large reserves of hydrocarbons are being tapped in the offshore areas of Saudi Arabia, Iran, India, and Western Australia. An estimated 40% of the world's offshore oil production comes from the Indian Ocean. Beach sands rich in heavy minerals and offshore placer deposits are actively exploited by bordering countries, particularly India, South Africa, Indonesia, Sri Lanka, and Thailand.

Industries: based on exploitation of natural resources, particularly marine life, minerals, oil and gas production, fishing, sand and gravel aggregates, placer deposits

Communications

Ports: Bombay (India), Calcutta (India), Madras (India), Colombo (Sri Lanka), Durban (South Africa), Fremantle (Australia), Jakarta (Indonesia), Melbourne (Australia), Richard's Bay (South Africa)

Telecommunications: no submarine cables

Indonesia (continued)

Economy

Overview: Indonesia is a mixed economy with many socialist institutions and central planning but with a recent emphasis on deregulation and private enterprise. Indonesia has extensive natural wealth but, with a large and rapidly increasing population, it remains a poor country. GNP growth in 1985-89 averaged about 4%, somewhat short of the 5% rate needed to absorb the 2.3 million workers annually entering the labor force. Agriculture, including forestry and fishing, is the most important sector, accounting for 21% of GDP and over 50% of the labor force. The staple crop is rice. Once the world's largest rice importer, Indonesia is now nearly self-sufficient. Plantation crops—rubber and palm oil—are being encouraged for both export and job generation. The diverse natural resources include crude oil, natural gas, timber, metals, and coal. Of these, the oil sector dominates the external economy, generating more than 20% of the government's revenues and 40% of export earnings in 1989. Japan is Indonesia's most important customer and supplier of aid.

GNP: \$80 billion, per capita \$430; real growth rate 5.7% (1989 est.)

Inflation rate (consumer prices): 5.5% (1989)

Unemployment rate: 3.1% (1989 est.)

Budget: revenues \$20.9 billion; expenditures \$20.9 billion, including capital expenditures of \$7.5 billion (FY89)

Exports: \$21.0 billion (f.o.b., 1989 est.); *commodities*—petroleum and liquefied natural gas 40%, timber 15%, textiles 7%, rubber 5%, coffee 3%; *partners*—Japan 42%, US 16%, Singapore 9%, EC 11% (1988)

Imports: \$13.2 billion (f.o.b., 1989 est.); *commodities*—machinery 39%, chemical products 19%, manufactured goods 16%; *partners*—Japan 26%, EC 19%, US 13%, Singapore 7% (1988)

External debt: \$55.0 billion, medium and long-term (1989 est.)

Industrial production: growth rate 4.8% (1988 est.)

Electricity: 11,600,000 kW capacity; 38,000 million kWh produced, 200 kWh per capita (1989)

Flag: three equal horizontal bands of green (top), white, and red; the national emblem (a stylized representation of the word Allah) in red is centered in the white band; *Allah Akbar* (God is Great) in white Arabic script is repeated 11 times along the bottom edge of the green band and 11 times along the top edge of the red band

Economy

Overview: Since the 1979 revolution, the banks, petroleum industry, transportation, utilities, and mining have been nationalized, but the new five-year plan—the first since the revolution—passed in January 1990, calls for the transfer of many government-controlled enterprises to the private sector. War-related disruptions, massive corruption, mismanagement, demographic pressures, and ideological rigidities have kept economic growth at depressed levels. Oil accounts for 90% of export revenues. A combination of war damage and low oil prices brought a 2% drop in GNP in 1988. GNP probably rose slightly in 1989, considerably short of the 3.4% population growth rate in 1989. Heating oil and gasoline are rationed. Agriculture has suffered from the war, land reform, and shortages of equipment and materials. The five-year plan seeks to reinvigorate the economy by increasing the role of the private sector, boosting nonoil income, and securing foreign loans. The plan is overly ambitious but probably will generate some short-term relief.

GNP: \$97.6 billion, per capita \$1,800; real growth rate 0-1% (1989)

Inflation rate (consumer prices): 50-80% (1989)

Unemployment rate: 30% (1989)

Budget: revenues \$NA; expenditures \$55.1 billion, including capital expenditures of \$11.5 billion (FY88 est.)

Economy

Overview: The Ba'thist regime engages in extensive central planning and management of industrial production and foreign

Iraq (continued)

trade while leaving some small-scale industry and services and most agriculture to private enterprise. The economy is dominated by the oil sector, which provides about 95% of foreign exchange earnings. Since the early 1980s financial problems, caused by war expenditures and damage to oil export facilities by Iran, have led the government to implement austerity measures and to reschedule foreign debt payments. Oil exports have gradually increased with the construction of new pipelines. Agricultural development remains hampered by labor shortages, salinization, and dislocations caused by previous land reform and collectivization programs. The industrial sector, although accorded high priority by the government, is under financial constraints. New investment funds are generally allocated only to projects that result in import substitution or foreign exchange earnings.

Economy

Overview: The economy is small, open, and trade dependent. Agriculture, once the most important sector, is now dwarfed by industry, which accounts for 35% of GNP and about 80% of exports and employs 20% of the labor force. The government has successfully reduced the rate of inflation from double-digit figures in the late 1970s to about 4% in 1989. In 1987, after years of deficits, the balance of payments was brought into the black. Unemployment, however, is a serious problem. A 1989 unemployment rate of 17.7% placed

Ireland along with Spain as the countries with the worst jobless records in Western Europe.

GDP: \$31.4 billion, per capita \$8,900; real growth rate 4.3% (1989 est.)

Inflation rate (consumer prices): 4.2% (1989)

Unemployment rate: 17.7% (1989)

Budget: revenues \$10.9 billion; expenditures \$11.2 billion, including capital expenditures of \$1.5 billion (1989)

Exports: \$20.3 billion (f.o.b., 1989); *commodities*—live animals, animal products, chemicals, data processing equipment, industrial machinery; *partners*—EC 74% (UK 35%, FRG 11%, France 9%), US 8%

Imports: \$17.3 billion (c.i.f., 1989); *commodities*—food, animal feed, chemicals, petroleum and petroleum products, machinery, textiles, clothing; *partners*—EC 66% (UK 42%, FRG 9%, France 4%), US 16%

External debt: \$16.1 billion (1988)

Industrial production: growth rate 9.5% (1989 est.)

Electricity: 4,957,000 kW capacity; 14,480 million kWh produced, 4,080 kWh per capita (1989)

Industries: food products, brewing, textiles, clothing, chemicals, pharmaceuticals, machinery, transportation equipment, glass and crystal

Agriculture: accounts for 11% of GNP and 14.8% of the labor force; principal crops—turnips, barley, potatoes, sugar beets, wheat; livestock—meat and dairy products; 85% self-sufficient in food; food shortages include bread grain, fruits, vegetables

Israel (also see separate Gaza Strip and West Bank entries)

Note: The Arab territories occupied by Israel since the 1967 war are not included in the data below. As stated in the 1978 Camp David Accords and reaffirmed by President Reagan's 1 September 1982 peace initiative, the final status of the West Bank and Gaza Strip, their relationship with their neighbors, and a peace treaty between Israel and Jordan are to be negotiated among the concerned parties. The Camp David Accords further specify that these negotiations will resolve the location of the respective boundaries. Pending the completion of this process, it is US policy that the final status of the West Bank and Gaza Strip has yet to be determined (see West Bank and Gaza Strip entries). On 25 April 1982 Israel relinquished control of the Sinai to Egypt. Statistics for the Israeli-occupied Golan Heights are included in the Syria entry.

Economy

Overview: Israel has a market economy with substantial government participation. It depends on imports for crude oil, food, grains, raw materials, and military equipment. Despite limited natural resources, Israel has developed its agriculture and industry sectors on an intensive scale over past 20 years. Industry accounts for

about 23% of the labor force, agriculture for 6%, and services for most of the balance. Diamonds, high-technology machinery, and agricultural products (fruits and vegetables) are the biggest export earners. The balance of payments has traditionally been negative, but is offset by large transfer payments and foreign loans. Nearly two-thirds of Israel's \$16 billion external debt is owed to the US, which is its major source for economic and military aid. To earn needed foreign exchange, Israel must continue to exploit high-technology niches in the international market, such as medical scanning equipment. In 1987 the economy showed a 5.2% growth in real GNP, the best gain in nearly a decade; in 1988-89 the gain was only 1% annually, largely because of the economic impact of the Palestinian uprising (*intifadah*). Inflation dropped from an annual rate of over 400% in 1984 to about 16% in 1987-88 without any major increase in unemployment. **GNP:** \$38 billion, per capita \$8,700; real growth rate 1% (1989)

Inflation rate (consumer prices): 20% (1989)

Unemployment rate: 9% (December 1989)

Budget: revenues \$24.2 billion; expenditures \$26.3 billion, including capital expenditures of \$7 billion (FY89 est.)

Exports: \$10.4 billion (f.o.b., 1989 est.); *commodities*—polished diamonds, citrus and other fruits, textiles and clothing, processed foods, fertilizer and chemical products, military hardware, electronics; *partners*—US, UK, FRG, France, Belgium, Luxembourg, Italy

Imports: \$12.4 billion (c.i.f., 1989 est.); *commodities*—military equipment, rough diamonds, oil, chemicals, machinery, iron and steel, cereals, textiles, vehicles, ships, aircraft; *partners*—US, FRG, UK, Switzerland, Italy, Belgium, Luxembourg

External debt: \$16.4 billion (March 1989)

Industrial production: growth rate -1.5% (1989)

Electricity: 4,392,000 kW capacity; 17,500 million kWh produced, 4,000 kWh per capita (1989)

Industries: food processing, diamond cutting and polishing, textiles, clothing, chemicals, metal products, military equipment, transport equipment, electrical equipment, miscellaneous machinery, potash mining, high-technology electronics, tourism

Agriculture: accounts for 5% of GNP; largely self-sufficient in food production, except for bread grains; principal products—citrus and other fruits, vegetables, cotton; livestock products—beef, dairy, and poultry

Aid: US commitments, including Ex-Im (FY70-88), \$15.8 billion; Western (non-

US) countries, ODA and OOF bilateral commitments (1970-87), \$2.2 billion
Currency: new Israeli shekel (plural—shekels); 1 new Israeli shekel (NIS) = 100 new agorot

Exchange rates: new Israeli shekels (NIS) per US\$1—1.9450 (January 1990), 1.9164 (1989), 1.5989 (1988), 1.5946 (1987), 1.4878 (1986), 1.1788 (1985)

Economy

Overview: Since World War II the economy has changed from one based on agriculture into a ranking industrial economy, with approximately the same total and per capita output as France and the UK. The country is still divided into a developed industrial north, dominated by large private companies and state enterprises and an undeveloped agricultural south. Services account for 58% of GDP, industry 37%, and agriculture 5%. Most raw materials needed by industry and over 75% of energy requirements must be imported. The economic recovery that began in mid-1983 has continued through 1989, with the economy growing at an annual average rate of 3%. For the 1990s, Italy faces the problems of refurbishing a tottering communications system, curbing the increasing pollution in major industrial centers, and adjusting to the new competitive forces accompanying the ongoing economic integration of the European Community.

Economy

Overview: The Ivory Coast is among the world's largest producers and exporters of coffee, cocoa beans, and palm-kernel oil. Consequently, the economy is highly sensitive to fluctuations in international prices for coffee and cocoa and to weather conditions. Despite attempts by the government to diversify, the economy is still largely dependent on agriculture and related industries. The agricultural sector accounts for over one-third of GDP and about 80% of export earnings and employs about 85% of the labor force. A collapse of world cocoa and coffee prices in 1986 threw the economy into a recession, from which the country had not recovered by 1989.

Economy

Overview: The economy is based on sugar, bauxite, and tourism. In 1985 it suffered a setback with the closure of some facilities in the bauxite and alumina industry, a major source of hard currency earnings. Since 1986 an economic recovery has been under way. In 1987 conditions began to improve for the bauxite and alumina industry because of increases in world metal prices. The recovery has also been supported by growth in the manufacturing and tourism sectors. In September 1988, Hurricane Gilbert inflicted severe damage on crops and the electric power system, a sharp but temporary setback to the economy. By October 1989 the economic recovery from the hurricane was largely complete and real growth was up about 3% for 1989.

GDP: \$3.8 billion, per capita \$1,529; real growth rate 3.0% (1989 est.)

Economy

Overview: Although Japan has few natural resources, since 1971 it has become the world's third-largest industrial economy, ranking behind only the US and the USSR. Government-industry cooperation, a strong work ethic, and a comparatively small defense allocation have helped Japan advance rapidly, notably in high-technology fields. Industry, the most important sector of the economy, is heavily dependent on imported raw materials and fuels. Self-sufficient in rice, Japan must import 50% of its requirements for other grain and fodder crops. Japan maintains one of the world's largest fishing fleets and accounts for nearly 15% of the total global catch. Overall economic growth has been spectacular: a 10% average in the 1960s, a 5% average in the 1970s and 1980s. In 1989 strong investment and consumption spending helped maintain growth at nearly 5%. Inflation remains low at 2.1% despite high oil prices and a somewhat weaker yen. Japan continues to run a huge trade surplus, \$60 billion in 1989, which supports extensive investment in foreign properties.

GNP: \$1,914.1 billion, per capita \$15,600; real growth rate 4.8% (1989 est.)

Inflation rate (consumer prices): 2.1% (1989)

Unemployment rate: 2.3% (1989)

Budget: revenues \$392 billion; expenditures \$464 billion, including capital expenditures of \$NA (FY89)

Exports: \$270 billion (f.o.b., 1989); *commodities*—manufactures 97% (including machinery 38%, motor vehicles 17%, consumer electronics 10%); *partners*—US 34%, Southeast Asia 22%, Western Europe 21%, Communist countries 5%, Middle East 5%

Imports: \$210 billion (c.i.f., 1989); *commodities*—manufactures 42%, fossil fuels 30%, foodstuffs 15%, nonfuel raw materials 13%; *partners*—Southeast Asia 23%, US 23%, Middle East 15%, Western Europe 16%, Communist countries 7%

External debt: \$NA

Industrial production: growth rate 9.0% (1989)

Electricity: 191,000,000 kW capacity; 700,000 million kWh produced, 5,680 kWh per capita (1989)

Industries: metallurgy, engineering, electrical and electronic, textiles, chemicals, automobiles, fishing

Agriculture: accounts for 3% of GNP; highly subsidized and protected sector, with crop yields among highest in world; principal crops—rice, sugar beets, vegetables, fruit; animal products include pork, poultry, dairy and eggs; about 50% self-sufficient in food production; shortages of

Jordan

(see separate West Bank entry)

Note: The war between Israel and the Arab states in June 1967 ended with Israel in control of the West Bank. As stated in the 1978 Camp David Accords and reaffirmed by President Reagan's 1 September 1982 peace initiative, the final status of the West Bank and Gaza Strip, their relationship with their neighbors, and a peace treaty between Israel and Jordan are to be negotiated among the concerned parties. The Camp David Accords further specify that these negotiations will resolve the location of the respective boundaries. Pending the completion of this process, it is US policy that the final status of the West Bank and Gaza Strip has yet to be determined.

Economy

Overview: Jordan was a secondary beneficiary of the oil boom of the late 1970s and early 1980s, when its GNP growth averaged 10-12%. Recent years, however, have witnessed a sharp reduction in cash aid from Arab oil-producing countries and in worker remittances, with growth averaging 1-2%. Imports—mainly oil, capital goods, consumer durables, and foodstuffs—have been outstripping exports by roughly \$2 billion annually, the difference being made up by aid, remittances, and borrowing. In 1989 the government pursued policies to encourage private investment, curb imports of luxury goods,

Jordan (continued)

promote exports, reduce the budget deficit, and, in general, reinvigorate economic growth. Success will depend largely on exogenous forces, such as the absence of drought and a pickup in outside support. Down the road, the completion of the proposed Unity Dam on the Yarmuk is vital to meet rapidly growing requirements for water.

GNP: \$5.2 billion, per capita \$1,760; real growth rate 0% (1989)

Inflation rate (consumer prices): 35% (1989 est.)

Economy

Overview: A serious underlying economic problem is Kenya's 3.8% annual population growth rate—one of the highest in the world. In the meantime, GDP growth in the near term has kept slightly ahead of population—annually averaging 5.2% in the 1986-88 period. Undependable weather conditions and a shortage of arable land hamper long-term growth in agriculture, the leading economic sector.

GDP: \$8.5 billion, per capita \$360; real growth rate 4.9% (1989 est.)

Inflation rate (consumer prices): 8.3% (1988)

Unemployment rate: NA%, but there is a high level of unemployment and underemployment

Exports: \$1.0 billion (f.o.b., 1988); **commodities**—coffee 20%, tea 18%, manufactures 15%, petroleum products 10% (1987); **partners**—Western Europe 45%, Africa 22%, Far East 10%, US 4%, Middle East 3% (1987)

Imports: \$1.8 billion (f.o.b., 1988); **commodities**—machinery and transportation equipment 36%, raw materials 33%, fuels

and lubricants 20%, food and consumer goods 11% (1987); **partners**—Western Europe 49%, Far East 20%, Middle East 19%, US 7% (1987)

External debt: \$6.2 billion (December 1989 est.)

Industrial production: growth rate 4.8% (1987 est.)

Electricity: 587,000 kW capacity; 2,250 million kWh produced, 90 kWh per capita (1989)

Industries: small-scale consumer goods (plastic, furniture, batteries, textiles, soap, cigarettes, flour), agricultural processing, oil refining, cement, tourism

Agriculture: most important sector, accounting for 30% of GDP, about 80% of the work force, and over 50% of exports; cash crops—coffee, tea, sisal, pineapple; food products—corn, wheat, sugarcane, fruit, vegetables, dairy products; food output not keeping pace with population growth

Illicit drugs: illicit producer of cannabis used mostly for domestic consumption; widespread cultivation of cannabis and qat on small plots; transit country for heroin and methaqualone en route from South-west Asia to West Africa, Western Europe, and the US

Aid: US commitments, including Ex-Im (FY70-88), \$771 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$6.0 billion; OPEC bilateral aid (1979-89), \$74 million; Communist countries (1970-88), \$83 million

Currency: Kenyan shilling (plural—shillings); 1 Kenyan shilling (KSh) = 100 cents

Exchange rates: Kenyan shillings (KSh) per US\$1—21.749 (December 1989), 20.572 (1989), 17.747 (1988), 16.454 (1987), 16.226 (1986), 16.432 (1985)

Economy

Overview: The country has few national resources. Phosphate deposits were exhausted at the time of independence in 1979. Copra and fish now represent the bulk of production and exports. The economy has fluctuated widely in recent years. Real GDP declined about 8% in 1987, as the fish catch fell sharply to only one-fourth the level of 1986 and copra production was hampered by repeated rains. Output rebounded strongly in 1988, with real GDP growing by 17%. The upturn in economic growth came from an increase in copra production and a good fish catch. Following the strong surge in output in 1988, GDP remained about the same in 1989.

GDP: \$34 million, per capita \$500; real growth rate 0% (1989)

Inflation rate (consumer prices): 3.1% (1988)

Unemployment rate: 2% (1985); considerable underemployment

Budget: revenues \$22.0 million; expenditures \$12.7 million, including capital expenditures of \$9.7 million (1988)

Exports: \$5.1 million (f.o.b., 1988); *commodities*—fish 55%, copra 42%; *partners*—EC 20%, Marshall Islands 12%, US 8%, American Samoa 4% (1985)

Imports: \$21.5 million (c.i.f., 1988); *commodities*—foodstuffs, fuel, transportation equipment; *partners*—Australia 39%, Japan 21%, NZ 6%, UK 6%, US 3% (1985)

External debt: \$2.0 million (December 1987 est.)

Industrial production: growth rate NA%

Electricity: 5,000 kW capacity; 13 million kWh produced, 190 kWh per capita (1989)

Industries: fishing, handicrafts

Agriculture: accounts for 30% of GDP (including fishing); copra and fish contribute 95% to exports; subsistence farming predominates; food crops—taro, breadfruit, sweet potatoes, vegetables; not self-sufficient in food

Aid: Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$245 million

Diplomatic representation: none

Flag: three horizontal bands of blue (top), red (triple width), and blue; the red band is edged in white; on the hoist side of the red band is a white disk with a red five-pointed star

Economy

Overview: More than 90% of this command economy is socialized; agricultural land is collectivized; and state-owned industry produces 95% of manufactured goods. State control of economic affairs is unusually tight even for a Communist country because of the small size and homogeneity of the society and the strict one-man rule of Kim. Economic growth during the period 1984-89 has averaged approximately 3%. Abundant natural resources and hydropower form the basis of industrial development. Output of the extractive industries includes coal, iron ore, magnesite, graphite, copper, zinc, lead, and precious metals. Manufacturing emphasis is centered on heavy industry, with light industry lagging far behind. The use of high-yielding seed varieties, expansion of irrigation, and the heavy use of fertilizers have enabled North Korea to become largely self-sufficient in food production. North Korea, however, is far behind South Korea in economic development and living standards.

Economy

Overview: The driving force behind the economy's dynamic growth has been the planned development of an export-oriented economy in a vigorously entrepreneurial society. GNP increased almost 13% in both 1986 and 1987 and 12% in 1988 before slowing to 6.5% in 1989. Such a rapid rate of growth was achieved with an inflation rate of only 3% in the period 1986-87, rising to 7% in 1988 and 5% in 1989. Unemployment is also low, and some labor bottlenecks have appeared in

several processing industries. While the South Korean economy is expected to grow at more than 5% annually during the 1990s, labor unrest—which led to substantial wage hikes in 1987-89—threatens to undermine noninflationary growth. GNP: \$200 billion, per capita \$4,600; real growth rate 6.5% (1989)

Inflation rate (consumer prices): 5% (1989)

Unemployment rate: 3% (1989)

Budget: revenues \$33.6 billion; expenditures \$33.6 billion, including capital expenditures of NA (1990)

Exports: \$62.3 billion (f.o.b., 1989); *commodities*—textiles, clothing, electronic and electrical equipment, footwear, machinery, steel, automobiles, ships, fish; *partners*—US 33%, Japan 21%

Imports: \$61.3 billion (c.i.f., 1989); *commodities*—machinery, electronics and electronic equipment, oil, steel, transport equipment, textiles, organic chemicals, grains; *partners*—Japan 28%, US 25% (1990)

External debt: \$30.5 billion (September 1989)

Industrial production: growth rate 3.5% (1989)

Electricity: 20,500,000 kW capacity; 80,000 million kWh produced, 1,850 kWh per capita (1989)

Industries: textiles, clothing, footwear, food processing, chemicals, steel, electronics, automobile production, ship building

Agriculture: accounts for 11% of GNP and employs 21% of work force (including fishing and forestry); principal crops—rice, root crops, barley, vegetables, fruit; livestock and livestock products—cattle, hogs, chickens, milk, eggs; self-sufficient in food, except for wheat; fish catch of 2.9 million metric tons, seventh-largest in world

Aid: US commitments, including Ex-Im (FY70-85), \$3.9 billion

Currency: South Korean won (plural—won); 1 South Korean won (W) = 100 chön (theoretical)

Exchange rates: South Korean won (W) per US\$1—683.43 (January 1990), 671.46 (1989), 731.47 (1988), 822.57 (1987), 881.45 (1986), 870.02 (1985)

Economy

Overview: The oil sector dominates the economy. Of the countries in the Middle East, Kuwait has oil reserves second only to those of Saudi Arabia. Earnings from hydrocarbons generate over 90% of both export and government revenues and contribute about 40% to GDP. Most of the nonoil sector is dependent upon oil-derived government revenues to provide infrastructure development and to promote limited industrial diversification. The economy is heavily dependent upon foreign labor—Kuwaitis account for less than 20% of the labor force. The early years of the Iran-Iraq war pushed Kuwait's GDP well below its 1980 peak; however, during the period 1986-88, GDP increased each year, rising to 5% in 1988. **GDP:** \$20.5 billion, per capita \$10,500; real growth rate 5.0% (1988)

Inflation rate (consumer prices): 1.5% (1988)

Unemployment rate: 0%

Budget: revenues \$7.1 billion; expenditures \$10.5 billion, including capital expenditures of \$3.1 billion (FY88)

Exports: \$7.1 billion (f.o.b., 1988); *commodities*—oil 90%; *partners*—Japan, Italy, FRG, US

Imports: \$5.2 billion (f.o.b., 1988); *commodities*—food, construction material, vehicles and parts, clothing; *partners*—Japan, US, FRG, UK

External debt: \$7.2 billion (December 1989 est.)

Industrial production: growth rate 3% (1988)

Electricity: 8,287,000 kW capacity; 21,500 million kWh produced, 10,710 kWh per capita (1989)

Industries: petroleum, petrochemicals, desalination, food processing, salt, construction

Agriculture: virtually none; dependent on imports for food; about 75% of potable water must be distilled or imported

Aid: donor—pledged \$18.3 billion in bilateral aid to less developed countries (1979-89)

Currency: Kuwaiti dinar (plural—dinars); 1 Kuwaiti dinar (KD) = 1,000 fils

Economy

Overview: One of the world's poorest nations, Laos has had a Communist centrally planned economy with government ownership and control of productive enterprises of any size. Recently, however, the government has been decentralizing control and encouraging private enterprise. Laos is a landlocked country with a primitive infrastructure, that is, it has no railroads, a rudimentary road system, limited external and internal telecommunications, and electricity available in only a limited area. Subsistence agriculture is the main occupation, accounting for over 60% of GDP and providing about 85-90% of total employment. The predominant crop is rice. For the foreseeable future the economy will continue to depend for its survival on foreign aid—from CEMA, IMF, and other international sources.
GDP: \$585 million, per capita \$150; real growth rate 3% (1989 est.)
Inflation rate (consumer prices): 35% (1989 est.)
Unemployment rate: 15% (1989 est.)
Budget: revenues \$71 million; expenditures \$198 million, including capital expenditures of \$132 million (1988 est.)
Exports: \$57.5 million (f.o.b., 1989 est.); *commodities*—electricity, wood products, coffee, tin; *partners*—Thailand, Malaysia, Vietnam, USSR, US
Imports: \$219 million (c.i.f., 1989 est.); *commodities*—food, fuel oil, consumer goods, manufactures; *partners*—Thailand, USSR, Japan, France, Vietnam
External debt: \$964 million (1989 est.)
Industrial production: growth rate 8% (1989 est.)
Electricity: 176,000 kW capacity; 900 million kWh produced, 225 kWh per capita (1989)
Industries: tin mining, timber, electric power, agricultural processing

Agriculture: accounts for 60% of GDP and employs most of the work force; subsistence farming predominates; normally self-sufficient; principal crops—rice (80% of cultivated land), potatoes, vegetables, coffee, sugarcane, cotton
Illicit drugs: illicit producer of cannabis and opium poppy for the international drug trade; production of cannabis increased in 1989; marijuana and heroin are shipped to Western countries, including the US
Aid: US commitments, including Ex-Im (FY70-79), \$276 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$468 million; Communist countries (1970-88), \$895 million
Currency: new kip (plural—kips); 1 new kip (NK) = 100 at
Exchange rates: new kips (NK) per US\$1—700 (December 1989), 725 (1989), 350 (1988), 200 (1987), 108 (1986), 95 (1985)
Fiscal year: 1 July-30 June

Communications

Highways: about 27,527 km total; 1,856 km bituminous or bituminous treated; 7,451 km gravel, crushed stone, or improved earth; 18,220 km unimproved earth and often impassable during rainy season mid-May to mid-September
Inland waterways: about 4,587 km, primarily Mekong and tributaries; 2,897 additional kilometers are sectionally navigable by craft drawing less than 0.5 m
Pipelines: 136 km, refined products
Ports: none
Airports: 64 total, 50 usable; 9 with permanent-surface runways; none with runways over 3,659 m; 2 with runways 2,440-3,659 m; 12 with runways 1,220-2,439 m
Telecommunications: service to general public considered poor; radio network provides generally erratic service to government users; 7,390 telephones (1986); stations—10 AM, no FM, 1 TV; 1 satellite earth station

Defense Forces

Branches: Lao People's Army (LPA, which consists of an army with naval, aviation, and militia elements), Air Force, National Police Department
Military manpower: males 15-49, 967,047; 517,666 fit for military service; 44,176 reach military age (18) annually; conscription age NA

Government

Note: Between early 1975 and late 1976 Lebanon was torn by civil war between its Christians—then aided by Syrian troops—and its Muslims and their Palestinian allies. The cease-fire established in October 1976 between the domestic political groups generally held for about six years, despite occasional fighting. Syrian troops constituted as the Arab Deterrent Force by the Arab League have remained in Lebanon. Syria's move toward supporting the Lebanese Muslims and the Palestinians and Israel's growing support for Lebanese Christians brought the two sides into rough equilibrium, but no progress was made toward national reconciliation or political reforms—the original cause of the war.

Continuing Israeli concern about the Palestinian presence in Lebanon led to the Israeli invasion of Lebanon in June 1982. Israeli forces occupied all of the southern portion of the country and mounted a summer-long siege of Beirut, which resulted in the evacuation of the PLO from Beirut in September under the supervision of a multinational force (MNF) made up of US, French, and Italian troops.

Within days of the departure of the MNF, Lebanon's newly elected president, Bashir Gemayel, was assassinated. In the wake of his death, Christian militiamen massacred hundreds of Palestinian refugees in two Beirut camps. This prompted the return of the MNF to ease the security burden on Lebanon's weak Army and

security forces. In late March 1984 the last MNF units withdrew.

Lebanese Parliamentarians met in Ta'if, Saudi Arabia in late 1989 and concluded a national reconciliation pact that codified a new power-sharing formula, specifying a Christian president but giving Muslims more authority. Rene Muawad was subsequently elected president on 4 November 1989, ending a 13-month period during which Lebanon had no president and rival Muslim and Christian governments. Muawad was assassinated 17 days later, on 22 November; on 24 November Elias Harawi was elected to succeed Muawad.

Progress toward lasting political compromise in Lebanon has been stalled by opposition from Christian strongman Gen. Michel 'Awn. 'Awn—appointed acting Prime Minister by outgoing president Amin Gemayel in September 1988—called the national reconciliation accord illegitimate and has refused to recognize the new Lebanese Government.

Lebanon continues to be partially occupied by Syrian troops. Syria augmented its troop presence during the weeks following Muawad's assassination. Troops are deployed in West Beirut and its southern suburbs, in Al Biqā', and in northern Lebanon. Iran also maintains a small contingent of revolutionary guards in Al Biqā', from which it supports Lebanese Islamic fundamentalist groups.

Israel withdrew the bulk of its forces from the south in 1985, although it still retains troops in a 10-km-deep security zone north of its border with Lebanon. Israel arms and trains the Army of South Lebanon (ASL), which also occupies the security zone and is Israel's first line of defense against attacks on its northern border.

The following description is based on the present constitutional and customary practices of the Lebanese system.

Long-form name: Republic of Lebanon; note—may be changed to Lebanese Republic

Type: republic

Capital: Beirut

Administrative divisions: 5 governorates (muḥāfaẓat, singular—muḥāfaẓah); Al Biqā', Al Janūb, Ash Shamāl, Bayrūt, Jabal Lubnān

Flag: three horizontal bands of red (top), white (double width), and red with a green and brown cedar tree centered in the white band

Economy

Overview: Severe factional infighting in 1989 has been destroying physical property, interrupting the established pattern of economic affairs, and practically ending chances of restoring Lebanon's position as a Middle Eastern entrepôt and banking hub. The ordinary Lebanese citizen struggles to keep afloat in an environment of physical danger, high unemployment, and growing shortages. The central government's ability to collect taxes has suffered greatly from militia control and taxation of local areas. As the civil strife persists, the US dollar has become more and more the medium of exchange. Transportation, communications, and other parts of the infrastructure continue to deteriorate. Family remittances, foreign political money going to the factions, international emergency aid, and a small volume of manufactured exports help prop up the battered economy. Prospects for 1990 are grim, with expected further declines in economic activity and living standards. GDP: \$2.3 billion, per capita \$700; real growth rate NA% (1989 est.)

Inflation rate (consumer prices): 60% (1989 est.)

Unemployment rate: 33% (1987 est.)

Budget: revenues \$50 million; expenditures \$650 million, including capital expenditures of \$NA (1988 est.)

Exports: \$1.0 billion (f.o.b., 1987); *commodities*—agricultural products, chemicals, textiles, precious and semiprecious metals and jewelry, metals and metal products; *partners*—Saudi Arabia 16%, Switzerland 8%, Jordan 6%, Kuwait 6%, US 5%

Imports: \$1.5 billion (c.i.f., 1987); *commodities*—NA; *partners*—Italy 14%, France 12%, US 6%, Turkey 5%, Saudi Arabia 3%

External debt: \$935 million (December 1988)

Industrial production: growth rate NA%
Electricity: 1,381,000 kW capacity; 3,870 million kWh produced, 1,170 kWh per capita (1989)

Industries: banking, food processing, textiles, cement, oil refining, chemicals, jewelry, some metal fabricating

Agriculture: accounts for about one-third of GDP; principal products—citrus fruits, vegetables, potatoes, olives, tobacco, hemp (hashish), sheep, and goats; not self-sufficient in grain

Illicit drugs: illicit producer of opium poppy and cannabis for the international drug trade; opium poppy production in Al Biqā' is increasing; most hashish production is shipped to Western Europe

Aid: US commitments, including Ex-Im (FY70-88), \$356 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$509 million; OPEC bilateral aid (1979-89), \$962 million; Communist countries (1970-86), \$9 million

Currency: Lebanese pound (plural—pounds); 1 Lebanese pound (£L) = 100 piasters

Exchange rates: Lebanese pounds (£L) per US\$1—474.21 (December 1989), 496.69 (1989), 409.23 (1988), 224.60 (1987), 38.37 (1986), 16.42 (1985)

Fiscal year: calendar year

Communications

Railroads: 378 km total; 296 km 1.435-meter standard gauge, 82 km 1.050-meter gauge; all single track; system almost entirely inoperable

Highways: 7,370 km total; 6,270 km paved, 450 km gravel and crushed stone, 650 km improved earth

Pipelines: crude oil, 72 km (none in operation)

Ports: Beirut, Tripoli, Ra's Sil'ātā, Jūniyah, Sidon, Az Zahrānī, Tyre, Shikkā (none are under the direct control of the Lebanese Government); northern ports are occupied by Syrian forces and southern ports are occupied or partially quarantined by Israeli forces; illegal ports scattered along the central coast are owned and operated by various Christian, Druze, and Shi'a militias

Merchant marine: 67 ships (1,000 GRT or over) totaling 325,361 GRT/494,319

DWT; includes 43 cargo, 1 refrigerated cargo, 2 vehicle carrier, 2 roll-on/roll-off cargo, 2 container, 7 livestock carrier, 1 petroleum, oils, and lubricants (POL) tanker, 1 chemical tanker, 1 specialized tanker, 6 bulk, 1 combination bulk

Civil air: 15 major transport aircraft

Airports: 9 total, 8 usable; 5 with permanent-surface runways; none with runways over 3,659 m; 3 with runways 2,440-3,659 m; 2 with runways 1,220-2,439 m; none under the direct control of the Lebanese Government

Telecommunications: rebuilding program disrupted; had fair system of radio relay, cable; 325,000 telephones; stations—5 AM, 3 FM, 15 TV; 1 inactive Indian Ocean INTELSTAT satellite earth station; 3 submarine coaxial cables; radio relay to Jordan and Syria, inoperable

Economy

Overview: Small, landlocked, and mountainous, Lesotho has no important natural resources other than water. Its economy is based on agriculture, light manufacturing, and remittances from laborers employed in South Africa. Subsistence farming is the principal occupation for about 86% of the domestic labor force and accounts for about 20% of GDP. Manufacturing depends largely on farm products to support the milling, canning, leather, and jute industries; other industries include textile, clothing, and light engineering. Industry's share of total GDP rose from 6% in 1982 to 10.5% in 1987. During the period 1985-87 real GDP growth averaged 2.9% per year, only slightly above the population growth rate. In FY89 per capita GDP was only \$245 and nearly 25% of the labor force was unemployed.

GDP: \$412 million, per capita \$245; real growth rate 8.2% (FY89 est.)

Inflation rate (consumer prices): 15.0% (FY89 est.)

Unemployment rate: 23% (1988)

Budget: revenues \$159 million; expenditures \$224 million, including capital expenditures of \$68 million (FY89 est.)

Exports: \$55 million (f.o.b., FY89 est.); *commodities*—wool, mohair, wheat, cattle, peas, beans, corn, hides, skins, baskets; *partners*—South Africa 87%, EC 10%, (1985)

Imports: \$526 million (f.o.b., FY89 est.); *commodities*—mainly corn, building materials, clothing, vehicles, machinery, medicines, petroleum, oil, and lubricants; *partners*—South Africa 95%, EC 2% (1985)

External debt: \$235 million (December 1988)

Industrial production: growth rate 10.3% (1988 est.)

Electricity: power supplied by South Africa

Industries: tourism

Agriculture: exceedingly primitive, mostly subsistence farming and livestock; principal crops are corn, wheat, pulses, sorghum, barley

Aid: US commitments, including Ex-Im (FY70-88), \$252 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$714 million; OPEC bilateral aid (1979-89), \$4 million; Communist countries (1970-88), \$14 million

Economy

Overview: In 1988 and 1989 the Liberian economy posted its best two years in a decade, thanks to a resurgence of the rubber industry and rapid growth in exports of forest products. Richly endowed with water, mineral resources, forests, and a climate favorable to agriculture, Liberia is a producer and exporter of basic products. Local manufacturing, mainly foreign owned, is small in scope. Liberia imports primarily machinery and parts, transportation equipment, petroleum products, and foodstuffs. Persistent budget deficits, the flight of capital, and deterioration of transport and other infrastructure continue to hold back economic progress.
GDP: \$988 million, per capita \$395; real growth rate 1.5% (1988)

Inflation rate (consumer prices): 12% (1989)

Unemployment rate: 43% urban (1988)

Budget: revenues \$242.1 million; expenditures \$435.4 million, including capital expenditures of \$29.5 million (1989)

Liberia (continued)

Exports: \$550 million (f.o.b., 1989); *commodities*—iron ore 61%, rubber 20%, timber 11%, coffee; *partners*—US, EC, Netherlands

Imports: \$335 million (c.i.f., 1989); *commodities*—rice, mineral fuels, chemicals, machinery, transportation equipment, other foodstuffs; *partners*—US, EC, Japan, China, Netherlands, ECOWAS
External debt: \$1.7 billion (December 1989 est.)

Industrial production: growth rate 1.5% in manufacturing (1987)

Electricity: 400,000 kW capacity; 730 million kWh produced, 290 kWh per capita (1989)

Industries: rubber processing, food processing, construction materials, furniture, palm oil processing, mining (iron ore, diamonds)

Agriculture: accounts for about 40% of GDP (including fishing and forestry); principal products—rubber, timber, coffee, cocoa, rice, cassava, palm oil, sugarcane, bananas, sheep, and goats; not self-sufficient in food, imports 25% of rice consumption

Aid: US commitments, including Ex-Im (FY70-88), \$634 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$793 million; OPEC bilateral aid (1979-89), \$25 million; Communist countries (1970-88), \$77 million

Currency: Liberian dollar (plural—dollars); 1 Liberian dollar (L\$) = 100 cents

Exchange rates: Liberian dollars (L\$) per US\$1—1.00 (fixed rate since 1940); unofficial parallel exchange rate of L\$2.5 = US\$1, January 1989

Elections: national elections are indirect through a hierarchy of revolutionary committees
Flag: plain green; green is the traditional color of Islam (the state religion)

Economy

Overview: The socialist-oriented economy depends primarily upon revenues from the oil sector, which contributes virtually all export earnings and over 50% to GNP. Since 1980, however, the sharp drop in oil prices and resulting decline in export revenues has adversely affected economic development. In 1986 per capita GNP was the highest in Africa at \$5,410, but it had been \$2,000 higher in 1982. Severe cutbacks in imports over the past five years have led to shortages of basic goods and foodstuffs, although the reopening of the Libyan-Tunisian border in April 1988 and the Libyan-Egyptian border in December 1989 have somewhat eased shortages. Austerity budgets and a lack of trained technicians have undermined the government's ability to implement a number of planned infrastructure development projects. The nonoil industrial and construction sectors, which account for about 15% of GNP, have expanded from processing mostly agricultural products to include petrochemicals, iron, steel, and aluminum. Although agriculture accounts for less than 5% of GNP, it employs 20% of the labor force. Climatic conditions and poor soils severely limit farm output, requiring Libya to import about 75% of its food requirements.
GNP: \$20 billion, per capita \$5,410; real growth rate 0% (1988 est.)
Inflation rate (consumer prices): 20% (1988 est.)
Unemployment rate: 2% (1988 est.)

Flag: two equal horizontal bands of blue (top) and red with a gold crown on the hoist side of the blue band

Economy

Overview: The prosperous economy is based primarily on small-scale light industry and some farming. Industry accounts for 54% of total employment, the service sector 42% (mostly based on tourism), and agriculture and forestry 4%. The sale of postage stamps to collectors is estimated at \$10 million annually and accounts for 10% of revenues. Low business taxes (the maximum tax rate is 20%) and easy incorporation rules have induced about 25,000 holding or so-called letter box companies to establish nominal offices in Liechtenstein. Such companies, incorporated solely for tax purposes, provide an additional 30% of state revenues. The economy is tied closely to that of Switzerland in a customs union, and incomes and living standards parallel those of the more prosperous Swiss groups.

Flag: three equal horizontal bands of red (top), white, and light blue; similar to the flag of the Netherlands which uses a darker blue and is shorter; design was based on the flag of France

Economy

Overview: The stable economy features moderate growth, low inflation, and negligible unemployment. Agriculture is based on small but highly productive family-owned farms. The industrial sector, until recently dominated by steel, has become increasingly more diversified, particularly toward high-technology firms. During the past decade growth in the financial sector has more than compensated for the decline in steel. Services, especially banking, account for a growing proportion of the economy. Luxembourg participates in an economic union with Belgium on trade and most financial matters and is also closely connected economically with the Netherlands.

Economy

Overview: The economy is based largely on tourism (including gambling), and textile and fireworks manufacturing. Efforts to diversify have spawned other small industries—toys, artificial flowers, and electronics. The tourist sector has accounted for roughly 25% of GDP, and the clothing industry has provided about two-thirds of export earnings. Macau depends on China for most of its food, fresh water, and energy imports. Japan and Hong Kong are the main suppliers of raw materials and capital goods.

Economy

Overview: Madagascar is one of the poorest countries in the world. During the period 1980-85 it had a population growth of 3% a year and a -0.4% GDP growth

rate. Agriculture, including fishing and forestry, is the mainstay of the economy, accounting for over 40% of GDP, employing about 85% of the labor force, and contributing more than 70% to export earnings. Industry is confined to the processing of agricultural products and textile manufacturing; in 1988 it contributed only 16% to GDP and employed 3% of the labor force. Industrial development has been hampered by government policies that have restricted imports of equipment and spare parts and put strict controls on foreign-owned enterprises. In 1986 the government introduced a five-year development plan that stresses self-sufficiency in food (mainly rice) by 1990, increased production for exports, and reduced energy imports.

GDP: \$1.7 billion, per capita \$155; real growth rate 2.2% (1988)

Inflation rate (consumer prices): 17.0% (1988)

Unemployment rate: NA%

Budget: revenues \$337 million; expenditures \$245 million, including capital expenditures of \$163 million (1988)

Exports: \$284 million (f.o.b., 1988); *commodities*—coffee 45%, vanilla 15%, cloves 11%, sugar, petroleum products;

partners—France, Japan, Italy, FRG, US

Imports: \$319 million (f.o.b., 1988); *commodities*—intermediate manufactures

30%, capital goods 28%, petroleum 15%, consumer goods 14%, food 13%;

partners—France, FRG, UK, other EC, US

External debt: \$3.6 billion (1989)

Industrial production: growth rate -3.9 % (1988)

Electricity: 119,000 kW capacity; 430 million kWh produced, 40 kWh per capita (1989)

Industries: agricultural processing (meat canneries, soap factories, brewery, tanneries, sugar refining), light consumer goods industries (textiles, glassware), cement, automobile assembly plant, paper, petroleum

Agriculture: accounts for 40% of GDP; cash crops—coffee, vanilla, sugarcane, cloves, cocoa; food crops—rice, cassava, beans, bananas, peanuts; cattle raising widespread; not self-sufficient in rice and wheat flour

Illicit drugs: illicit producer of cannabis (cultivated and wild varieties) used mostly for domestic consumption

Aid: US commitments, including Ex-Im (FY70-88), \$118 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$2.6 billion; Communist countries (1970-88), \$491 million

Economy

Overview: A landlocked country, Malawi ranks among the world's least developed with a per capita GDP of \$180. The economy is predominately agricultural and operates under a relatively free enterprise environment, with about 90% of the population living in rural areas. Agriculture accounts for 40% of GDP and 90% of export revenues. After two years of weak performance, economic growth improved significantly in 1988 as a result of good weather and a broadly based economic adjustment effort by the government. The closure of traditional trade routes through Mozambique continues to be a constraint on the economy.

GDP: \$1.4 billion, per capita \$180; growth rate 3.6% (1988)

Inflation rate (consumer prices): 31.5% (1988)

Unemployment rate: NA%

Economy

Overview: In 1988-89 booming exports helped Malaysia continue to recover from the severe 1985-86 recession. Real output grew by 8.7% in 1988 and about 7.7% in 1989, helped by vigorous growth in manufacturing output and further increases in foreign direct investment, particularly from Japanese and Taiwanese firms facing higher costs at home. Malaysia has become the world's third-largest producer of semiconductor devices (after the US and Japan) and the world's largest exporter of semiconductor devices. Inflation remained low as unemployment stood at about 8% of the labor force and as the government followed prudent fiscal/monetary policies. The country is not self-sufficient in food, and a majority of the rural population subsists at the poverty level. Malaysia's

high export dependence (merchandise exports are 63% of GDP) leaves it vulnerable to a recession in the OECD countries or a fall in world commodity prices.

GDP: \$37.9 billion, per capita \$2,270; real growth rate 7.7% (1989 est.)

Inflation rate (consumer prices): 3.6% (1989 est.)

Unemployment rate: 7.9% (1989 est.)

Budget: revenues \$8.8 billion; expenditures \$11.2 billion, including capital expenditures of \$2.5 billion (1989 est.)

Exports: \$24 billion (f.o.b., 1989 est.);

commodities—natural rubber, palm oil, tin, timber, petroleum, electronics, light manufactures; *partners*—Singapore, Japan, USSR, EC, Australia, US

Imports: \$20 billion (f.o.b., 1989 est.);

commodities—food, crude oil, consumer goods, intermediate goods, capital equipment, chemicals; *partners*—Japan, Singapore, FRG, UK, Thailand, China, Australia, US

External debt: \$16.3 billion (1989 est.)

Industrial production: growth rate 13.6% (1988)

Electricity: 5,600,000 kW capacity; 16,500 million kWh produced, 990 kWh per capita (1989)

Industries: Peninsular Malaysia—rubber and oil palm processing and manufacturing, light manufacturing industry, electronics, tin mining and smelting, logging and processing timber; Sabah—logging, petroleum production; Sarawak—agriculture processing, petroleum production and refining, logging

Agriculture: Peninsular Malaysia—natural rubber, palm oil, rice; Sabah—mainly subsistence; main crops—rubber, timber, coconut, rice; Sarawak—main crops—rubber, timber, pepper; there is a deficit of rice in all areas; fish catch of 608,000 metric tons in 1987

Economy

Overview: The economy is based on fishing, tourism, and shipping. Agriculture is limited to the production of a few subsistence crops that provide only 10% of food requirements. Fishing is the largest industry, employing 80% of the work force and accounting for over 60% of exports; it is also an important source of government revenue. During the 1980s tourism has become one of the most important and highest growth sectors of the economy. In 1988 industry accounted for about 14% of GDP. Real GDP is officially estimated to have increased by about 10% annually during the period 1974-86, and GDP estimates for 1988 show a further growth of 9% on the strength of a record fish catch and an improved tourist season.

GDP: \$136 million, per capita \$670; real growth rate 9.2% (1988)

Inflation rate (consumer prices): 14% (1988 est.)

Unemployment rate: NA%

Budget: revenues \$51 million; expenditures \$50 million, including capital expenditures of \$25 million (1988 est.)

Exports: \$47.0 million (f.o.b., 1988 est.); *commodities*—fish 57%, clothing 39%; *partners*—Thailand, Western Europe, Sri Lanka

Imports: \$90.0 million (c.i.f., 1988 est.); *commodities*—intermediate and capital goods 47%, consumer goods 42%, petroleum products 11%; *partners*—Japan, Western Europe, Thailand

External debt: \$70 million (December 1988)

Industrial production: growth rate 3.9% (1988 est.)

Electricity: 5,000 kW capacity; 10 million kWh produced, 50 kWh per capita (1989)

Industries: fishing and fish processing, tourism, shipping, boat building, some coconut processing, garments, woven mats, coir (rope), handicrafts

Agriculture: accounts for almost 30% of GDP (including fishing); fishing more important than farming; limited production of coconuts, corn, sweet potatoes; most staple foods must be imported

Aid: US commitments, including Ex-Im (FY70-88), \$28 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$84 million; OPEC bilateral aid (1979-89), \$14 million

Economy

Overview: Significant resources are limestone, a favorable geographic location, and a productive labor force. Malta produces only about 20% of its food needs, has limited freshwater supplies, and has no domestic energy sources. Consequently, the economy is highly dependent on foreign trade and services. Manufacturing and tourism are the largest contributors to the economy. Manufacturing accounts for about 30% of GDP, with the textile and clothing industry a major contributor. In 1988 inflation was held to a low 0.9%. Per capita GDP at \$5,100 places Malta in the middle-income range of the world's nations.

Economy

Overview: Agriculture and tourism are the mainstays of the economy. Agricultural production is concentrated on small farms, and the most important commercial crops are coconuts, tomatoes, melons, and breadfruit. A few cattle ranches supply the domestic meat market. Small-scale industry is limited to handicrafts, fish processing, and copra. The tourist industry is the primary source of foreign exchange and employs about 10% of the labor force. The islands have few natural resources, and imports far exceed exports. In 1987 the *US* Government provided grants of \$40 million out of the Marshallese budget of \$55 million.

GDP: \$63 million, per capita \$1,500; real growth rate NA% (1989 est.)

Economy

Overview: The economy is based on sugarcane, bananas, tourism, and light industry. Agriculture accounts for about 7% of GDP and the small industrial sector for 10%. Sugar production has declined, with most of the sugarcane now used for the production of rum. Banana exports are increasing, however, going mostly to France. The bulk of meat, vegetable, and grain requirements must be imported, contributing to a chronic trade deficit that requires large annual transfers of aid from France. Tourism has become more important than agricultural exports as a source of foreign exchange. The majority of the work force is employed in the service sector and in administration. In 1984 the annual per capita income was relatively high at \$3,650. During 1985 the unemployment rate was between 25% and 30% and was particularly severe among younger workers.
GDP: \$1.3 billion, per capita \$3,650; real growth rate NA% (1984)
Inflation rate (consumer prices): 3.4% (1986)
Unemployment rate: 25-30% (1985)
Budget: revenues \$223 million; expenditures \$223 million, including capital expenditures of \$NA (1987 est.)
Exports: \$209 million (f.o.b., 1986); *commodities*—refined petroleum products, bananas, rum, pineapples; *partners*—France 65%, Guadeloupe 26% (1986)

Imports: \$879 million (c.i.f., 1986); *commodities*—petroleum products, foodstuffs, construction materials, vehicles, clothing and other consumer goods; *partners*—France 64% (1986)
External debt: \$NA
Industrial production: growth rate NA%
Electricity: 108,000 kW capacity; 330 million kWh produced, 990 kWh per capita (1989)
Industries: construction, rum, cement, oil refining, sugar, tourism
Agriculture: accounts for about 7% of GDP; principal crops—pineapples, avocados, bananas, flowers, vegetables, and sugarcane for rum; dependent on imported food, particularly meat and vegetables

Economy

Overview: A majority of the population still depends on agriculture and livestock for a livelihood, even though most of the nomads and many subsistence farmers were forced into the cities by recurrent drought in 1983. Mauritania has extensive deposits of iron ore that account for almost 50% of total exports. The decline in world demand for this ore, however, has led to cutbacks in production in recent years. The nation's coastal waters are among the richest fishing areas in the world, but overexploitation by foreigners threatens this key source of revenue. The country's first deepwater port opened near Nouakchott in 1986.

GDP: \$1.0 billion, per capita \$520; real growth rate 3.6% (1988)

Inflation rate (consumer prices): 1.4% (1988 est.)

Economy

Overview: Mexico's economy is a mixture of state-owned industrial plants (notably oil), private manufacturing and services, and both large-scale and traditional agriculture. In the 1980s Mexico experienced severe economic difficulties: the nation accumulated large external debts as world petroleum prices fell; rapid population growth outstripped the domestic food supply; and inflation, unemployment, and pressures to emigrate became more acute. Growth in national output dropped from 8% in 1980 to 1.1% in 1988 and 2.5% in 1989. The US is Mexico's major trading partner, accounting for two-thirds of its exports and imports. After petroleum, border assembly plants and tourism are the largest earners of foreign exchange. The government, in consultation with international economic agencies, is implementing programs to stabilize the economy and foster growth.

Economy

Overview: Financial assistance from the US is the primary source of revenue, with the US pledged to spend \$1 billion in the islands in the 1990s. Micronesia also earns about \$4 million a year in fees from foreign commercial fishing concerns. Economic activity consists primarily of subsistence farming and fishing. The islands have few mineral deposits worth exploiting, except for high-grade phosphate. The potential for a tourist industry exists, but the remoteness of the location and a lack of adequate facilities hinder development; note—GNP numbers reflect US spending. GNP: \$150 million, per capita \$1,500; real growth rate NA% (1989 est.)

Inflation rate (consumer prices): NA%

Unemployment rate: 80%

Budget: revenues \$110.8 million; expenditures NA, including capital expenditures of NA (1987 est.)

External debt: \$NA

Industrial production: growth rate NA%
Electricity: 15,000 kW capacity; 35 million kWh produced, 340 kWh per capita (1989)

Industries: tourism, craft items from shell, wood, and pearl

Agriculture: mainly a subsistence economy; copra, black pepper; tropical fruits and vegetables, coconuts, cassava, sweet potatoes, pigs, chickens

Aid: under terms of the Compact of Free Association, the US will provide \$1.3 billion in grant aid during the period 1986-2001

Economy

Overview: No data are published on the economy. Monaco, situated on the French

Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. The Principality has successfully sought to diversify into services and small, high-value-added, non-polluting industries. The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies that have set up businesses and offices. About 50% of Monaco's annual revenue comes from value-added taxes on hotels, banks, and the industrial sector; about 25% of revenue comes from tourism. Living standards are high, that is, roughly comparable to those in prosperous French metropolitan suburbs.

Economy

Overview: After registering a robust 10% growth in 1988, the economy slowed in 1989 because of higher prices for food and oil imports, lower worker remittances, and a trade dispute with India over phosphoric acid prices that cost Rabat \$500 million. To meet the foreign payments shortfall, Rabat has been drawing down foreign exchange reserves. Servicing the \$22 billion foreign debt, high unemployment, and Morocco's vulnerability to external forces remain severe problems for the 1990s.

Economy

Overview: One of Africa's poorest countries, with a per capita GDP of little more than \$100, Mozambique has failed to exploit the economic potential of its sizable agricultural, hydropower, and transportation resources. Indeed, national output, consumption, and investment declined throughout the first half of the 1980s because of internal disorders, lack of government administrative control, and a growing foreign debt. A sharp increase in foreign aid, attracted by an economic reform policy, has resulted in successive years of economic growth since 1985. Agricultural output, nevertheless, is only at about 75% of its 1981 level, and grain has to be imported. Industry operates at only 20-40% of capacity. The economy depends heavily on foreign assistance to keep afloat.

GDP: \$1.6 billion, per capita less than \$110; real growth rate 5.0% (1988)

Inflation rate (consumer prices): 81.1% (1988)

Unemployment rate: 40.0 (1988)

Budget: revenues \$186 million; expenditures \$239 million, including capital expenditures of \$208 million (1988 est.)

Exports: \$100 million (f.o.b., 1988); *commodities*—shrimp 48%, cashews 21%, sugar 10%, copra 3%, citrus 3%;

partners—US, Western Europe, GDR, Japan

Imports: \$764 million (c.i.f., 1988), including aid; *commodities*—food, clothing, farm equipment, petroleum; *partners*—US, Western Europe, USSR

External debt: \$4.4 billion (1988)

Industrial production: growth rate 7% (1989 est.)

Electricity: 2,265,000 kW capacity; 1,740 million kWh produced, 120 kWh per capita (1989)

Industries: food, beverages, chemicals (fertilizer, soap, paints), petroleum products, textiles, nonmetallic mineral products (cement, glass, asbestos), tobacco

Agriculture: accounts for 50% of GDP, over 80% of labor force, and about 90% of exports; cash crops—cotton, cashew nuts, sugarcane, tea, shrimp; other crops—cassava, corn, rice, tropical fruits; not self-sufficient in food

Aid: US commitments, including Ex-Im (FY70-88), \$282 million; Western (non-US) countries, ODA and OOF bilateral

commitments (1970-87), \$3.1 billion; OPEC bilateral aid (1979-89), \$37 million; Communist countries (1970-88), \$887 million

Economy

Overview: The economy is heavily dependent on the mining industry to extract and process minerals for export. Mining accounts for almost 35% of GDP, agriculture and fisheries 10-15%, and manufacturing about 5%. Namibia is the fourth-largest exporter of nonfuel minerals in Africa and the world's fifth-largest producer of uranium. Alluvial diamond deposits are among the richest in the world, making Namibia a primary source for gem-quality diamonds. Namibia also produces large quantities of lead, zinc, tin, silver, and tungsten, and it has substantial resources of coal.

GNP: \$1.54 billion, per capita \$1,245; real growth rate 2.9% (1987)

Inflation rate (consumer prices): 15.1% (1989)

Unemployment rate: over 30% (1988)

Budget: revenues \$781 million; expenditures \$932 million, including capital expenditures of \$NA (FY88)

Exports: \$935 million (f.o.b., 1988); *commodities*—diamonds, uranium, zinc, copper, meat, processed fish, karakul skins; *partners*—South Africa

Imports: \$856 million (f.o.b., 1988); *commodities*—foodstuffs, manufactured consumer goods, machinery and equipment; *partners*—South Africa, FRG, UK, US

External debt: about \$27 million at independence; under a 1971 International Court of Justice (ICJ) ruling, Namibia may not be liable for debt incurred during its colonial period

Industrial production: growth rate NA%

Electricity: 486,000 kW capacity; 1,280 million kWh produced, 930 kWh per capita (1989)

Industries: meatpacking, fish processing, dairy products, mining (copper, lead, zinc, diamond, uranium)

Agriculture: accounts for 10% of GDP (including fishing); mostly subsistence farming; livestock raising major source of cash

income; crops—millet, sorghum, peanuts; fish catch potential of over 1 million metric tons not being fulfilled, 1987 catch reaching only 520,000 metric tons; not self-sufficient in food

2000. Phosphates have given Nauruans one of the highest per capita incomes in the Third World—\$10,000 annually. Few other resources exist so most necessities must be imported, including fresh water from Australia. The rehabilitation of mined land and the replacement of income from phosphates constitute serious long-term problems. Substantial investment in trust funds, out of phosphate income, will help cushion the transition.

Economy

Overview: Nepal is among the poorest and least developed countries in the world with a per capita income of only \$158. Real growth averaged 4% in the 1980s until FY89, when it plunged to 1.5% because of the ongoing trade/transit dispute with India. Agriculture is the mainstay of the economy, providing a livelihood for over 90% of the population and accounting for 60% of GDP and about 75% of exports. Industrial activity is limited, and what there is involves the processing of agricultural produce (jute, sugarcane, tobacco, and grain). Apart from agricultural land and forests, the only other exploitable natural resources are mica, hydropower, and tourism. Despite considerable investment in the agricultural sector, production in the 1980s has not kept pace with the population growth of 2.7%, which has led to a reduction in exportable surpluses and balance-of-payments difficulties. Economic prospects for the 1990s remain grim.
GDP: \$2.9 billion, per capita \$158; real growth rate 1.5% (FY89)

Inflation rate (consumer prices): 8.1% (FY89 est.)

Unemployment rate: 5%; underemployment estimated at 25-40% (1987)

Nepal (continued)

Budget: revenues \$296 million; expenditures \$635 million, including capital expenditures of \$394 million (FY89 est.)
Exports: \$374 million (f.o.b., FY89 est.), but does not include unrecorded border trade with India; *commodities*—clothing, carpets, leather goods, grain; *partners*—India 38%, US 23%, UK 6%, other Europe 9% (FY88)

Imports: \$724 million (c.i.f., FY89 est.); *commodities*—petroleum products 20%, fertilizer 11%, machinery 10%; *partners*—India 36%, Japan 13%, Europe 4%, US 1% (FY88)

External debt: \$1.3 billion (December 1989 est.)

Industrial production: growth rate -4.5% (FY89 est.)

Electricity: 205,000 kW capacity; 535 million kWh produced, 30 kWh per capita (1989)

Industries: small rice, jute, sugar, and oil-seed mills; cigarette, textiles, cement, brick; tourism

Agriculture: accounts for 60% of GDP and 90% of work force; farm products—rice, corn, wheat, sugarcane, root crops, milk, buffalo meat; not self-sufficient in food, particularly in drought years

Illicit drugs: illicit producer of cannabis for the domestic and international drug markets

Aid: US commitments, including Ex-Im (FY70-88), \$285 million; Western (non-US) countries, ODA and OOF bilateral commitments (1980-87), \$1.8 billion; OPEC bilateral aid (1979-89), \$30 million; Communist countries (1970-88), \$273 million

Currency: Nepalese rupee (plural—rupees); 1 Nepalese rupee (NR) = 100 paisa

Exchange rates: Nepalese rupees (NRs) per US\$1—28.559 (January 1990), 27.189 (1989), 23.289 (1988), 21.819 (1987), 21.230 (1986), 18.246 (1985)

Fiscal year: 16 July-15 July

Communications

Railroads: 52 km (1985), all 0.762-meter narrow gauge; all in Tarai close to Indian border; 10 km from Raxaul to Birganj is government owned

Highways: 5,958 km total (1986); 2,645 km paved, 815 km gravel or crushed stone, 2,257 km improved and unimproved earth; also 241 km of seasonally motorable tracks

Civil air: 5 major and 11 minor transport aircraft

Airports: 38 total, 38 usable; 5 with permanent-surface runways; none with runways over 3,659 m; 1 with runways 2,440-3,659 m; 9 with runways 1,220-2,439 m

Telecommunications: poor telephone and telegraph service; fair radio communication and broadcast service; international radio communication service is poor; 30,000 telephones (1987); stations—4 AM, no FM, 1 TV; 1 Indian Ocean INTELSAT earth station

Defense Forces

Branches: Royal Nepalese Army, Royal Nepalese Army Air Service, Nepalese Police Force

Military manpower: males 15-49, 4,531,660; 2,347,412 fit for military service; 225,349 reach military age (17) annually

Defense expenditures: 2% of GDP, or \$58 million (1989 est.)

Economy

Overview: This highly developed and affluent economy is based on private enterprise. The government makes its presence felt, however, through many regulations, permit requirements, and welfare programs affecting most aspects of economic activity. The trade and financial

services sector contributes over 50% of GDP. Industrial activity, including construction, provides about 25% of GDP, and is led by the food-processing, oil-refining, and metal-working industries. The highly mechanized agricultural sector employs only 6% of the labor force, but provides large surpluses for export and the domestic food-processing industry. An unemployment rate of over 8.6% and a sizable budget deficit are currently the most serious economic problems.
GDP: \$205.9 billion, per capita \$13,900; real growth rate 4.2% (1989 est.)
Inflation rate (consumer prices): 1.5% (1989 est.)
Unemployment rate: 8.6% (1989 est.)

Economy

Overview: Tourism, petroleum refining, and offshore finance are the mainstays of the economy. The islands enjoy a comparatively high per capita income and a well-developed infrastructure compared with other countries in the region. Unlike many Latin American countries, the Netherlands Antilles has avoided large international debt. Almost all consumer and capital goods are imported, with the US being the major supplier. The economy has suffered somewhat in recent years because of the depressed state of the world oil market and declining tax revenues. In 1983 the drop in oil prices led to the devaluation of the Venezuelan bolivar, which ended a substantial flow of Venezuelan tourists to the islands. As a result of a decline in tax

revenues, the government has been seeking financial support from the Netherlands.

Economy

Overview: Since 1984 the government has been reorienting an agrarian economy dependent on a guaranteed British market to

an open free market economy that can compete on the global scene. The government has hoped that dynamic growth would boost real incomes, reduce inflationary pressures, and permit the expansion of welfare benefits. The results have been mixed: inflation is down from double-digit levels but growth has been sluggish and unemployment, always a highly sensitive issue, has been at a record high 7.4%. In 1988 GDP fell by 1% and in 1989 grew by a moderate 2.4%.
GDP: \$39.1 billion, per capita \$11,600; real growth rate 2.4% (1989 est.)

Economy

Overview: Government control of the economy historically has been extensive, although the new government has pledged to reduce it. The financial system is directly controlled by the state, which also regulates wholesale purchasing, production, sales, foreign trade, and distribution of most goods. Over 50% of the agricultural and industrial firms are state owned. Sandinista economic policies and the war have produced a severe economic crisis. The foundation of the economy continues to be the export of agricultural commodities, largely coffee and cotton. Farm production fell by roughly 7% in 1989, the fifth successive year of decline. The agricultural sector employs 44% of the work force and accounts for 23% of GDP and 86% of export earnings. Industry, which employs 13% of the work force and contributes 26% to GDP, showed a sharp drop of -23% in 1988 and remains below pre-1979 levels. External debt is one of the highest in the world on a per capita basis. In 1989 the annual inflation rate was 1,700%, down from a record 16,000% in 1988. Shortages of basic consumer goods are widespread.

GDP: \$1.7 billion, per capita \$470; real growth rate -5.0% (1989 est.)

Inflation rate (consumer prices): 1,700% (1989)

Unemployment rate: 25% (1989)

Budget: revenues \$0.9 billion; expenditures \$1.4 billion, including capital expenditures of \$0.15 billion (1987)

Exports: \$250 million (f.o.b., 1989 est.); *commodities*—coffee, cotton, sugar, ba-

nanas, seafood, meat, chemicals; *partners*—CEMA 15%, OECD 75%, others 10%

Imports: \$550 million (c.i.f., 1989 est.); *commodities*—petroleum, food, chemicals, machinery, clothing; *partners*—CEMA 55%, EC 20%, Latin America 10%, others 10%

External debt: \$8 billion (year end 1988)

Industrial production: growth rate -23% (1988 est.)

Economy

Overview: About 90% of the population is engaged in farming and stock rearing, activities which generate almost half of the national income. The economy also depends heavily on exploitation of large uranium deposits. Uranium production grew rapidly in the mid-1970s, but tapered off in the early 1980s, when world prices declined. France is a major customer, while FRG, Japan, and Spain also make regular purchases. The depressed demand for uranium has contributed to an overall sluggishness in the economy, a severe trade imbalance, and a mounting external debt. **GDP:** \$2.4 billion, per capita \$330; real growth rate 7.1% (1988 est.)

Inflation rate (consumer prices): -1.4% (1988)

Unemployment rate: NA%

Budget: revenues \$254 million; expenditures \$510 million, including capital expenditures of \$239 million (1988 est.)

Exports: \$371 million (f.o.b., 1988 est.); **commodities**—uranium 76%, livestock, cowpeas, onions, hides, skins; **partners**—NA

Imports: \$441 million (c.i.f., 1988 est.); **commodities**—petroleum products, primary materials, machinery, vehicles and parts, electronic equipment, pharmaceuticals, chemical products, cereals, foodstuffs
External debt: \$1.8 billion (December 1989 est.)

Industrial production: growth rate 4.7% (1989 est.)

Electricity: 102,000 kW capacity; 225 million kWh produced, 30 kWh per capita (1989)

Industries: cement, brick, rice mills, small cotton gins, oilseed presses, slaughterhouses, and a few other small light industries; uranium production began in 1971
Agriculture: accounts for roughly 40% of GDP and 90% of labor force; cash crops—cowpeas, cotton, peanuts; food crops—millet, sorghum, cassava, rice; livestock—cattle, sheep, goats; self-sufficient in food except in drought years

Aid: US commitments, including Ex-Im (FY70-88), \$349 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$2.8 billion; OPEC bilateral aid (1979-89), \$504 million; Communist countries (1970-88), \$61 million

Economy

Overview: In 1989, despite rising oil prices, the economic performance failed to meet government expectations because of higher inflationary pressures fueled by a relatively poor agricultural performance. Agricultural production was up only 4% following a 10% decline in 1988, and manufacturing remained below the 1985 level with only a 6% increase. The government is continuing an economic adjustment program to reduce Nigeria's dependence on oil and to help create a basis for sustainable noninflationary growth.
GNP: \$30.0 billion, per capita \$270; real growth rate 4% (1989)
Inflation rate (consumer prices): 47.5% (1989)
Unemployment rate: 7.5% (1988 est.)
Budget: revenues \$6.5 billion; expenditures \$7.4 billion, including capital expenditures of \$1.9 billion (1988 est.)
Exports: \$8.4 billion (f.o.b., 1989 est.); *commodities*—oil 95%, cocoa, palm kernels, rubber; *partners*—EC 51%, US 32%

Economy

Overview: The economy is heavily dependent on aid from New Zealand. Government expenditures regularly exceed revenues, with the shortfall made up by grants from New Zealand—the grants are used to pay wages to the 80% or more of the work force employed in public service.

The agricultural sector consists mainly of subsistence gardening, although some cash crops are grown for export. Industry consists primarily of small factories to process passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue. The island in recent years has suffered a serious loss of population because of migration of Niueans to New Zealand.

Economy

Overview: The primary economic activity is tourism, which has brought a level of prosperity unusual among inhabitants of the Pacific Islands. The number of visitors has increased steadily over the years and reached almost 30,000 in 1986. Revenues from tourism have given the island a favorable balance of trade and helped the

agricultural sector to become self-sufficient in the production of beef, poultry, and eggs.

Economy

Overview: The economy benefits substantially from financial assistance from the US. An agreement for the years 1986 to 1992 entitles the islands to \$228 million for capital development, government operations, and special programs. Another major source of income is the tourist industry, which employs about 10% of the work force. The agricultural sector is made up of cattle ranches and small farms producing coconuts, breadfruit, tomatoes, and melons. Industry is small scale in nature—mostly handicrafts and fish processing.
GNP: \$165 million, per capita \$9,170; real growth rate NA% (1982)
Inflation rate (consumer prices): NA%

Economy

Overview: Norway is a prosperous capital-ist nation with the resources to finance extensive welfare measures. Since 1975 exploitation of large crude oil and natural gas reserves has helped achieve an average annual growth of roughly 4%, the third-highest among OECD countries. Growth slackened in 1987-88 because of the sharp drop in world oil prices and a slowdown in consumer spending, but picked up again in 1989. Future economic issues involve the aging of the population, the increased economic integration of Europe, and the balance between private and public influence in economic decisions.

GDP: \$75.8 billion, per capita \$17,900; real growth rate 5.7% (1989 est.)

Inflation rate (consumer prices): 4.5% (1989)

Unemployment rate: 3.9% (1989 est., excluding people in job-training programs)

Budget: revenues \$40.6 billion; expenditures \$41.3 billion, including capital expenditures of SNA (1989)

Exports: \$22.2 billion (f.o.b., 1989); *commodities*—petroleum and petroleum products 25%, natural gas 11%, fish 7%, aluminum 6%, ships 3.5%, pulp and paper; *partners*—UK 26%, EFTA 16.3%, less developed countries 14%, Sweden 12%, FRG 12%, US 6%, Denmark 5% (1988)

Imports: \$18.7 billion (c.i.f., 1989); *commodities*—machinery, fuels and lubricants, transportation equipment, chemicals, foodstuffs, clothing, ships; *partners*—Sweden 18%, less developed countries 18%, FRG 14%, Denmark 8%, UK 7%, US 7%, Japan 5% (1988)

External debt: \$18.3 billion (December 1989)

Industrial production: growth rate 15.8% (1989)

Electricity: 26,735,000 kW capacity; 121,685 million kWh produced, 28,950 kWh per capita (1989)

Industries: petroleum and gas, food processing, shipbuilding, pulp and paper products, metals, chemicals, timber, mining, textiles, fishing

Agriculture: accounts for 3.1% of GNP and 6.5% of labor force; among world's top 10 fishing nations; livestock output exceeds value of crops; over half of food needs imported; fish catch of 1.9 million metric tons in 1987

Aid: donor—ODA and OOF commitments (1970-87), \$3.7 billion

Currency: Norwegian krone (plural—kroner); 1 Norwegian krone (Nkr) = 100 ore

Exchange rates: Norwegian kroner (Nkr) per US\$1—6.5405 (January 1990), 6.9045 (1989), 6.5170 (1988), 6.7375 (1987), 7.3947 (1986), 8.5972 (1985)

Economy

Overview: Economic performance is closely tied to the fortunes of the oil industry. Petroleum accounts for nearly all export earnings, about 70% of government revenues, and more than 50% of GDP. Oman has proved oil reserves of 4 billion barrels, equivalent to about 20 years' supply at the current rate of extraction. Although agriculture employs a majority of the population, urban centers depend on imported food.

Pacific Ocean

Geography

Total area: 165,384,000 km²; includes Arafura Sea, Banda Sea, Bellingshausen Sea, Bering Sea, Bering Strait, Coral Sea, East China Sea, Gulf of Alaska, Makassar Strait, Philippine Sea, Ross Sea, Sea of Japan, Sea of Okhotsk, South China Sea, Tasman Sea, and other tributary water bodies

Comparative area: slightly less than 18 times the size of the US; the largest ocean (followed by the Atlantic Ocean, Indian Ocean, and Arctic Ocean); covers about one-third of the global surface; larger than the total land area of the world

Coastline: 135,663 km

Climate: the western Pacific is monsoonal—a rainy season occurs during the summer months, when moisture-laden winds blow from the ocean over the land, and a dry season during the winter months, when dry winds blow from the Asian land mass back to the ocean

Terrain: surface in the northern Pacific dominated by a clockwise, warm water gyre (broad, circular system of currents) and in the southern Pacific by a counter-clockwise, cool water gyre; sea ice occurs in the Bering Sea and Sea of Okhotsk during winter and reaches maximum northern extent from Antarctica in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches; the world's greatest depth is 10,924 meters in the Marianas Trench

Natural resources: oil and gas fields, poly-metallic nodules, sand and gravel aggregates, placer deposits, fish

Environment: endangered marine species include the dugong, sea lion, sea otter, seals, turtles, and whales; oil pollution in Philippine Sea and South China Sea; dotted with low coral islands and rugged volcanic islands in the southwestern Pacific Ocean; subject to tropical cyclones (typhoons) in southeast and east Asia from May to December (most frequent from July to October); tropical cyclones (hurricanes) may form south of Mexico and strike Central America and Mexico from June to October (most common in August and September); southern shipping lanes subject to icebergs from Antarctica; occasional El Niño phenomenon occurs off the coast of Peru when the trade winds slacken and the warm Equatorial Countercurrent moves south, which kills the plankton that is the primary food source for anchovies; consequently, the anchovies move to better feeding grounds, causing resident marine birds to starve by the thousands because of their lost food source

Note: the major choke points are the Bering Strait, Panama Canal, Luzon Strait, and the Singapore Strait; the Equator divides the Pacific Ocean into the North Pacific Ocean and the South Pacific Ocean; ships subject to superstructure icing in extreme north from October to May and in extreme south from May to October; persistent fog in the northern Pacific from June to December is a hazard to shipping; surrounded by a zone of violent volcanic and earthquake activity sometimes referred to as the Pacific Ring of Fire

Economy

Overview: The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It provides cheap sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In 1985 over half (54%) of the world's total fish catch came from the Pacific Ocean, which is the only ocean where the fish catch has increased every year since 1978. Exploitation of offshore oil and gas reserves is playing an ever increasing role in the energy supplies of Australia, New Zealand, China, US, and Peru. The high cost of recovering offshore oil and gas, combined with the lower world prices for oil since 1985, has slowed but not stopped new drillings.

Disputes: boundary with India; Pashtun question with Afghanistan; Baloch question with Afghanistan and Iran; water sharing problems with upstream riparian India over the Indus
Climate: mostly hot, dry desert; temperate in northwest; arctic in north
Terrain: flat Indus plain in east; mountains in north and northwest; Balochistan plateau in west
Natural resources: land, extensive natural gas reserves, limited crude oil, poor quality coal, iron ore, copper, salt, limestone
Land use: 26% arable land; NEGL% permanent crops; 6% meadows and pastures; 4% forest and woodland; 64% other; includes 19% irrigated
Environment: frequent earthquakes, occasionally severe especially in north and west; flooding along the Indus after heavy rains (July and August); deforestation; soil erosion; desertification; water logging
Note: controls Khyber Pass and Malakand Pass, traditional invasion routes between Central Asia and the Indian Subcontinent

Economy

Overview: Pakistan is a poor Third World country faced with the usual problems of rapidly increasing population, sizable government deficits, and heavy dependence on foreign aid. In addition, the economy must support a large military establishment and provide for the needs of 4 million Afghan refugees. A real economic growth rate averaging 5-6% in recent years has enabled the country to cope with these problems. Almost all agriculture and small-scale industry is in private hands, and the government seeks to privatize a portion of the large-scale industrial enterprises now publicly owned. In December 1988, Pakistan signed a three-year economic reform agreement with the IMF, which provides for a reduction in the government deficit and a liberalization of trade in return for further IMF financial support. The so-called Islamization of the economy has affected mainly the financial sector; for example, a prohibition on certain types of interest payments. Pakistan almost certainly will make little headway against its population problem; at the current rate of growth, population would double in 32 years.

Economy

Overview: The GDP contracted an estimated 7.5% in 1989, following a drop of 20% in 1988. Political instability, lack of credit, and the erosion of business confidence prompted declines of 20-70% in the financial, agricultural, commercial, manufacturing, and construction sectors between 1987 and 1989. Transits through the Panama Canal were off slightly, as were toll revenues. Unemployment remained about 23% during 1989. Imports of foodstuffs and crude oil increased during 1989, but capital goods imports continued their slide. Exports were widely promoted by Noriega trade delegations, but sales abroad remained stagnant.

Economy

Overview: Papua New Guinea is richly endowed with natural resources, but exploitation has been hampered by the rugged terrain and the high cost of developing an infrastructure. Agriculture provides a subsistence livelihood for more than half of the population. Mining of numerous deposits, including copper and gold, accounts for about 60% of export earnings. Budgetary support from Australia and development aid under World Bank auspices help sustain the economy.

GDP: \$3.26 billion, per capita \$890; real growth rate 1.2% (1988 est.)

Inflation rate (consumer prices): 5% (1988 est.)

Unemployment rate: 5% (1988)

Budget: revenues \$962 million; expenditures \$998 million, including capital expenditures of \$169 million (1988)

Exports: \$1.4 billion (f.o.b., 1988); *commodities*—gold, copper ore, coffee, copra, palm oil, timber, lobster; *partners*—FRG, Japan, Australia, UK, Spain, US

Imports: \$1.2 billion (f.o.b., 1988); *commodities*—machinery and transport equipment, fuels, food, chemicals, consumer goods; *partners*—Australia, Singapore, Japan, US, New Zealand, UK

External debt: \$2.5 billion (December 1988)

Industrial production: growth rate NA%

Electricity: 397,000 kW capacity; 1,510 million kWh produced, 400 kWh per capita (1989)

Industries: copra crushing, oil palm processing, plywood processing, wood chip production, gold, silver, copper, construction, tourism

Agriculture: one-third of GDP; livelihood for 85% of population; fertile soils and favorable climate permits cultivating a wide variety of crops; cash crops—coffee, cocoa, coconuts, palm kernels; other products—tea, rubber, sweet potatoes, fruit, vegetables, poultry, pork; net importer of food for urban centers

Aid: US commitments, including Ex-Im (FY70-87), \$38.8 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$5.8 billion; OPEC bilateral aid (1979-89), \$17 million

Economy

Overview: The economy is predominantly agricultural. Agriculture, including forestry, accounts for about 25% of GNP, employs about 45% of the labor force, and provides the bulk of exports. Paraguay has

no known significant mineral or petroleum resources, but does have a large hydro-power potential. Since 1981 economic performance has declined compared with the boom period of 1976-81, when real GDP grew at an average annual rate of nearly 11%. During 1982-86 real GDP fell three out of five years, inflation jumped to an annual rate of 32%, and foreign debt rose. Factors responsible for the erratic behavior of the economy were the completion of the Itaipu hydroelectric dam, bad weather for crops, and weak international commodity prices for agricultural exports. In 1987 the economy experienced a modest recovery because of improved weather conditions and stronger international prices for key agricultural exports. The recovery continued through 1988, with a bumper soybean crop and record cotton production. The government, however, must follow through on promises of reforms needed to deal with large fiscal deficits, growing debt arrearages, and falling reserves.

GDP: \$8.9 billion, per capita \$1,970; real growth rate 5.2% (1989 est.)

Economy

Overview: The economy is verging on hyperinflation and economic activity is contracting rapidly. Deficit spending is at the root of domestic economic problems, but poor relations with international lenders—the result of curtailing debt payments since 1985—are preventing an inflow of funds to generate a recovery. Reduced standards of living have increased labor tensions, and strikes, particularly in the key mining sector, have cut production and exports. Foreign exchange shortages have forced reductions in vital consumer imports such as food and industrial inputs. Peru is the world's leading producer of coca, from which the drug cocaine is produced.

GDP: \$18.9 billion, per capita \$880; real growth rate -12.2% (1989 est.)

Inflation rate (consumer prices): 2,775% (1989)

Economy

Overview: The economy, except for the agricultural sector, had followed the Soviet model of state ownership and control of the country's productive assets. About 75% of agricultural production had come from the private sector and the rest from state farms. The economy has presented a picture of moderate but slowing growth against a background of underlying weaknesses in technology and worker motivation. GNP increased between 3% and 6% annually during the period 1983-1986, but grew only 2.5% and 2.1% in 1987 and 1988, respectively. Output dropped by 1.5% in 1989. The inflation rate, after falling sharply from the 1982 peak of 100% to 22% in 1986, rose to a galloping rate of 640% in 1989. Shortages of consumer goods and some food items worsened in 1988-89. Agricultural products and coal have remained the biggest hard currency earners, but manufactures are increasing in importance. Poland, with its hard currency debt of approximately \$40 billion, is severely limited in its ability to import much-needed hard currency goods. The sweeping political changes of 1989 disrupted normal economic channels and exacerbated shortages. In January 1990, the new Solidarity-led government adopted a cold turkey program for transforming Poland to a market economy. The government moved to eliminate subsidies, end artificially low prices, make the złoty convertible, and, in general, halt the hyperinflation. These financial measures are accompanied by plans to privatize the economy in stages. Substantial outside aid will be needed if Poland is to make a successful transition in the 1990s.

GNP: \$172.4 billion, per capita \$4,565; real growth rate —1.6% (1989 est.)

Economy

Overview: During the past four years, the economy has made a sustained recovery from the severe recession of 1983-85. The economy grew by 4.7% in 1987, 4.1% in 1988, and 3.5% in 1989, largely because

of strong domestic consumption and investment spending. Unemployment has declined for the third consecutive year, but inflation continues to be about three times the European Community average. The government is pushing economic restructuring and privatization measures in anticipation of the 1992 European Community timetable to form a single large market in Europe.

GDP: \$72.1 billion, per capita \$6,900; real growth rate 3.5% (1989 est.)

Inflation rate (consumer prices): 11.8% (1989 est.)

Unemployment rate: 5.9% (1989 est.)

Budget: revenues \$19.0 billion; expenditures \$22.2 billion, including capital expenditures of \$3.1 billion (1989 est.)

Exports: \$11.0 billion (f.o.b., 1988); *commodities*—cotton textiles, cork and cork products, canned fish, wine, timber and timber products, resin, machinery, appliances; *partners*—EC 72%, other developed countries 13%, US 6%

Economy

Overview: Puerto Rico has one of the most dynamic economies in the Caribbean region. Industry has surpassed agriculture as the primary sector of economic activity and income. Encouraged by duty-free access to the US and by tax incentives, US firms have invested heavily in Puerto Rico since the 1970s. Important new industries include pharmaceuticals, electronics, textiles, petrochemicals, and processed foods. Sugar production has lost out to dairy production and other livestock products as the main source of income in the agricultural sector. Tourism has traditionally been an important source of income for the island.

GNP: \$18.4 billion, per capita \$5,574; real growth rate 4.9% (FY88)

Communists: Communist party small but has support among sugarcane cutters, the minuscule Popular Movement for the Liberation of Reunion (MPLR), and in the district of Le Port

Member of: WFTU

Diplomatic representation: as an overseas department of France, Reunionese interests are represented in the US by France

Flag: the flag of France is used

Economy

Overview: The economy has traditionally been based on agriculture. Sugarcane has been the primary crop for more than a century, and in some years it accounts for 85% of exports. The government is pushing the development of a tourist industry to relieve a high unemployment rate that was over 30% in 1986. The economic well-being of Reunion depends heavily on continued financial assistance from France.

GDP: \$2.4 billion, per capita \$4,290 (1985); real growth rate 9% (1987 est.)

Inflation rate (consumer prices): 2.8% (1987)

Flag: three equal vertical bands of blue (hoist side), yellow, and red; the national coat of arms that used to be centered in the yellow band, has been removed; now similar to the flags of Andorra and Chad

Economy

Overview: Industry, which accounts for one-third of the labor force and generates over half the GNP, suffers from an aging capital plant and persistent shortages of energy. In recent years the agricultural sector has had to contend with drought, mismanagement, and shortages of inputs. Favorable weather in 1989 helped produce a good harvest, although far below gov-

ernment claims. The new government is slowly loosening the tight central controls of Ceaușescu's command economy. It has instituted moderate land reforms, with close to one-third of cropland now in private hands, and it has allowed changes in prices for private agricultural output.

Also, the new regime is permitting the establishment of private enterprises of 20 or fewer employees in services, handicrafts, and small-scale industry. Furthermore, the government has halted the old policy of diverting food from domestic consumption to hard currency export markets. So far, the government does not seem willing to adopt a thorough-going market system.

GNP: \$79.8 billion, per capita \$3,445; real growth rate -1.5% (1989 est.)

Flag: three equal vertical bands of red (hoist side), yellow, and green with a large black letter *R* centered in the yellow band; uses the popular pan-African colors of Ethiopia; similar to the flag of Guinea, which has a plain yellow band

Economy

Overview: About 40% of GDP comes from the agricultural sector; coffee and tea make up 80-90% of total exports. The amount of fertile land is limited, however, and deforestation and soil erosion have created problems. The industrial sector in Rwanda is small, contributing less than 20% to GDP. Manufacturing focuses mainly on the processing of agricultural products. The Rwandan economy remains dependent on coffee exports and foreign aid, with no relief in sight. Weak international prices since 1986 have caused the economy to contract and per capita GDP to decline.

Economy

Overview: Since 1983 the economy has shown an impressive average annual growth rate of almost 5% because of strong agricultural and tourist industry sectors. There is also an expanding industrial base supported by foreign investment in manufacturing and other activities, such as in data processing. The economy, however, remains vulnerable because the important agricultural sector is dominated by banana production. St. Lucia is subject to periodic droughts and/or tropical storms, and its protected market agreement with the UK for bananas may end in 1992.

Economy

Overview: The inhabitants have traditionally earned their livelihood by fishing and by servicing fishing fleets operating off the coast of Newfoundland. The economy has been declining, however, because the number of ships stopping at St. Pierre has steadily dropped over the years. In March 1989, an agreement between France and Canada set fish quotas for St. Pierre's trawlers fishing in Canadian and Canadian-claimed waters for three years. The agreement settles a longstanding dispute that had virtually brought fish exports to a halt. The islands are heavily subsidized by France. Imports come primarily from Canada.

Economy

Overview: Agriculture, dominated by banana production, is the most important sector of the economy, providing employment for over 60% of the labor force and

contributing about 20% to GDP. The services sector is next in importance, based mostly on a growing tourist industry. The economy continues to have a high unemployment rate of 30% because of an overdependence on the weather-plagued banana crop as a major export earner.

Government progress toward diversifying into new industries has been relatively unsuccessful.

GDP: \$136 million, per capita \$1,305; real growth rate 8.4% (1988)

Economy

Overview: The economy relies heavily on the tourist industry as a source of revenue. More than 2 million tourists visit each year, contributing about 60% to GDP. The sale of postage stamps to foreign collectors is another important income producer. The manufacturing sector employs nearly 40% of the labor force and agriculture less than 4%. The per capita level of output and standard of living are comparable to northern Italy.

Economy

Overview: The economy has remained dependent on cocoa since the gained independence nearly 15 years ago. Since then, however, cocoa production has gradually deteriorated because of drought and mismanagement, so that by 1987 output had fallen to less than 50% of its former levels. As a result, a shortage of cocoa for export has created a serious balance-of-payments problem. Production of less important crops, such as coffee, copra, and palm kernels, has also declined. The value of imports generally exceeds that of exports by a ratio of 4 to 1. The emphasis on cocoa production at the expense of other food crops has meant that Sao Tome has to import 90% of food needs. It also has to import all fuels and most manufactured goods. Over the years, Sao Tome has been unable to service its external debt, which amounts to roughly 80% of export earnings. Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. The government also implemented a Five-Year Plan covering 1986-90 to restructure the economy and reschedule external debt service payments in cooperation with the International Development Association and Western lenders.

GDP: \$37.9 million, per capita \$340; real growth rate 1.8% (1986)

Inflation rate (consumer prices): 4.2% (1986)

Economy

Overview: By far the most important economic activity is the production of petroleum and petroleum products. The petroleum sector accounts for about 85% of budget revenues, 80% of GDP, and almost all export earnings. Saudi Arabia has the largest reserves of petroleum in the world, is the largest exporter of petroleum, and plays a leading role in OPEC. Oil wealth has provided a per capita GDP that is comparable to most industrialized countries. Saudi Arabia is one of the few countries where consumer prices have been dropping or showing little change in recent years.

Economy

Overview: The agricultural sector accounts for about 20% of GDP and provides employment for about 75% of the labor force. About 40% of the total cultivated land is used to grow peanuts, an important export crop. The principal economic resource is fishing, which brought in about \$200 million or about 25% of total foreign exchange earnings in 1987. Mining is dominated by the extraction of phosphate, but production has faltered because of reduced worldwide demand for fertilizers in recent years. Over the past 10 years tourism has become increasingly more important to the economy.

GDP: \$5.0 billion, per capita \$680; real growth rate 5.1% (1988 est.)

Inflation rate (consumer prices): -1.8% (1988 est.)

Economy

Overview: Singapore has an open entrepreneurial economy with strong service and manufacturing sectors and excellent international trading links derived from its entrepôt history. During the 1970s and early 1980s, the economy expanded rapidly, achieving an average annual growth rate of 9%. Per capita GDP is among the highest in Asia. In 1985 the economy registered its first drop in 20 years and achieved less than a 2% increase in 1986. Recovery was strong. Estimates for 1989 suggest a 9.2% growth rate based on rising demand for Singapore's products in OECD countries, a strong Japanese yen, and improved competitiveness of domestic manufactures.

Economy

Overview: About 90% of the population depend on subsistence agriculture, fishing, and forestry for at least part of their livelihood. Agriculture, fishing, and forestry contribute about 75% to GDP, with the fishing and forestry sectors being important export earners. The service sector contributes about 25% to GDP. Manufacturing activity is negligible. Most manufactured goods and petroleum products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. The economy suffered from a severe cyclone in mid-1986 which caused widespread damage to the infrastructure.

GDP: \$156 million, per capita \$500; real growth rate 4.3% (1988)

Inflation rate (consumer prices): 11.2% (1988)

Unemployment rate: NA%

Economy

Overview: One of the world's least developed countries, Somalia has few resources. In 1988 per capita GDP was \$210. Agriculture is the most important sector of the economy, with the livestock sector accounting for about 40% of GDP and about 65% of export earnings. Nomads and seminomads who are dependent upon livestock for their livelihoods make up about 50% of the population. Crop production generates only 10% of GDP and employs about 20% of the work force. The main export crop is bananas; sugar, sorghum, and corn are grown for the domestic market. The small industrial sector is based on the processing of agricultural products and accounts for less than 10% of GDP. At the end of 1988 serious economic problems facing the nation were the external debt of \$2.8 billion and double-digit inflation.

GDP: \$1.7 billion, per capita \$210; real growth rate -1.4% (1988)

Inflation rate (consumer prices): 81.7% (1988 est.)

Unemployment rate: NA%

Economy

Overview: Many of the white one-seventh of the South African population enjoy incomes, material comforts, and health and educational standards equal to those of Western Europe. In contrast, most of the remaining population suffers from the poverty patterns of the Third World, including unemployment, lack of job skills, and barriers to movement into higher-paying fields. Inputs and outputs thus do not move smoothly into the most productive employments, and the effectiveness of the market is further lowered by international constraints on dealings with South Africa. The main strength of the economy lies in its rich mineral resources, which provide two-thirds of exports. Average growth of 2% in output in recent years falls far short of the level needed to cut into the high unemployment level.

GDP: \$83.5 billion, per capita \$2,380; real growth rate 3.2% (1988)

Inflation rate (consumer prices): 14.67% (1989)

Unemployment rate: 22% (1988); blacks 25-30%, up to 50% in homelands (1988 est.)

Imports: \$18.5 billion (c.i.f., 1989 est.); *commodities*—machinery 27%, chemicals 11%, vehicles and aircraft 11%, textiles, scientific instruments, base metals; *partners*—US, FRG, Japan, UK, France, Italy, Switzerland

External debt: \$21.2 billion (1988 est.)

Industrial production: growth rate 5.6% (1988)

Electricity: 34,941,000 kW capacity; 158,000 million kWh produced, 4,100 kWh per capita (1989)

Industries: mining (world's largest producer of diamonds, gold, chrome), automobile assembly, metalworking, machinery, textile, iron and steel, chemical, fertilizer, foodstuffs

Agriculture: accounts for 6% of GDP and 30% of labor force; diversified agriculture, with emphasis on livestock; products—cattle, poultry, sheep, wool, milk, beef, corn, wheat; sugarcane, fruits, vegetables; self-sufficient in food

Aid: NA

Currency: rand (plural—rand); 1 rand (R) = 100 cents

See regional map IV

Geography

Total area: 4,066 km²; land area: 4,066 km²; includes Shag and Clerke Rocks

Comparative area: slightly larger than Rhode Island

Land boundaries: none

Coastline: undetermined

Maritime claims:

Continental shelf: 200 meters or to depth of exploitation

Exclusive fishing zone: 200 nm

Territorial sea: 12 nm

Disputes: administered by the UK, claimed by Argentina

Climate: variable, with mostly westerly winds throughout the year, interspersed with periods of calm; nearly all precipitation falls as snow

Terrain: most of the islands, rising steeply from the sea, are rugged and mountainous; South Georgia is largely barren and has steep, glacier-covered mountains; the South Sandwich Islands are of volcanic origin with some active volcanoes

Natural resources: fish

Land use: 0% arable land; 0% permanent crops; 0% meadows and pastures; 0% forest and woodland; 100% other; largely covered by permanent ice and snow with some sparse vegetation consisting of grass, moss, and lichen

Environment: reindeer, introduced early in this century, live on South Georgia; weather conditions generally make it difficult to approach the South Sandwich Islands; the South Sandwich Islands are subject to active volcanism

Note: the north coast of South Georgia has several large bays, which provide good anchorage

People

Population: no permanent population; there is a small military garrison on South Georgia and the British Antarctic Survey

has a biological station on Bird Island; the South Sandwich islands are uninhabited

Economy

Overview: The first five years of perestroika (economic restructuring) have undermined the institutions and processes

of the Soviet command economy without replacing them with efficiently functioning markets. The initial reforms featured greater authority for enterprise managers over prices, wages, product mix, investment, sources of supply, and customers. But in the absence of effective market discipline, the result was the disappearance of low-price goods, excessive wage increases, an even larger volume of unfinished construction projects, and, in general, continued economic stagnation. The Gorbachev regime has made at least four serious errors in economic policy in these five years: the unpopular and short-lived anti-alcohol campaign; the initial cutback in imports of consumer goods; the failure to act decisively for the privatization of agriculture; and the buildup of a massive overhang of unspent rubles in the hands of households and enterprises. In October 1989, a top economic adviser, Leonid Balakin presented an ambitious but reasonable timetable for the conversion to a partially privatized market system in the 1990s. In December 1989, however, Premier Ryzhkov's conservative approach prevailed, namely, the contention that a period of retrenchment was necessary to provide a stable financial and legislative base for launching further reforms. Accordingly, the new strategy was to put the reform process on hold in 1990-92 by recentralizing economic authority and to placate the rank-and-file through sharp increases in consumer goods output. In still another policy twist, the leadership in early 1990 was considering a marked speedup in the marketization process. Because the economy is caught in between two systems, there was in 1989 an even greater mismatch between what was produced and what would serve the best interests of enterprises and households. Meanwhile, the seething nationality problems have been dislocating regional patterns of economic specialization and pose a further major threat to growth prospects over the next few years.

GNP: \$2,659.5 billion, per capita \$9,211; real growth rate 1.4% (1989 est. based on Soviet statistics; cutbacks in Soviet reporting on products included in sample make the estimate subject to greater uncertainty than in earlier years)

Inflation rate (consumer prices): 6% (1989 est.)

Unemployment rate: officially, no unemployment

Budget: revenues \$622 billion; expenditures \$781 billion, including capital expenditures of \$119 billion (1989 est.)

Exports: \$110.7 billion (f.o.b., 1988); *commodities*—petroleum and petroleum products, natural gas, metals, wood, agricultural products, and a wide variety of

manufactured goods (primarily capital goods and arms); *partners*—Eastern Europe 49%, EC 14%, Cuba 5%, US, Afghanistan (1988)

Imports: \$107.3 billion (c.i.f., 1988); *commodities*—grain and other agricultural products, machinery and equipment, steel products (including large-diameter pipe), consumer manufactures; *partners*—Eastern Europe 54%, EC 11%, Cuba, China, US (1988)

External debt: \$27.3 billion (1988)

Industrial production: growth rate 0.2% (1989 est.)

Electricity: 355,000,000 kW capacity; 1,790,000 million kWh produced, 6,150 kWh per capita (1989)

Industries: diversified, highly developed capital goods and defense industries; consumer goods industries comparatively less developed

Agriculture: accounts for roughly 20% of GNP and labor force; production based on large collective and state farms; inefficiently managed; wide range of temperate crops and livestock produced; world's second-largest grain producer after the US; shortages of grain, oilseeds, and meat; world's leading producer of sawnwood and roundwood; annual fish catch among the world's largest—11.2 million metric tons (1987)

Illicit drugs: illegal producer of cannabis and opium poppy, mostly for domestic consumption; government has begun eradication program to control cultivation; used as a transshipment country

Aid: donor—extended to non-Communist less developed countries (1954-88), \$47.4 billion; extended to other Communist countries (1954-88), \$147.6 billion

Currency: ruble (plural—rubles); 1 ruble (R) = 100 kopeks

Exchange rates: rubles (R) per US\$1—0.600 (February 1990), 0.629 (1989), 0.629 (1988), 0.633 (1987), 0.704 (1986), 0.838 (1985); note—the exchange rate is administratively set and should not be used indiscriminately to convert domestic rubles to dollars; on 1 November 1989 the USSR began using a rate of 6.26 rubles to the dollar for Western tourists buying rubles and for Soviets traveling abroad, but retained the official exchange rate for most trade transactions

Economy

Overview: This Western capitalistic economy has done well since Spain joined the European Economic Community in 1986. With increases in real GNP of 5.5% in 1987 and about 5% in 1988 and 1989, Spain has been the fastest growing member of the EC. Increased investment—both domestic and foreign—has been the most important factor pushing the economic expansion. Inflation moderated to 4.8% in 1988, but an overheated economy caused inflation to reach an estimated 7% in 1989. Another economic problem facing Spain is an unemployment rate of 16.5%, the highest in Europe.

GNP: \$398.7 billion, per capita \$10,100; real growth rate 4.8% (1989 est.)

Inflation rate (consumer prices): 7.0% (1989 est.)

Unemployment rate: 16.5% (1989 est.)

Budget: revenues \$57.8 billion; expenditures \$66.7 billion, including capital expenditures of \$10.4 billion (1987)

Exports: \$40.2 billion (f.o.b., 1988); *commodities*—foodstuffs, live animals, wood, footwear, machinery, chemicals; *partners*—EC 66%, US 8%, other developed countries 9%

Imports: \$60.4 billion (c.i.f., 1988); *commodities*—petroleum, footwear, machinery, chemicals, grain, soybeans, coffee, tobacco, iron and steel, timber, cotton, transport equipment; *partners*—EC 57%, US 9%, other developed countries 13%, Middle East 3%

External debt: \$32.7 billion (1988)

Industrial production: growth rate 3.0% (1988)

Electricity: 46,589,000 kW capacity; 157,040 million kWh produced, 3,980 kWh per capita (1989)

Industries: textiles and apparel (including footwear), food and beverages, metals and metal manufactures, chemicals, shipbuilding, automobiles, machine tools

Agriculture: accounts for 5% of GNP and 14% of labor force; major products—grain, vegetables, olives, wine grapes, sugar beets, citrus fruit, beef, pork, poultry, dairy; largely self-sufficient in food; fish catch of 1.4 million metric tons among top 20 nations

Aid: US commitments, including Ex-Im (FY70-87), \$1.9 billion; Western (non-US) countries, ODA and OOF bilateral commitments (1970-79), \$545.0 million

Economy

Overview: Sudan, one of the world's poorest countries, is buffeted by civil war, chronic political instability, adverse weather, and counterproductive economic policies. The economy is dominated by governmental entities that account for more than 70% of new investment. The private sector's main areas of activity are agriculture and trading, with most private industrial investment predating 1980. The economy's base is agriculture, which employs 80% of the work force. Industry mainly processes agricultural items. A high foreign debt and arrearages of about \$13 billion continue to cause difficulties. Since 1979 the International Monetary Fund has provided assistance and has forced Sudan to make economic reforms aimed at improving the performance of the economy.

Economy

Overview: The economy is dominated by the bauxite industry, which accounts for about 80% of export earnings and 40% of tax revenues. The economy has been in trouble since the Dutch ended development aid in 1982. A drop in world bauxite prices that started in the late 1970s and continued until late 1986, was followed by the outbreak of a guerrilla insurgency in the interior. The guerrillas targeted the economic infrastructure, crippling the important bauxite sector and shutting down other export industries. These problems have created both high inflation and high unemployment. A small gain in economic growth of 3.6% was registered in 1988 due to reduced guerrilla activity and improved international markets for bauxite. GDP: \$1.27 billion, per capita \$3,215; real growth rate 3.6% (1988 est.)

Inflation rate (consumer prices): 50% (1988 est.)

Unemployment rate: 27% (1988)

Budget: revenues \$466 million; expenditures \$716 million, including capital expenditures of \$123 million (1989 est.)

Government

Long-form name: none

Type: territory of Norway administered by the Ministry of Industry, Oslo, through a governor (sysselmann) residing in Longyearbyen, Spitsbergen; by treaty (9 February 1920) sovereignty was given to Norway

Capital: Longyearbyen

Leaders: *Chief of State*—King OLAV V (since 21 September 1957);

Head of Government Governor Leif ELDRING (since NA)

Flag: the flag of Norway is used

Economy

Overview: Coal mining is the major economic activity on Svalbard. By treaty (9 February 1920), the nationals of the treaty powers have equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still mining are Norwegian and Soviet. Each company mines about half a million tons of coal annually. The settlements on Svalbard are essentially company towns. The Norwegian state-owned coal company employs nearly 60% of the Norwegian population on the island, runs many of the local services, and provides most of the local infrastructure. There is also some trapping of seal, polar bear, fox, and walrus.

Electricity: 21,000 kW capacity; 45 million kWh produced, 11,420 kWh per capita (1989)

Currency: Norwegian krone (plural—kroner); 1 Norwegian krone (Nkr) = 100 øre

Flag: three horizontal bands of blue (top), red (triple width), and blue; the red band is edged in yellow; centered in the red band is a large black and white shield covering two spears and a staff decorated with feather tassels, all placed horizontally

Economy

Overview: The economy is based on subsistence agriculture, which occupies much of the labor force and contributes about 25% to GDP. Manufacturing, which includes a number of agroprocessing factories, accounts for another 25% of GDP. Mining has declined in importance in recent years; high-grade iron ore deposits were depleted in 1978, and health concerns cut world demand for asbestos. Exports of sugar and forestry products are the main earners of hard currency. Surrounded by South Africa, except for a short border with Mozambique, Swaziland is heavily dependent on South Africa, from which it receives 90% of its imports and to which it sends about one-third of its exports. GNP: \$539 million, per capita \$750; real growth rate 5.7% (1989 est.)

Economy

Overview: Aided by a long period of peace and neutrality during World War I through World War II, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive welfare benefits. It has essentially full employment, a modern distribution system, excellent internal and external communications, and a skilled and intelligent labor force. Timber, hydro-power, and iron ore constitute the resource base of an economy that is heavily oriented toward foreign trade. Privately owned firms account for about 90% of industrial output, of which the engineering sector accounts for 50% of output and exports. As the 1990s open, however, Sweden faces serious economic problems: long waits for adequate housing, the decay of

Sweden (continued)

the work ethic, and a loss of competitive edge in international markets.

Economy

Overview: Switzerland's economic success is matched in few, if any, other nations. Per capita output, general living standards, education and science, health care, and diet are unsurpassed in Europe.

Inflation remains low because of sound government policy and harmonious labor-management relations. Unemployment is negligible, a marked contrast to the larger economies of Western Europe. This economic stability helps promote the important banking and tourist sectors. Since World War II, Switzerland's economy has adjusted smoothly to the great changes in output and trade patterns in Europe and presumably can adjust to the challenges of the 1990s, in particular, the further economic integration of Western Europe and the amazingly rapid changes in East European political/economic prospects.

GDP: \$119.5 billion, per capita \$17,800; real growth rate 3.0% (1989 est.)

Inflation rate (consumer prices): 2.8% (1989 est.)

Unemployment rate: 0.5% (1989 est.)

Economy

Overview: Syria's rigidly structured Ba'thist economy is turning out roughly the same amount of goods in 1989 as in 1983, when the population was 20% smaller. Economic difficulties are attributable, in part, to severe drought in several recent years, costly but unsuccessful attempts to match Israel's military strength, a falloff in Arab aid, and insufficient foreign exchange earnings to buy needed inputs for industry and agriculture. Socialist policy, embodied in a thicket of bureaucratic regulations, in many instances has driven away or pushed underground the mercantile and entrepreneurial spirit for which Syrian businessmen have long been famous. Two bright spots: a sizable number of villagers have benefited from land redistribution, electrification, and other rural development programs; and a recent find of light crude oil has enabled Syria to cut back its substantial imports of light crude. A long-term concern is the additional drain of upstream Euphrates water by Turkey when its vast dam and irrigation projects are completed toward the end of the 1990s.

Economy

Overview: Tanzania is one of the poorest countries in the world. The economy is heavily dependent on agriculture, which accounts for about 40% of GDP, provides 85% of exports, and employs 90% of the work force. Industry accounts for about 10% of GDP and is mainly limited to processing agricultural products and light consumer goods. The economic recovery program announced in mid-1986 has generated notable increases in agricultural production and financial support for the program by bilateral donors. The World

Bank and the International Monetary Fund have increased the availability of imports and provided funds to rehabilitate Tanzania's deteriorated economic infrastructure.

Economy

Overview: Thailand, one of the more advanced developing countries in Asia, enjoyed its second straight exceptionally prosperous year in 1989. Real output again rose about 11%. The increasingly sophisticated manufacturing sector benefited from export-oriented investment, and agriculture grew by 4.0% because of im-

proved weather. The trade deficit of \$5.2 billion was more than offset by earnings from tourism (\$3.9 billion), remittances, and net capital inflows. The government has followed a fairly sound fiscal and monetary policy, aided by increased tax receipts from the fast-moving economy. In 1989 the government approved new projects—roads, ports, electric power, communications—needed to refurbish the now overtaxed infrastructure. Although growth in 1990-91 must necessarily fall below the 1988-89 pace, Thailand's immediate economic outlook is good, assuming the continuation of prudent government policies in the context of a private-sector-oriented development strategy.
GNP: \$64.5 billion, per capita \$1,160; real growth rate 10.8% (1989 est.)
Inflation rate (consumer prices): 5.4% (1989)
Unemployment rate: 6% (1989 est.)
Budget: revenues \$12.1 billion; expenditures \$9.7 billion, including capital expenditures of NA (FY89)
Exports: \$19.9 billion (f.o.b., 1989); *commodities*—textiles 12%, fishery products 12%, rice 8%, tapioca 8%, jewelry 6%, manufactured gas, corn, tin; *partners*—US 18%, Japan 14%, Singapore 9%, Netherlands, Malaysia, Hong Kong, China (1988)
Imports: \$25.1 billion (c.i.f., 1989); *commodities*—machinery and parts 23%, petroleum products 13%, chemicals 11%, iron and steel, electrical appliances; *partners*—Japan 26%, US 14%, Singapore 7%, FRG, Malaysia, UK (1987)
External debt: \$18.5 billion (December 1989 est.)
Industrial production: growth rate 12.5% (1989)
Electricity: 7,100,000 kW capacity; 28,000 million kWh produced, 500 kWh per capita (1989)
Industries: tourism is the largest source of foreign exchange; textiles and garments, agricultural processing, beverages, tobacco, cement, other light manufacturing, such as jewelry; electric appliances and components, integrated circuits, furniture, plastics; world's second-largest tungsten producer and third-largest tin producer
Agriculture: accounts for 16% of GNP and 73% of labor force; leading producer and exporter of rice and cassava (tapioca); other crops—rubber, corn, sugarcane, coconuts, soybeans; except for wheat, self-sufficient in food; fish catch of 2.2 million tons (1987)
Illicit drugs: a minor producer, major illicit trafficker of heroin, particularly from Burma and Laos, and cannabis for the international drug market; eradication efforts have reduced the area of cannabis

cultivation and shifted some production to neighboring countries; opium poppy cultivation has been affected by eradication efforts, but unusually good weather boosted output in 1989

Aid: US commitments, including Ex-Im (FY70-88), \$828 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$7.0 billion; OPEC bilateral aid (1979-89), \$19 million

Economy

Overview: Togo is one of the least developed countries in the world with a per capita GDP of about \$400. The economy is heavily dependent on subsistence agriculture, which accounts for about 35% of GDP and provides employment for 80% of the labor force. Primary agricultural exports are cocoa, coffee, and cotton, which together account for about 30% of total export earnings. Togo is self-sufficient in basic foodstuffs when harvests are normal. In the industrial sector phosphate mining is by far the most important activity, with phosphate exports accounting for about 40% of total foreign exchange earnings. **GDP:** \$1.35 billion, per capita \$405; real growth rate 4.1% (1988 est.)

Economy

Overview: Tokelau's small size, isolation, and lack of resources greatly restrain economic development and confine agriculture to the subsistence level. The people must rely on aid from New Zealand to maintain public services, annual aid being substantially greater than GDP. The principal sources of revenue come from sales of copra, postage stamps, souvenir coins, and handicrafts. Money is also remitted to families from relatives in New Zealand.

Overview: The economy's base is agriculture, which employs about 70% of the labor force and contributes 50% to GDP. Coconuts, bananas, and vanilla beans are the main crops and make up two-thirds of exports. The country must import a high proportion of its food, mainly from New Zealand. The manufacturing sector accounts for only 10% of GDP. Tourism is the primary source of hard currency earnings, but the island remains dependent on sizable external aid and remittances to sustain its trade deficit.

Economy

Overview: Trinidad and Tobago's petroleum-based economy has been in decline since 1982. During the first half of the 1980s, the petroleum sector accounted for nearly 80% of export earnings, 40% of government revenues, and almost 25% of GDP. In recent years, however, the economy has suffered because of the sharp fall in the price of oil. The government, in response to the revenue loss, pursued a series of austerity measures that pushed the unemployment rate to 22% in 1988. Agriculture employs only about 11% of the labor force and produces less than 3% of GDP. Since this sector is small, it has been unable to absorb the large numbers of the unemployed. The government currently seeks to diversify its export base. **GDP:** \$3.75 billion, per capita \$3,070; real growth rate -2.0% (1988 est.)

Inflation rate (consumer prices): 15.0% (1989 est.)

Unemployment rate: 22% (1988)

Budget: revenues \$1.4 billion; expenditures \$2.1 billion, including capital expenditures of \$430 million (1988 est.)

Exports: \$1.4 billion (f.o.b., 1987); **commodities**—includes reexports—petroleum and petroleum products 70%, fertilizer, chemicals 15%, steel products, sugar, cocoa, coffee, citrus (1987); **partners**—US 61%, EC 15%, CARICOM 9%, Latin America 7%, Canada 3% (1986)

Imports: \$1.2 billion (c.i.f., 1987); **commodities**—raw materials 41%, capital goods 30%, consumer goods 29% (1986); **partners**—US 42%, EC 21%, Japan 10%, Canada 6%, Latin America 6%, CARICOM 4% (1986)

External debt: \$2.02 billion (December 1987)

Industrial production: growth rate 5.2%, excluding oil refining (1986)

Electricity: 1,176,000 kW capacity; 3,350 million kWh produced, 2,700 kWh per capita (1989)

Industries: petroleum, chemicals, tourism, food processing, cement, beverage, cotton textiles

Agriculture: accounts for about 3% of GDP and 4% of labor force; highly subsidized sector; major crops—cocoa and sugarcane; sugarcane acreage is being shifted into rice, citrus, coffee, vegetables; must import large share of food needs

Aid: US commitments, including Ex-Im (FY70-85), \$370 million; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$437 million

Currency: Trinidad and Tobago dollar (plural—dollars); 1 Trinidad and Tobago dollar (TT\$) = 100 cents

Exchange rates: Trinidad and Tobago dollars (TT\$) per US\$1—4.2500 (January 1990), 4.2500 (1989), 3.8438 (1988), 3.6000 (1987), 3.6000 (1986), 2.4500 (1985)

Economy

Overview: The economy depends primarily on petroleum, phosphates, and tourism for continued growth. Two successive drought-induced crop failures have strained the government's budget and increased unemployment. The current account fell from a \$23 million surplus in 1988 to a \$390 million deficit in 1989. Despite its foreign payments problems, Tunis appears committed to its IMF-supported structural adjustment program. Nonetheless, the government may have to slow its implementation to head off labor unrest. The increasing foreign debt—\$7.6 billion at yearend 1989—is also a key problem. Tunis probably will seek debt relief in 1990.
GDP: \$8.7 billion, per capita \$1,105; real growth rate 3.1% (1989 est.)
Inflation rate (consumer prices): 10% (1989)

Economy

Overview: The economic reforms that Turkey launched in 1980 continue to bring an impressive stream of benefits. The economy has grown steadily since the early 1980s, with real growth in per capita GDP increasing more than 6% annually. Agriculture remains the most important

economic sector, employing about 60% of the labor force, accounting for almost 20% of GDP, and contributing about 25% to exports. Impressive growth in recent years has not solved all of the economic problems facing Turkey. Inflation and interest rates remain high, and a large budget deficit will continue to provide difficulties for a country undergoing a substantial transformation from a centrally controlled to a free market economy. The government has launched a multimillion-dollar development program in the southeastern region, which includes the building of a dozen dams on the Tigris and Euphrates rivers to generate electric power and irrigate large tracts of farmland. The planned tapping of huge quantities of Euphrates water has raised serious concern in the downstream riparian nations of Syria and Iraq.

GDP: \$75 billion, per capita \$1,350; real growth rate 1.8% (1989 est.)

Inflation rate (consumer prices): 68.8% (1989)

Unemployment rate: 15.8% (1988)

Budget: revenues \$12.1 billion; expenditures \$14.5 billion, including capital expenditures of \$2.08 billion (FY88 est.)

Exports: \$11.7 billion (f.o.b., 1988); *commodities*—industrial products 70%, crops and livestock products 25%; *partners*—FRG 18.4%, Iraq 8.5%, Italy 8.2%, US 6.5%, UK 4.9%, Iran 4.7%

Imports: \$14.3 billion (c.i.f., 1988); *commodities*—crude oil, machinery, transport equipment, metals, pharmaceuticals, dyes, plastics, rubber, mineral fuels, fertilizers, chemicals; *partners*—FRG 14.3%, US 10.6%, Iraq 10.0%, Italy 7.0%, France 5.8%, UK 5.2%

External debt: \$36.3 billion (November 1989)

Industrial production: growth rate 7.4% (1988)

Economy

Overview: Tuvalu consists of a scattered group of nine coral atolls with poor-quality soil. The country has a small economy, no known mineral resources, and few exports. Subsistence farming and fishing are the primary economic activities. The islands are too small and too remote for development of a tourist industry. Government revenues largely come from the sale of stamps and coins and worker remittances. Substantial income is received annually from an international trust fund established in 1987 by Australia, New Zealand, and the UK and supported also by Japan and South Korea. **GNP:** \$4.6 million, per capita \$530; real growth rate NA% (1989 est.)

Economy

Overview: Uganda has substantial natural resources, including fertile soils, regular rainfall, and sizable mineral deposits of copper and cobalt. For most of the past 15 years the economy has been devastated by political instability, mismanagement, and civil war, keeping Uganda poor with a per capita income of about \$300. (GDP remains below the levels of the early 1970s, as does industrial production.) Agriculture is the most important sector of the economy, employing over 80% of the work force. Coffee is the major export crop and accounted for 97% of export revenues in 1988. Since 1986 the government has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising producer prices on export crops, increasing petroleum prices, and improving civil service wages. The policy changes are especially aimed at dampening inflation, which was running at over 300% in 1987, and boosting production and export earnings.

GDP: \$4.9 billion, per capita \$300 (1988); real growth rate 6.1% (1989 est.)

Inflation rate (consumer prices): 72% (FY89)

Economy

Overview: The UAE has an open economy with one of the world's higher levels of income per capita. This wealth is based on oil and gas, and the fortunes of the economy fluctuate with the prices of those commodities. Since 1973, when petroleum prices shot up, the UAE has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. At present levels of production, crude oil reserves should last for over 100 years.

Economy

Overview: The UK is one of the world's great trading powers and financial centers, and its economy ranks among the four largest in Europe. The economy is essen-

tially capitalistic with a generous admixture of social welfare programs and government ownership. Over the last decade the Thatcher government has halted the expansion of welfare measures and has promoted extensive reprivatization of the government economic sector. Agriculture is intensive, highly mechanized, and efficient by European standards, producing about 60% of food needs with only 1% of the labor force. Industry is a mixture of public and private enterprises, employing about 24% of the work force and generating 22% of GDP. The UK is an energy-rich nation with large coal, natural gas, and oil reserves; primary energy production accounts for 12% of GDP, one of the highest shares of any industrial nation. Following the recession of 1979-81, the economy has enjoyed the longest period of continuous economic growth it has had during the last 30 years. During the period 1982-89 real GDP grew by about 25%, while the inflation rate of 14% was nearly halved. Between 1986 and 1989 unemployment fell from 11% to about 6%. As a major trading nation, the UK will continue to be greatly affected by: world boom or recession; swings in the international oil market; productivity trends in domestic industry; and the terms on which the economic integration of Europe proceeds.

GDP: \$818.0 billion, per capita \$14,300; real growth rate 2.3% (1989 est.)

Inflation rate (consumer prices): 7.8% (1989)

Unemployment rate: 6.4% (1989)

Budget: revenues \$348.7 billion; expenditures \$327.8 billion, including capital expenditures of \$42.0 billion (FY89)

Exports: \$151.0 billion (f.o.b., 1989); *commodities*—manufactured goods, machinery, fuels, chemicals, semifinished goods, transport equipment; *partners*—EC 50.4% (FRG 11.7%, France 10.2%, Netherlands 6.8%), US 13.0%, Communist countries 2.3%

Imports: \$189.2 billion (c.i.f., 1989); *commodities*—manufactured goods, machinery, semifinished goods, foodstuffs, consumer goods; *partners*—EC 52.5% (FRG 16.6%, France 8.8%, Netherlands 7.8%), US 10.2%, Communist countries 2.1%

External debt: \$15.7 billion (1988)

Economy

Overview: The economy is slowly recovering from the deep recession of 1981-84. In 1986 real GDP grew by 6.6% and in 1987 by 4.9%. The recovery was led by growth in the agriculture and fishing sectors, agriculture alone contributing 20% to GDP, employing about 11% of the labor force, and generating a large proportion of export earnings. Raising livestock, particularly cattle and sheep, is the major agricultural activity. In 1988, despite healthy exports and an improved current account, domestic growth slowed because of gov-

ernment concentration on the external sector, adverse weather conditions, and prolonged strikes. High inflation rates of about 80%, a large domestic debt, and frequent strikes remain major economic problems for the government.

GDP: \$8.8 billion, per capita \$2,950; real growth rate 1% (1989 est.)

Inflation rate (consumer prices): 80% (1989 est.)

Economy

Overview: This is a centrally planned, developing economy with extensive government ownership and control of productive facilities. The economy is primarily agricultural, employing about 65% of the labor force and accounting for almost half of GNP. Rice is the staple crop; substantial amounts of maize, sorghum, cassava, and sweet potatoes are also grown. The government permits sale of surplus grain on the open market. Most of the mineral resources are located in the north, including coal, which is an important export item. Following the end of the war in 1975, heavy handed government measures undermined efforts at an efficient merger of the agricultural resources of the south and the industrial resources of the north. The economy remains heavily dependent on foreign aid and has received assistance from Communist countries, Sweden, and UN agencies. Inflation, although down from recent triple-digit levels, is still a major weakness, and per capita output is among the world's lowest. Since early

1989 the government has sponsored a broad reform program that seeks to turn more economic activity over to the private sector.
GNP: \$14.2 billion, per capita \$215; real growth rate 8% (1989 est.)
Inflation rate (consumer prices): 40% (1989 est.)
Unemployment rate: 25% (1989 est.)
Budget: revenues \$3.2 billion; expenditures \$4.3 billion, including capital expenditures of \$528 million (1987 est.)
Exports: \$1.1 billion (f.o.b., 1988); *commodities*—agricultural and handicraft products, coal, minerals, ores; *partners*—USSR, Eastern Europe, Japan, Singapore
Imports: \$2.5 billion (c.i.f., 1988); *commodities*—petroleum, steel products, railroad equipment, chemicals, medicines, raw cotton, fertilizer, grain; *partners*—USSR, Eastern Europe, Japan, Singapore
External debt: \$16 billion (1989)
Industrial production: growth rate 10% (1989)
Electricity: 2,465,000 kW capacity; 6,730 million kWh produced, 100 kWh per capita (1989)
Industries: food processing, textiles, machine building, mining, cement, chemical fertilizer, glass, tires, oil, fishing
Agriculture: accounts for half of GNP; paddy rice, corn, potatoes make up 50% of farm output; commercial crops (rubber, soybeans, coffee, tea, bananas) and animal products other 50%; not self-sufficient in food staple rice; fish catch of 900,000 metric tons (1988 est.)
Aid: US commitments, including Ex-Im (FY70-74), \$3.1 billion; Western (non-US) countries, ODA and OOF bilateral commitments (1970-87), \$2.7 billion; OPEC bilateral aid (1979-89), \$61 million; Communist countries (1970-88), \$10.9 million
Currency: new dong (plural—new dong); 1 new dong (D) = 100 xu
Exchange rates: new dong (D) per US\$1—4,000 (March 1990), 900 (1988), 225 (1987), 18 (1986), 12 (1985); note—1985-89 figures are end of year

West Bank

See regional map VI

Note: The war between Israel and the Arab states in June 1967 ended with Israel in control of the West Bank and the Gaza Strip, the Sinai, and the Golan Heights. As stated in the 1978 Camp David Accords and reaffirmed by President Reagan's 1 September 1982 peace initiative, the final status of the West Bank and the Gaza Strip, their relationship with their neighbors, and a peace treaty between Israel and Jordan are to be negotiated among the concerned parties. Camp David further specifies that these negotiations will resolve the respective boundaries. Pending the completion of this process, it is US policy that the final status of the West Bank and the Gaza Strip has yet to be determined. In the view of the US, the term West Bank describes all of the area west of the Jordan River under Jordanian administration before the 1967 Arab-Israeli war. However, with respect to negotiations envisaged in the framework agreement, it is US policy that a distinction must be made between Jerusalem and the rest of the West Bank because of the city's special status and circumstances. Therefore, a negotiated solution for the final status of Jerusalem could be different in character from that of the rest of the West Bank.

Long-form name: none

Note: The West Bank is currently governed by Israeli military authorities and Israeli civil administration. It is US policy that the final status of the West Bank will be determined by negotiations among the concerned parties. These negotiations will determine how the area is to be governed.

Economy

Overview: Economic progress in the West Bank has been hampered by Israeli military occupation and the effects of the Palestinian uprising. Industries using advanced technology or requiring sizable financial resources have been discouraged by a lack of financial resources and Israeli policy. Capital investment has largely gone into residential housing, not into productive assets that could compete with Israeli industry. A major share of GNP is derived from remittances of workers employed in Israel and neighboring Gulf states. Israeli reprisals against Palestinian unrest in the West Bank since 1987 have pushed unemployment up and lowered living standards.

Economy

Overview: Western Sahara, a territory poor in natural resources and having little rainfall, has a per capita GDP of just a few hundred dollars. Fishing and phosphate mining are the principal industries and sources of income. Most of the food for the urban population must be imported. All trade and other economic activities are controlled by the Moroccan Government.

Economy

Overview: Agriculture employs two-thirds of the labor force, contributes 50% to GDP, and is the source of 90% of exports. The bulk of export earnings comes from the sale of coconut oil and copra. The economy depends on emigrant remittances and foreign aid to support a level of imports about five times export earnings. Tourism has become the most important growth industry, and construction of the first international hotel is under way.

GDP: \$112 million, per capita \$615; real growth rate 0.2% (1989 est.)

Economy

Overview: In 1989 the World economy grew at an estimated 3.0%, somewhat lower than the estimated 3.4% for 1988. The technologically advanced areas—North America, Japan, and Western Europe—together account for 65% of the gross world product (GWP) of \$20.3 trillion; these developed areas grew in the aggregate at 3.5%. In contrast, the Communist (Second World) countries typically grew at between 0% and 2%, accounting for 23% of GWP. Experience in the developing countries continued mixed, with the newly industrializing countries generally maintaining their rapid growth, and many others struggling with debt, inflation, and inadequate investment. The year 1989 ended with remarkable political upheavals in the Communist countries, which presumably will dislocate economic production still further. The addition of nearly 100 million people a year to an already overcrowded globe will exacerbate the problems of pollution, desertification, underemployment, and poverty throughout the 1990s.

GWP (gross world product): \$20.3 trillion, per capita \$3,870; real growth rate 3.0% (1989 est.)

Inflation rate (consumer prices): 5%, developed countries; 100%, developing countries with wide variations (1989 est.)

Unemployment rate: NA%

Exports: \$2,694 billion (f.o.b., 1988); *commodities*—NA; *partners*—in value, about 70% of exports from industrial countries

Imports: \$2,750 billion (c.i.f., 1988); *commodities*—NA; *partners*—in value, about 75% of imports by the industrial countries

External debt: \$1,008 billion for less developed countries (1988 est.)

Industrial production: growth rate 5% (1989 est.)

Electricity: 2,838,680,000 kW capacity; 11,222,029 million kWh produced, 2,140 kWh per capita (1989)

Industries: chemicals, energy, machinery, electronics, metals, mining, textiles, food processing

Agriculture: cereals (wheat, maize, rice), sugar, livestock products, tropical crops, fruit, vegetables, fish

Economy

Overview: The low level of domestic industry and agriculture make North Yemen dependent on imports for virtually all of its essential needs. Large trade deficits are made up for by remittances from Yemenis working abroad and foreign aid. Once self-sufficient in food production, the YAR is now a major importer. Land once used for export crops—cotton, fruit, and vegetables—has been turned over to growing qat, a mildly narcotic shrub chewed by Yemenis that has no significant export market. Oil export revenues started flowing in late 1987 and boosted 1988 earnings by about \$800 million. **GDP:** \$5.5 billion, per capita \$820; real growth rate 19.7% (1988 est.)

Inflation rate (consumer prices): 16.9% (1988)

Unemployment rate: 13% (1986)

Member of: Arab League, FAO, G-77, GATT (de facto), IBRD, ICAO, IDA, IDB—Islamic Development Bank, IFAD, ILO, IMF, IMO, ITU, NAM, OIC, UN, UNESCO, UPU, WFTU, WHO, WMO, WTO

Diplomatic representation: none; the UK acts as the protecting power for the US in the PDRY

Flag: three equal horizontal bands of red (top), white, and black with a light blue, isosceles triangle based on the hoist side bearing a red five-pointed star

Economy

Overview: The PDRY is one of the poorest Arab countries, with a per capita GNP of about \$500. A shortage of natural resources, a widely dispersed population, and an arid climate make economic development difficult. The economy has grown at an average annual rate of only 2-3% since the mid-1970s. The economy is organized along socialist lines, dominated by the public sector. Economic growth has been constrained by a lack of incentives, partly stemming from centralized control over production decisions, investment allocation, and import choices.

GNP: \$1.2 billion, per capita \$495; real growth rate 5.2% (1988 est.)

Inflation rate (consumer prices): 2.8% (1987)

Unemployment rate: NA%

Budget: revenues \$429 million; expenditures \$976 million, including capital expenditures of \$402 million (1988 est.)

Exports: \$82.2 million (f.o.b., 1988 est.); *commodities*—cotton, hides, skins, dried and salted fish; *partners*—Japan, YAR, Singapore

Imports: \$598.0 million (f.o.b., 1988 est.); *commodities*—grain, consumer goods, crude oil, machinery, chemicals; *partners*—USSR, Australia, UK
External debt: \$2.25 billion (December 1989 est.)

Industrial production: growth rate NA%
Electricity: 245,000 kW capacity; 600 million kWh produced, 240 kWh per capita (1989)

Industries: petroleum refinery (operates on imported crude oil); fish

Agriculture: accounts for 13% of GNP and 45% of labor force; products—grain, qat (mildly narcotic shrub), coffee, fish, livestock; fish and honey major exports; most food imported

Aid: US commitments, including Ex-Im (FY70-80), \$4.5 million; Western (non-US)

countries, ODA and OOF bilateral commitments (1970-87), \$241 million; OPEC bilateral aid (1979-89), \$279 million; Communist countries (1970-88), \$2.2 billion

Economy

Overview: Tito's reform programs 20 years ago changed the Stalinist command economy to a decentralized semimarket system but a system that the rigid, ethnically divided political structure ultimately could not accommodate. A prominent feature of the reforms was the establishment of workers' self-management councils in all large plants, which were to select managers, stimulate production, and divide the proceeds. The general result of these reforms has been rampant wage-price inflation, substantial rundown of capital plant, consumer shortages, and a still larger income gap between the poorer southern regions and the relatively affluent northern provinces of Hrvatska and Slovenija. In 1988-89 the beleaguered central government has been reforming the reforms, trying to create an open market economy with still considerable state ownership of major industrial plants. These reforms have been moving forward with the advice and support of the International Monetary Fund through a series of tough negotiations. Self-management supposedly is to be replaced by the discipline of the market and by fiscal austerity, ultimately leading to a stable dinar. However, strikes in major plants, hyperinflation, and inter-regional political jousting have held back progress. According to US economic advisers, only a highly unlikely combination of genuine privatization, massive Western economic investment and aid, and political moderation can salvage this economy.

Economy

Overview: In 1988, in spite of large mineral resources and one of the most developed and diversified economies in Sub-Saharan Africa, Zaire had a GDP per capita of \$195, one of the lowest on the continent. Agriculture, a key sector of the economy, employs 75% of the population but generates under 30% of GDP. The main impetus for economic development has been the extractive industries. Mining and mineral processing account for about one-third of GDP and two-thirds of total export earnings. During the period 1983-88 the economy experienced slow growth,

Zambia

high inflation, a rising foreign debt, and a drop in foreign exchange earnings. Recent increases in foreign prices for copper—a key export earner—and other minerals offer some hope of reversing the economic decline. Zaire is the world's largest producer of diamonds.

GDP: \$6.5 billion, per capita \$195; real growth rate 2.8% (1988)

Economy

Overview: Despite temporary growth in 1988, the economy has been in decline for more than a decade with falling imports and growing foreign debt. Economic difficulties stem from a sustained drop in copper production and ineffective economic policies. In 1988 real GDP stood only slightly higher than that of 10 years before, while an annual population growth of more than 3% has brought a decline in per capita GDP of 25% during the same period. A high inflation rate has also added to Zambia's economic woes in recent years.

GDP: \$4.0 billion, per capita \$530; real growth rate 6.7% (1988)

Economy

Overview: Agriculture employs a majority of the labor force and supplies almost 40% of exports. The agro-based manufacturing sector produces a variety of goods and contributes about 25% to GDP. Mining accounts for only 5% of both GDP and employment, but supplies of minerals and metals account for about 40% of exports. Wide year-to-year fluctuations in agricultural production over the past six years resulted in not only an uneven growth rate, but one that did not equal the 3% annual increase in population.

GDP: \$4.6 billion, per capita \$470; real growth rate 5.3% (1988 est.)

Inflation rate (consumer prices): 7.4% (1988)

Metric Interrelationships

Conversions from a multiple or submultiple to the basic units of meters, liters, or grams can be done using the table. For example, to convert from kilometers to meters, multiply by 1,000 (9.26 kilometers equals 9,260 meters) or to convert from meters to kilometers, multiply by 0.001 (9,260 meters equals 9.26 kilometers)
